## What is the Reason for Failure of Direct Deposit?

Instead of visiting banks the Customers are using Direct Deposit more often. It always works well and gives perfect service but sometimes it happens that the

payment transfer fails or stuck in the middle.

If you are facing such issue then there can be many possible chances and reasons for such thing.

The first, thing which every customer should know is that the limit to receive money per day via direct deposit is \$10,000. So, if you want to get an amount which is more than the given limit then we recommend you ask the payer to divide the payment and send it on 2 different days.

In case of any failure of transfer the money is credited back to the same account which takes 4-5 working days.

Another reason for the failure of direct deposit can be due to bad internet connection. Always make sure that your internet is having a good connectivity.

---

## Why Deposit is in Pending State?

Pending state means that the money is stuck in the middle because of some issue. It can be because of the server error on Cash App.

There can be more scenarios. The first one can be that the amount was debited from your account but the money has not been credited to the receivers account.

Another can be that the amount has not been debited from your account and the payment was declined due to server error.

In this case, we recommend you to cancel the transaction so that the money stays in your account.

Also, check the reasons why the payment cancels:

- No internet connectivity.
- Servers not working of the Banks.
- The card which is linked to the account is expired.
- Insufficient amount in the account.
- Old version of Cash App.
- Unwanted bugs or Cache files stored.
- International payments.

---
