

## **MoU Italy with Panama, Ghana and Papua New Guinea**

### **PANAMA**

#### **Activity 1 – Enabling Environments**

##### **Task 4 Tool Development**

The aim of Activity 1 - Enabling Environment is to evaluate the legal and policy framework pertaining to or affecting various elements of climate compatible development, including carbon ownership and rights, and assess their suitability to enabling more dynamic private sector involvement in related activities such as REDD+. The primary goal of this activity is to review the legislative, institutional and policy framework at the national and international level with a view to encourage and catalyze private sector participation in the full implementation.

One of the tasks under Activity 1 is the Tools Development. On the basis of the results of previous tasks on legal, policy, financial, commercial, capacity and technological aspects related with the implementation of REDD+ activities and other sectors where relevant, specific tools will be developed with the aim to facilitate implementation by a more direct and concrete involvement of the private sector.

**Term: 40 Days**

The Tools Development is based on the following sub actions:

- 1) Review of best practices and existing examples, national and international, of tools designed to address gaps and promote implementation of REDD+ activities and other sectors where relevant
- 2) Identification of private sector priorities and needs considering national circumstances
- 3) Design of specific tools to address gaps and facilitate implementation

#### **Methodology**

- Review best practices and existing tools (25 days)
- Interviews with private sector representatives
- Prepare Workshop (5 days)
- Workshop (1 day)
- Preparation of draft report (9 days): on the basis of the desktop review and the results of the interviews a draft report will be prepared
- Present report: the final report will be submitted to the relevant national authorities and comments collected
- Recommendations: comments and feedback from national authorities will be elaborated with the view to prepare some key recommendations
