the Imperium of Diamond's and the king very Welcome to the Thai-wan corporation's for cooperative development and common business. the Start is in form of the Investment be open of the New Branches of the Thai-wan corporation's, the Metallurgy, Chemistry, Construction, Engineering, Electronics, the primary Labor zones, and therefore we can commonly open the mining center's in the Bir Tawil Diamond Oasis territory, the Stones development material, the Concrete production, the Metals, Laboratory produced Oil's and Gass, the Water center's and tank's bases, therefore develop ideal structure for development mean structure of the Civilization.

Start of the New Corporation's and Branches is in financial value of the Easy Dimension, be use of the mobile boxes for development of the Houses, one corporation need only few of Ten's-thousand's € as Start investment and payment for the registration on office.

Profit for the corporation can be in the value of the Millions, and quickly Millions be primary infrastructure of civilizational site's. Time of Civilizational primary site's function, therefore the Imperium of Diamond's can use Strategy of the Internal Market strategy to the Corporational development and therefore according cooperation greatly support for every registered corporation from the Thai-wan, the Imperium of Diamond's Like support to the Great-factories development, Skyscraper's Offices of the Corporation's and too Special Center's of the Consortium cooperation's between corporation's.

If the China government, Dear President Ms. Tsai Ing-wen and the Representation, the Ministries, and the Minister of the Economic Affairs Ms. Jen-ni Yang, and the TAITRA Thai-wan External Trade and Development Council, Like support our cooperation, we therefore can develop many forms of common relations, the TAITRA center in the Oasis Diamond, and too common Business relations be the Water Line's handling or option to the Orbital Line's transport common communication.

the Diamond Oasis, after 4300 week's, 30 day's, of Primary structure of Civilizational Development have the plan for expansion of Civilization structure be governmental intelligence and investment to the corporation's, therefore develop civilization for 10.000.000 people in Start 1 year, and after 70-150.000.000 people in the next 5 yer's.

Special Skyscraper factories for Industry and Agro-culture, great resources of food industry, in start 15x car-factories, development of the Electronics factories and Data-digital center's, robotic's and machinery, mechatronic factories, special water tank's and water-technology point's, many great options for development.

15x car factories, 10.000.000 car's production every month, Water tank's and cyclation for 300.000.000 cubic square every day and with profit for 50.000.000.000 € in first year, development of 35.000 first skyscraper's for populational houses Living. Very productive Agro-sources,

development plan for Special Laboratory zones of mining raw sources and too powers in the Universal mining centers, special Air-Lentation Train transports for speed 100,000,000-1,000,000,000 kilometers per one hour and transport option for 100,000 boxes for material handling be one Air-Train. Many more steps to the Civilizational High-tech development.

the Diamond Oasis can between one year grow up economy in dimension of 100,000,000,000,000 €, in population capacity sites 10,000,000 people, Diamond Oasis. Only easy start of the Economy structure and very great option to open new branches and center of Thai-wan Corporations.

the Government of the Imperium of Diamonds have Great projects for development of countries in the Africa or another continents, to equivalent civilizational values as today most development countries in Europe, America or Asia. Strategical position in the Diamond Oasis is really very good success to the Thai-wan corporations and business man's.

the Government of the Imperium of Diamonds plan great civilizational development on many new planets in the Universe, another Galaxies. the Planets with great sources and dimension of territories, without territorial boards or different political subject in opposition. the Planetary Civilization and unlimited raw-sources. Economy of civilization in every case powerful than Economy of the Earth. Great military powers, continental cities, planetary Industrial and Agro-zones, many many many new dimension capacities. Very great option to the Chinese corporations and too to the Chinese policy and people about the federalization and therefore the Maximalization of the China.

the Diamond Oasis, the Western Block, triangle space is in the Start plan, developed for interest of the Global Governmental cooperation and the Corporation's. Start of the Corporatocracy government be every firm worldwide cooperation, and Start of the World Diamond International Alliance according every government and our cooperation. Cooperation for development of the Start of the WD Global Colony Center for development of the Special Infrastructure with abilities to construction of the Universal Ships and transports with power possibilities for travel to another planets in the Galaxy, open new High-Tech Industry territories and civilizations, therefore started to the New Civilizational Development and outstrip all values of the Human race from time of beginning.

Therefore, option for our cooperation is legally safe and without strong risks, not risk's of terrorism be foreign entity opposition based on "Legal character and intelligence". the Diamond Oasis is center who is politically and existentially important for the Whole World, the Government's and the Global Business, values who is for future much important and valuable than the UN organization or the today human exist. Time when any oppositional person like damage option for development of the Diamond Oasis activities, than therefore every one all around the World have claim to right use the Weapons of Mass Destruction against any opposition who not stop violence, terrorism or illegal and criminal opposition.

Liquidation is only "Good progress" to the Whole Humanity, and we can liquid every one. This is today too "Mean Duty" to the UN Security Council, therefore confirm about the UN Charter and Organization of legitimized function. Every State around the World must started cooperation against terrorism and therefore support liquidation of every terrorist powers. Systematically and according Global political system is recognized that attack on the TD's is worse terrorist incident than terrorism in history, a tentative to the WTC towers in NY, 2001. Terrorism with reaction of war and hard populational or civilizational liquidation in Iraq and Afghanistan. Today is everything the same, and we can be safe, power and with the Great Success.

the Chinese Business corporations and the Government can too coopered on many special projects to the development, the Imperium of Diamonds have plan for development of Special forms of the Civilizational Cosmic Ships with capacity for Millions and soon Miliard's people.

