Open Letter

Berlin, Dt 01.03.2022

Albanian Doctors stand united in a call for peace to President Putin: “War is NO Solution”

President Putin,

We are writing on behalf of the Albanian Medical Association in Europe (AMFE), which represents an international non-profit scientific and health organization with 27 Branches in Europe - including Russia - and in the world. Our mission is to preserve human life at all ages and races of humanity.

According to our mission and also a long history of war in western Balkans we want to express our serious concerns regarding the critical situation created in Ukraine.

AMFE e.V. urges you, President, as guarantor of the Russian Constitution, to end the aggression and to choose a way without violence and to protect the lives of millions of people in Ukraine. And also to - stop attacking Health care workers and health care structures in particular should not be targeted.

The Albanian Medical Federation for Europe (AMFE) is horrified by the current consequences of the war in Ukraine. That is why we are joining other international scientific organizations to strongly condemn the attack on the Ukrainian people. We are with Our hearts with our colleagues and friends in Ukraine, who receive our full support. They are doing a great job of protecting and saving lives in their country. We go with all international scientific and non-profit health organizations to join efforts and take all possible action to help alleviate the human suffering caused by this war.

Mister President Putin, as EU citizens we want to make a sensibilisation Call to find a diplomatic way to solve the conflicts with Ukraine and to save the lives of innocent human lives, because we Albanian Doctors strongly believe that War is NO Solution.

With thanks in anticipation.

Sincerely Yours

Dr.med. Aurora Dollenberg,

Chair of Albanian Medical Federation for Europe e.V.

Dr.med. Gazmend Berisha,

General Director of Albanian Medical Federation for Europe e.V.
