

## EVX Store – a short story

Over time, the idea of opening an EVX Shop became a reality. After a long hockey career, Jarmo, one of our founders, took up triathlon and road cycling.

Henrik, on the other hand, has been a seasoned mountain rider since he was a child. Because we've sold electrical kickboards in other online stores for years and are familiar with their use and operation, we're rekindling our relationship with them. With the first test of an electric fat bike in Levi in 2018, the concept gained traction, and within five minutes of driving, a decision to purchase one's own electric mountain bike was made. Following the start of his search for the perfect electric bike, Henrik found comparing electric motorcycles to be fairly difficult.

The comparison of components necessitates numerous producers' obvious passions and professionalism. Even after 11 years of mountain riding, this was no easy task, so I can't imagine how difficult it would be for newcomers. We've had the idea to start working on a website dedicated to electric vehicles.

During the Corona period, Väinök was also interested in testing electric bikes. Väinö used to prefer ball games, but Corona forced this guy into the chilly air as well. EVXstore.com sells a wide range of e-mobility and home robotics products.

At home, you'll find useful games with cleaning and lawn mowing robots, as well as daily relief. We provide prompt and quality customer service to all of our clients. The items are delivered either from our own warehouse in Lahti or from the warehouses of our partners.

Deliveries from our own warehouse take 1-3 days, while deliveries from the supplier's warehouse take 3-5 days. Our goal is to make comparing things simple for customers so they can choose the best option for them. SB Ecommerce Group Oy founded [www.evxstore.com/en/](https://www.evxstore.com/en/) in 2012, and it is a Finnish firm. Around 30 permanent employees work at our Lahti headquarters and outlets. Every year, the SB Ecommerce Group serves more than 100,000 customers and sends out tens of thousands of packages.