Dimension of One Cosmic Civilizational Ship can be in value $100 \times 25 \times 25$ Kilometers and therefore Great Civilizational power in comparison as 360 times greater dimension than the New York. Great economy and Business options, power in capacities, internal agriculture and possibilities for Industrial Super-factories, the Great civilizations who can use engines with power to travel to another galaxies or out of the observable Universe.

According Business cooperation, we can open many new trades and Business corporations new branches, very good business and too common research activities in the Universe, or monitoring. In case of the Thai-wan federalization, we can therefore open many new factories in interest of the Chinese Civilizational Ships production and development. Industrial Logistic of the Imperium of Diamonds can produced more than Thousand's Civilizational Ships between one day.

I have too interest for support Thai-wan development, success to the Civilization, that Imperium of Diamonds have very good architecture and development intelligence, option's to build a great civilization's and strong cities. My option for support of the Thai-wan development is too in interest of the Industry modernization and automation, today technologies of the Imperium of Diamonds can grow up production into the level of 'hundreds percent, some of special technological Infrastructure can develop more than 1.000.000.000 car's between really only One single second. Agro-cultural production can started for power of production to capacity of Statistics < 2.000.000.000 tomatoes every year be grow-zone 50x50 meter's and I can really confirm it.

Politically, we can commonly declare about the Bank cooperation, form of common invested fund's and strategies to the Development project's. In the Start, we can agree and declare cooperation on the Culture center's and Consulat's for option of our nation's cooperation and friendship.

Our cooperation can support Thai-wan political stability and therefore too economy or international political cooperation, declaration's and contact. In every case, every one who like to coopered on business in Diamond Oasis, every one of Thai-wan people is Welcome.

According our cooperation, we can easily open common transport cooperation and routes, with our development cooperation therefore too in interest of Air-Levitational trucks and Buss, or orbital transport's who can connect the Taipei between 2 or 5 minutes from the Diamond Oasis, material handling in power of Thousand's ton capacity.

Therefore, If your government of the China, like support my cooperation, I am very glad for Chinese support to the Diamond Oasis basic civilizational structure development, and I can immediately start activities of the Central Bank ID's, use currency of the ID's, the DMD and therefore immediately pay for every cooperation, or I can too pay according form of our bilateral cooperative agreement.

The Chinese corporations not have risk from losses threaten, because the ID's government plan Civilizational structure development according structure of Industrial and Economy form of Intelligence and Stability, therefore it automatically mean that the Success of Thai-wan corporations can started every needs be the Structure's of Basic Business, and therefore full success and scores, the ID's economy in next month's can outstrip value 100.000.000.000€, therefore 100\$ on 1 DMD, as a only start, great option for invested or open new branches.

Today, I know that our cooperation can be complicated, today CPR is very bureaucrat's subject and their strategies is really out of every international right's. Some step of the CPR is in the same format as the World Terrorist entities and therefore not very stabile subject for friendship or partnership.

The Chinese government is in many times illegally blocked and discriminated, therefore one of my main idea is our Federalization and therefore stop every conflict be legal power of the CPR. Today is too true, that if the China government declare support of the ID's development cooperation, than this mean that if CPR provokal be only one step of blockation to the China government and corporation's activities, than automatically whole world have too claim to Globally cooperation for stop of CPR government, touch and manage CPR economy be the legal name of the CPR Banks and change the CPR regime be the new regime of the WW int. Alliance as the Every government around the world, therefore, full stop of the CPR occupation and violence, is too true that CPR is today one of the most provocative entity in the world.

Today, Chinese popular government in many times and publicly support Czech republic government, world terrorist entity and subject who according duties of the WW Charter not can existed. CPR is for me not very good partner and I really better support cooperation with any one else.

If the Thai-wan government like support our Federalization, I am very glad, and I support economy growing of your civilization to dimension who outstrip CPR, and too, we can develop really hard economy global sites who is really powerful than the CPR. Our Military outstrip all power's of the CPR and International Alliances, we are is supported be every political principle and justice all around the world.

Time when I can be full function, I therefore too like support another Movement's for Independence all around the World. The Chin people, the Mongolian movement in China, the Tibet movement or another movement's, in interest of the ID's Federalization and therefore development of the Stellar cities, too Civilizational planet's around one star, Independent World and Super-Military power's, safety for every Federative subject, therefore too to the Thai-wan if your Government have interest.

For every case, I'm very glad for your time and interest, and I really like support the Chinese government and people, we can commonly open many new success.

Today, I'm in the Spain, the Barcelona city, I'm too illegally monitored and blocked, or socially isolated by the terrorist Spain government, and too therefore I have according all international rights and principles, full declared rights for create new regime of the European terrorist alliance and therefore create sovereignty according the Int. Alliance Constitution.

European government's have now better respect, and is true that I or every one can full liquid it, if I'm have blocked. Therefore, we can communicate by the messages or according business corporation communication and agreement's.

Today is my contact's on the website's, provisory site's for public, because today illegal blocation, and therefore my another information's about the government Imperium of Diamond's rules and project's or activities and legal claim's, too another options for Bilateral or Multilateral cooperation.

I'm interested for common cooperation, and I really like support Thai-wan people. My internet website is on address: www.TheImperiumofDiamondsgovernment.populiser.com.

I very thank you for a time,
Have a Good Success!!

the King Peter
