vky

The VKY team provided us with more progress during an initial two week automation proof of concept than our previous supplier had in six months, they firmly helped set Ascensos on the right path to intelligent automation.

VKY provided Ascensos with the platform and support to set us on our automation journey, their expertise and passion for what they do shone through from the first meeting and hasn't diminished a year into our partnership.

David Gilfillan, CTO, Ascensos Group

Our Services

We are a full service automation provider. Different organisations require different levels of support. We tailor our service to your needs and includes:

> Automation opportunity assessment and business case development
> Delivery planning, management and assurance
> Automation design, development, testing and deployment
> Infrastructure/hosting design and deployment
> Short and long term resourcing
> Vendor selection and Proof of Concepts
> Fully managed and hosted automation service
> Ongoing support, change management and people engagement

vky

Expertise

Intelligent Automation/RPA is our bread and butter (UiPath, Automation Anywhere, Blue Prism and Kofax). In addition we have the following sectoral and technical expertise:

> Public sector experience including Local Authorities and a Health Board
> Technical problem solving to support public sector Digital Transformation
> Contact Centres and multi-site/multi-shift operations
> Azure/Infrastructure/DevOps
> Integrations and APIs
> Complex data sets, machine learning and AI
> Chatbots
> Innovation programmes and emerging tech
> .net, powershell, c#, SQL, html, mobile apps, Java, J2E, Analytics
