INTRODUCTION

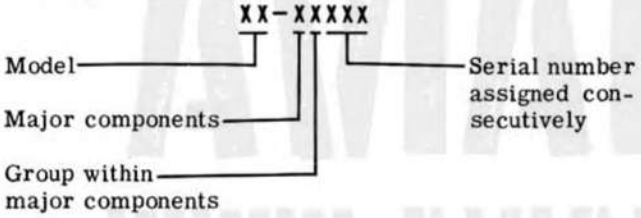

1-1. GENERAL.

1-2. The Illustrated Parts Breakdown for the F2H-2, day fighter; F2H-2N, night fighter; F2H-2P, photographic; and the F2H-2B airplanes, contains listings and illustrations of assemblies and details that are considered to be replacement parts for line maintenance, overhaul and repair. This book is intended to aid in procurement, requisitioning, storing, issuing and identification of new and reclaimed parts. The general arrangement consists of:

Table of Contents
Section I - Introduction
Section II - Group Assembly Parts List
Section III - Numerical Index
Appendix A - F2H-2B Airplane

1-3. DRAWING NUMBER SYSTEM.

1-4. The McDonnell numbering system for working drawings is as follows:

1-5. The model number for the F2H-2, F2H-2N and F2H-2P airplanes is 15 and will precede the first dash. A few parts from other models are used on these airplanes. Model 4 indicates an FH-1 part, 11 indicates an XF2H-1 part, 14 indicates an XF-88 part, and 23 indicates an F2H-3 part. Numbers after the first dash are assigned as follows:

10000 to 19999 - Wing Group
20000 to 29999 - Empennage Group
30000 to 39999 - Body Group
40000 to 49999 - Landing Gear Group
50000 to 59999 - Power Plant Group
60000 to 87999 - Fixed Equipment Group

Sub-groups

60000 to 60999 - Instrument
61000 to 68999 - Surface Controls
69000 to 69999 - Hydraulic
70000 to 77999 - Armament
78000 to 79999 - Electrical
80000 to 86999 - Furnishings and Equip.
87000 to 87999 - Communications
92000 to 92999 - Pneumatic

1-6. SECTION I - INTRODUCTION.

1-7. This section contains general information concerning the F2H-2, F2H-2N and F2H-2P airplanes and explains the use of this book. Careful reading of and reference to this section will add much to the understanding and use of this book. Included in the Introduction are: Master 'Usable On' Code; Manufacturer's Code Symbols, Names and Addresses; Stud Installation Tabulation; and the F2H-2, F2H-2N and F2H-2P Airplane General Assembly illustrations.

1-8. SECTION II - GROUP ASSEMBLY PARTS LIST.

1-9. This section is the body of the book. It is made up of listings of airplane parts arranged in assembly breakdown order, with corresponding illustrations placed usually in a facing position, or as near as possible to the appropriate listing. This section is divided into the main groups of the complete airplane, arranged in the following order:

Wing Group
Tail Group
Forward Fuselage
Center Section Wing and Fuselage
Alighting Gear
Power Plant
Tool and Ground Handling Equipment
Systems Index

Breakdown for the F2H-2, F2H-2N and F2H-2P is combined where possible, or follows in F2H-2, F2H-2N and F2H-2P order where differences make it necessary to illustrate for a specific model. Figure titles are designated as to model coverage except where all models are covered.

1-10. FIGURE AND INDEX NUMBER. This column contains the figure number of the illustration which shows the parts and the index numbers which correspond to and locate the parts on the illustration.

1-11. PART NUMBER. This column contains the part number assigned to each part. Part numbers affected by service change are noted in this column by a boxed number following the part number and explained in a footnote on each page where it appears.

1-12. NOMENCLATURE. This column contains the complete nomenclature (name) of each item (except standard parts) in accordance with the contractor's drawing titles. Also included parenthetically is pertinent information regarding alternate and altered parts, identical and equivalent parts and applicable Government specifications and catalog numbers. The nomenclature of all vendor items is followed by the code symbol of the design manufacturer in parenthesis. A complete list of code symbols, manufacturer's names and addresses is included in this introduction.

