To Whom It May Concern:

We recently purchased an EV3000i steam system. It proved to be an exceptional piece of cleaning equipment. We decided to purchase it for its versatility (it cleans everything), time efficient (honestly deep cleans and it sterilizes our entire space in a fraction of the time), and its surprisingly simple and straight-forward use. The best part is that it is rather fun to use.

We are a brand-new hospital and it is a point of pride with us to keep our facility looking brand new. I can confidently say that the EV3000i will help us accomplish this task. Please feel free to contact us if you have any questions or doubt about using this wonderful piece of equipment.

Sincerely,

Matthew Meloy

Practice Manager
