

Create a Minecraft Mod for \$80 with this Coding For Youth Course

The gaming industry is huge and it doesn't appear to slow down anytime soon. Children are also becoming more interested in gaming careers So what better way to help that than learning coding? With this StackSocial coding bundle for youth anyone can begin coding and gain essential coding skills at the low cost of \$80 until July 8.

See StackSocial

This bundle is designed for ages 11-18, however it's an ideal fit for anyone Minecraft fan with little to no experience with coding. Utilizing JavaScript and Python, your kid will get extensive walkthroughs in the creation of their own blocks, items weapons, and more.

There are four courses in this bundle: Minecraft mods in Java, JavaScript game design, JavaScript tower defense and Python coding for kids multiplayer adventures. Each course will provide kids with the chance to share their mods with the world and create an online portfolio. When you buy this deal you'll have it for the rest of your life and it's accessible via desktops and mobiles.
