

ROOFING SYSTEMS: MANAGING RISK FOR THE PRINCIPAL DESIGNER

**SIKA LIQUID PLASTICS
NEW RICS APPROVED CPD
LIVE DEMONSTRATION**

SIKA LIQUID PLASTICS HAS LAUNCHED A NEW RICS APPROVED CPD TITLED: 'Managing Risk for the Principal Designer'

Are you fully aware of the Health and Safety and associated risks of elements such as fire and wind damage?
With changes in CDM regulations, understand the consequences and determine solutions to remove associated risk.

The CPD aims to assist specifiers when designing and selecting roofing solutions that:

- Meet current and predicted legislative requirements including changes to CDM regulations
- Reduce the risk of litigations and associated consequences
- Provide levels of required performance and guarantees
- Live demonstration

We are pleased to announce that the CPD is RICS approved.
The presentation is around 45 minutes long and is worth 1 hour CPD points.

9:30 - 10:30 Arrive for registration and tea and coffee supplied by Sika Liquid Plastics
10:30-11:00 RICS approved CPD presentation "Roofing Systems: Managing Risk for the Principal Designer"
11:00-12:00: Demonstration of various cold applied roofing solutions
12:00-12:30: Q&A
12:30 - 1:00: Lunch

DETAILS

Sika Liquid Plastics is the pioneer of cold applied liquid roofing systems and has more than 50 years experience in providing high quality waterproof membranes. Our Cold Bonded Built-Up Roof System utilises zero flame, zero heat technology, eliminating any need for hot works, and can be guaranteed for up to 25 years.

Our CPD presentation aims to assist architects and specifiers when designing and selecting roofing systems, including:

- Meet current and predicted legislative requirements including changes to CDM regulations
- Reduce the risk of litigations and associated consequences
- Provide levels of required performance and guarantees
- Live demonstration

You will be given a live demonstration of our various cold applied systems including new ground breaking developments from Sika Liquid Plastics.
