The King Gottwald Peter, The ID's

Handwritten signature of Peter Gottwald, written in blue ink, positioned below the text and above a horizontal line.

Good day for leaders and members of Vienna Antifa movements & all people for Justice and Freedom

Hello Dear Representatives of the Anti-fascist movement's and against terrorist act against discrimination, all Freedom of movements and the people for Victory of Justice.

Great Day's for all people from the World, The People who live in Austria, Vienna, Linz, other cities of Austria or Europe, the Africans, the Americans, the Australians and Asians people, I am really very glad that I can greating for Every One !

People of Jude or Islam, Christians and Mormons, Jehova Pleaers or Catholic's, we are is a born in The One World !

My name and nationality is Peter Gottwald, today I come from the North Eastern Africa, and I am politicaly and legally claim as King of the new country ID's Diamond Oasis on the border between Sudan and Egypt.

I come from the Czech Republic when I'am a born 1992, and today I am active as Extraterritorial person and in Exile, because of the occupation and the blockade of my country by the New Fascism of 2000, as acts of International terrorism whi is a threat to the establishment of The First Global War as an act of risk of extinction over...

...7 000 000 000 people in The Whole World !

Today I am in Vienna, I came from France, for the past five years I have been through more than 16 European countries that are against me was based on opposition to corruption and contemporary fascism, forced into slavery and apartheid, daily monitoring and manipulation be hypnosys the main direction also blocking the freedom of my country and clear genocide of 320 000 000 people, and thus simultaneously acts entailing oppression and occupation, against the 2.1 Miliard people worldwide, directly public crimes that violate the UN Charter and the principles of formation of the United Nations, as well as all the main principles of UNGA Conventions and therefore confirmation of the situation the European side of the terrorist forces throughout the world to act First Global War, it means the risk of extinction over 7 Miliard people, or

otherwise extinction of the entire dimension of the European civilization's.

Therefore, I try to contact Your movement and all your members for the possibility of establishing an alliance of States Parties in order to prevent a catastrophe, and that means the use of legal instruments to combat all criminal functions in Austrian and European politics.

European governments countries already overtook statistics of the worse crimes Second World War and therefore political situation in Europe is based on the illegitimacy of the European governments and this automatically means losing sovereignty claim De Facto and maintain its own forces are strong DevJuri be power and censure of terrorist regime. Terrorist movement organized structure and the legal name of the country's government, public service, with police and army, as well as when working as a civilian movement on behalf of the state and the state recognition in acts of terrorism, subject terrorism on such an extensive level that it is already legally possible to carry out a security crackdown to the basis of the acts of destruction of Weapons of Mass Destruction.

This creates a situation where European governments, as well as Your Government of Austria, the country may lead to a situation where government corruption and silent dictatorship that restricts the legitimate rights and based on the global responsibilities of all governments to carry out the destruction of European civilization in the use of weapons of mass destruction and that means full death for everyone around you, your friends, your families, and the full responsibility of the current policy of your country.

That's why I'm so ask about the possibility of our joint meeting and objective measure joint agreement to build a stable cooperation which will ensure that the state and thus entitled to determine the state of democracy under International rules and European political principles, or to use our common logistic forces to mobilize structures of International and global policy enforcement strategies against the terrorist regime of the European governments.

Our goal this happens build logistic activity of the basic legal documentation, contact foreign groups for certain of our support and International political synchronization and in the subsequent order to develop activities at the level of International media networks, as well as opening new commercial offices and cultural centers on evidence protest against European terrorism and occupation of European countries and the threat of extinction for full state.

Together we create a social infrastructure that will build centers for the supply of basic finance, and then we will develop relations with the anti-fascist groups or all people of foreign ethnics who live in Austria or in other European countries, together with associations and civic associations for freedom, for democracy and the rights of the

state association for suppressing the threat of war, and for support of political prisoners, associations and communities and movements in its entirety Europe and other continents around the world. Movement of the base and alliances between actors global structure of NGO's and non-governmental Association for the opportunity to create our common global network and structure of logistic and organizational communication, planning and trade or global social and public presentations. Our goal is for the creation of pan-European protest in every European country and against all terrorist politicians who only endanger their own state, just so they could avoid criminal liability.

