HOW TO REMOVE SCRATCHES FROM YOUR SUNGLASS LENSES AT HOME?

Scratches on the eyeglass lenses are very annoying. They can weaken your eyesight and very uncomfortable to wear. Most people prefer buying new eyeglasses when old one got scratched. No matters the scratches are small or big. But there are a lot of ways you can remove the scratches from your eyeglass lenses and save your money from buying the new costly sunglasses.

REASONS FOR SCRATCHES

 Dust or Smudge

 Cleaning with Rough Clothes

 Throw them in Purse or Pocket

 Dropped from Height

Depending on the severity of the scratches, they can be removed with your little efforts. Just follow the DIY tips given below:

Remove the layer of dust with microfiber and clean the lenses with eyeglass cleaner to remove the smudge.

Toothpaste is an amazing product to remove scratches on eyeglass lenses. Apply it on the affected areas with cotton or woolen cloth and rinse with cold water after 30 seconds.

Baking soda is available in the kitchen of every home. Mix the two tablespoons of baking soda in water, stir it to make thick and paste to the scratched lenses and wash after some time.

Purchase the scratch removal products like car wax or glass polish and apply them to the lenses for some time and wipe it off with a thin cloth without using water.
