Voodoo Magic: Rituals and Spells

Cancer includes psychic abilities, intuition, creativity and sensitivity. By nature, they are secretive, and hard to comprehend even by close people and friends. The most visible of the positive qualities is they are dependable and caring, have an extremely powerful parental instinct. Their negative traits will be the propensity to modify mood fast and to be bleak.

Red is the major color of chance for people born under the sign of Aries. Red is dynamic and requires action, it is connected with aggression, but also reflects Aries' energy and optimism.

The main color carrying good fortune to the Gemini is yellowish. It's the colour of Mercury, the planet that controls the zodiac sign Gemini. Each world in astrology is correlated with specific functions of the organism. Mercury is directly about the nervous system, wisdom and mind functions, as well as hands. Not surprisingly, Gemini people like to hold hands. They benefit from a hand massage and even a light touch of the hands, which enables them to get rid of excessive tension, relax and calm .

Agents of the Taurus sign are gifted with a variety of talents, such as music and fine arts, are still calm, patient, able to withstand extended stress. However, from time to time they are sometimes quite stubborn. A quiet house life is exactly what many Taurus are looking for. They have the capacity to have a profound type of attachment and expect a spouse to give them a true mutual feeling.

Favorable colors for every zodiac sign <https://horo.io/>! Each of these twelve signs has a color associated with it, bringing good luck and prosperity to its agents, providing them spiritual and physical energy. Every one of the twelve signs has a colour associated with it, bringing good luck and well-being to its agents, providing them spiritual and physical energy. The usage or denial of particular colors in our lives is not just a form of expression. Each of these expands the understanding of the world about them, has an immediate impact on the flow of negative and positive energy flows, and both in the human body and in existence as a whole.