Our goal is to build a structure of logistics centers in the world and the interests of the exercise of the right of our states and forcing governments to their legalization, decriminalization and fascism removal of the internal structures of government and politics. Soon our reunion may transform the level of legal movement as a civic association, as well as the composition of the Provisional Government. Each of you who support the composition of the Provisional Government therefore has great opportunities to develop in the future in order to fully position in the government of Austria, European future policy and meanly in my country which today also means a chance for significant position than the United Nations organization.

The first is my plea and request for supporting the collective sharing some documents from my web links, and some of the documents that belong primarily among all police stations, military authorities, especially the courts and tribunals of terrorist countries and ministries but also with political parties and parliaments. Best subsequently papers to pass as a copy and obtain a certificate of handing over the document, and then subsequently sent copies to the UN Secretary General that it informs UNSC and UNGA, maybe soon provide International act which implies the elimination of terrorism from the structures of your country's government during a political act Global cooperation of all governments in countries around the world.

Today, my country's government in exile, without their own offices that may be in full communication and the performance and therefore the seeking someone who would be able to support the function of government bureaus thereby ensuring International political security movement and the development of military cooperation, and jointly to develop its own International structure of the markets and shops with a range of consumer, gases and liquids, energy, machinery and technology, cars and other transports, also the architecture and many others.

That's why I'm looking for new people who support the role of the Authority and the construction of new stores, stores that for everyone in the office to ensure financial gain, or together we can build our own infrastructure markets at agriculture, construction, construction and light engineering, other markets and business categories, and mainly

urban services. Anyone who wants to support such a movement against fascism and global terrorism, or anyone who wants to get a good financial gain may therefore in this direction to ensure the move, meaning our support functions of the Office or establish new companies and corporations in our sales and logistics network.

Together, we will inform the media, establishing Charity projects and support the development of health centers or orphanages, setting up agencies and foundations for human rights and the development of public and cultural events or organizing charitable festivals and trade networks, new structures between NGOs worldwide, and between advanced business groups around the world.

One of the Exile Office goals is to build IDs Cultural Centre which will be used for cultural conferences and the development of social and business communication, together with the other people. Events, singing and music, informational lectures, video screenings, reading books, dancing and other social activities. Cultural center can be established as a joint business between at least 20-50 business individuals traders who may operate here selling food in their restaurant, café, sale of paintings and photographs, sales of ceramic arts and other forms of artistic production, as well as the sale of textiles, sales of comics and books or stories, jewelery shops, and at the same time with the possibility of selling basic jewelry and bracelets. Total sales assortment Cultural Centre may be in terms of over Five Million € every month and thus simultaneously with further gains Tens of Milions to One Miliard € each month from organizing cultural conferences and business meetings between business associations.

IDs Cultural Center can be established as a legal institution in the form of civic associations and another legal & cultural associations, too as a comercial subject, or on the way, as extraterritorial institutions. Everyone who support the organization establishment of cultural centers is therefore able to successfully provide its own profit and responsible for such an act.

Cultural center can be a business management developed to the level of a skyscraper with a height of at least over 50 floors, and for peaceful and cultural socio-civic and commercial interests, always would've been happy for your support and act of cooperation that can provide building upon our mutual profit and stable the growth of cultural intelligence.

Cultural rights and their development is supported by International law for the declaration of more than 188 governments around the world against us there therefore not any opposition Crime format that can legally be successful. We therefore possess all rights to collectively meet and discute, communicate and thus develop our relations in order to create Cultural centers and temporary offices functions of government.

