

# PRP Hair Treatment in Dubai

**PRP Hair Treatment** is a natural and innovative procedure designed to combat hair loss and promote hair regrowth. Our team of hair experts in Dubai will help you restore your hair to its former glory.

Week 4

# The Science Behind PRP Hair Treatment

PRP Hair Treatment is based on Platelet Rich Plasma (PRP) therapy, which uses your own blood to stimulate hair regrowth. The treatment uses growth factors found in blood to promote healing and regeneration in hair follicles, resulting in fuller, thicker hair.

## Safe & Effective

PRP Hair Treatment is a safe and effective alternative to chemical hair loss treatments that can damage hair and scalp.

## Quick & Painless

The outpatient procedure takes only 30 minutes and is virtually painless. You can return to work immediately.

## Long-Lasting Results

The results of PRP Hair Treatment are long-lasting, with regrowth continuing for up to 12 months after treatment.

# Who Can Benefit from PRP Hair Treatment?

If you are experiencing premature hair loss, thinning hair or hair loss due to chemotherapy, PRP Hair Treatment may be an option for you. Men and women of all ages can benefit from this non-invasive procedure that has no side effects.

## Men Hair Loss

Men who suffer from hair loss and baldness can benefit from the regenerative effects of PRP Hair Treatment.

## Women Hair Loss

PRP Hair Treatment is equally effective for women with hair thinning, **alopecia** or pattern hair loss.

## Chemo-Induced Hair Loss

PRP Hair Treatment can stimulate hair regrowth in patients who have experienced hair loss due to chemotherapy.

# What to Expect During PRP Hair Treatment?

During a PRP Hair Treatment session, our team of specialists will draw a small amount of your blood and spin it in a centrifuge to separate the platelets. Then the activated platelets are injected into the scalp to promote hair growth.

## No Risks or Side Effects

The procedure is non-invasive and side effect free.

## Natural Hair Regrowth

PRP Hair Treatment promotes natural hair growth.

## Minimal Down Time

Patients are advised to avoid washing their hair for 48 hours and should not expose their scalp to direct sunlight.

# PRP Hair Treatment Before and After

PRP Hair Treatment can produce dramatic results from just one treatment. Below are some examples of successful cases:

## Men Before & After

Younger-looking, fuller and healthier hair have been restored with PRP hair treatment.

## Women Before & After

Women patients who underwent PRP hair treatment saw a significant improvement in their hair volume.

## Chemo-Patients Before & After

PRP Hair Treatment resulted in hair regrowth for many patients who suffered from hair loss due to chemotherapy.