My interest in the development of a new state is really no Policy of fascism and

crime, I have in order to promote the right to life of young children who die every year of hunger in Third World countries, to over 20 000 000 children each year, children who therefore have the right to use the claims for gain citizenship in my country IDs Diamond Oasis and thereby gain all the necessities of life and a life without discrimination, statistically population claim of the ID's Diamond Oasis is too as a one great "Kinder Garten". At the same interests I want to support a new life for all refugees and displaced persons who may therefore establish a new life in my country ID's Diamond Oasis. The capacity of my country is over 10 Milion people within the first 360 days of the start of civilizational construction, so the ability to simultaneously improve the capacity to well over 150 Milion people in Ten years.

The Federal government Imperium of Diamonds can also establish new civilizations on other planets in the Universe, and so therefore is mathematically unlimited population growth. If any of You are interested in their own gain that citizenship ID's is therefore an opportunity to join together and thereby ensure a step that will develop our new civilization, civilization's and civilization's. Each of you can already establish Business Companies and Corporations, start trading in Extraterritoriality or International level, as well as to develop new markets and business structures, open new Cultural or Religious Institutions, develop the Schools, Hospitals, factories or agrocultural centers, too mobilize new army and capacity of soldiers (18+).

Today, in Vienna and in Austria there are many refugees and families from Africa, from Arabia and from Asia or America, many people who are here but they must live under racism, and without the possibility to obtain a sufficiently valuable work, some are completely without work and ability to professionally educate. Everyone who belongs to these groups may therefore be informed and secured to act together to meet, organize social activities, organize for education, ensuring social needs and the same way again, with the possibility of expanding other shops and markets in the society, basic businesses from which they will strategically grow new business corporation.

Pride, because everyone has the right, and I'm sure I'll always love for each of You. I invite each of you and of your groups, I'll always be grateful for your cooperation and support acts to justice and function of legal rules which therefore can be improved with the aim behind the success of Justice and Freedom of Nations.

So for me it is respect and support your efforts to session, I answer to You therefore provide possibilities for joint communication and clarification of our common interests and benefits of the development of joint cooperation opportunities.

Each of you who are interested, please browse the Internet my website, along with a profile on Twitter (@petergott), and on Facebook, send me an E-mail IDs.Fed.Gov@gmail.com & Peter.Gottwald.EU.orb.runner@gmail.com or you can contact

me anytime at a joint meeting on the public street. The Best contact but communication is based of information cooperation between members of the anti-fascist movement and other reference bars and clubs or institutions addresses willing to support our freedom of communication, communicative centers between physical addresses of our friendship parties and their structures.

In the start, before establishment of the Provizore Offices, I too mist little beg, about Your support for some times cooperation for scan documents and sending letters, or telefon communication, translate cooperation or communication organizing. Today, I am a person who have a great informations about reall terrorist and criminal or form of mafia structures in Austrian or another European governments, falsifiing of state voting and damage of Parliamentary democracy, abuse of political relations for bureaucracy or reall atentates against politics interested for peace and legal order, justice and freedom of people. Therefore, I am really man under apartheid and in ozolation out of society, without sources or possibilities for full free activities for comunication.

Into today, I am in contact with policy of Africa, America, Asia, Arabic countries or Intergovernmental organizations, and in today situation of my blocked person under apartheid, we are is not fully possible for meet or interactive develop peace and security, UN organization after 71 years of global development is without possibilities for stop criminal activiies in Libya, Iraq and Syria, Jemen, Nigeria, many countries who is occupied or threated into notstability be the only easy or weak armed radical and terrorist groups, criminal movements who is really not powerfull than today Terrorist Europe, and than therefore European terrorist policy is a great power against the UN forcess or oportunities to prevent against crimes.

Free Europran poly of terrorsn open last time all possibilities for dictature development in the Turkey, the same as any another Europeans friendly can the same. If people haven't a power for public oposition, than it man that 71 year of the UN organization development really hardly losse on any values, and we can love in the same times as a times before World War II., or WW I.

I Thank You for your precious time today crucial for the future of your country, and to maintain stable security of states and International peace policies.

All of You who support the mobilization of protests, and the development of business networks and legitimate function of temporary offices, each of you have certainly gets good financial gains and big hopes for early success on the International political level, implying growth of your position in society and the forces for organizing interests justice and peace, both legal and interests.