1-13. INDENT OF NOMENCLATURE. In order that details for an assembly may be easily identified, the nomenclature is indented one column to the right. The nomenclature columns are numbered at the top of each

listing. Each detail part or assembly is listed below and one column to the right of its next assembly. By locating the first assembly listed above and one column to the left of any particular part, it is possible to ascertain its next assembly. All listings begin in Column 1 and by locating the figure referenced following the nomenclature, the next higher assembly may be determined for the item illustrated. Where it is impossible to show all details or assemblies on one illustration, a direction is given to another figure which will illustrate these details or assemblies. An exception to the breakdown is made for attaching parts in that they are listed in the same column as, and immediately following, the parts they attach and are captioned 'Attaching Parts'.

1-14. F2H-1 COLUMN. This column, where applicable, contains a symbol (*) indicating that the part is used on the F2H-1 airplane. F2H-1 aircraft serial number usage will be found only in the F2H-1 Illustrated Maintenance Parts List, NavAer 01-245FBA -504.

1-15. UNITS PER ASSEMBLY. This column lists the quantity of units required per next assembly. The letters 'AR' indicate the quantity to be 'As Required'.

NOTE: A quantity shown in parentheses ( ) indicates that part to be recommended for future procurement or replacement over the superseded or interchangeable counterpart. Interchangeable counterparts are indicated by the letters ALT and the quantity per assembly is the same as the future procurement item.

1-16. USABLE ON CODE. This column indicates by code all aircraft on which a part is usable. See page 4 of this Introduction for the Master 'Usable On' code for the BuAer serial numbers assigned to the aircraft covered by this publication.

NOTE: Absence of coding in this column indicates that the part is usable in that particular assembly or installation on all F2H-2, F2H-2N and F2H-2P aircraft.

For other usability in different locations see cross-references in the Numerical Index. See next higher assembly for usability of simple hardware. When interchangeable assemblies have components that are not interchangeable the usability of these components depends on the assembly found on the aircraft. Therefore, the usability of these components is indicated by writing in the next assembly on which they are usable.

1-17. ILLUSTRATIONS. A picture of each assembly, sub-assembly and installation, exploded or cut-away as necessary to show detail parts, is provided for the parts listed in the Group Assembly Parts List. Where redesigned assemblies differ sufficiently to require a new view, this view is illustrated with a dashed (---) relation line to the original configuration. Where necessary a small airplane sketch appears on the illustration on which the item illustrated is located in a solid black area. The gray area indicates the main airplane group of which the illustrated item forms a part. Except where directional arrows are used the parts illustrated face in the same direction as the small airplane sketch or general view.

1-18. TOOL AND GROUND HANDLING EQUIPMENT. This information follows the normal aircraft breakdown at the end of Section II. Tools and Ground Handling Equipment are illustrated and the listings include total procurement.

1-19. SECTION III - NUMERICAL INDEX.

1-20. This section consists of two lists:

a. Numerical Index of Contractor's Parts
b. Numerical Index of Standard and Vendor Parts

1-21. NUMERICAL INDEX OF CONTRACTOR'S PARTS.

1-22. STOCK (PART) NUMBER. This column contains all contractor's parts used on, and all production drawing numbers applicable to the aircraft covered by this publication. Not listed are dash number details whose source codes are the same as that of the basic part. The word 'thru' inserted between the first and last dash numbers indicates that the dash numbers run consecutively. However, all dash numbered parts appearing in Section II are listed.

NOTE: The addition of the Aviation Supply Office prefix to a contractor's part number forms the Stock Number and indicates that the part has been procured as a spare.

1-23. SOURCE CODE. The source codes in this column are assigned by joint action of the Aviation Supply Office and Bureau of Aeronautics Representative in accordance with Aviation Circular Letter No. 1-151 dated 26 January 1951 (Aer-MA-445). New parts listed without source code will be coded on revision. The following information is included for clarification of the source code:

a. Code "P" - Parts Under Inventory Stock Control.

(1) Code "P" is applied to parts which are procured in view of relatively high usage. Code "P" parts may be requisitioned and installed by any maintenance level. Restricted service manufacture is considered practicable but only after an attempt has been made to procure from supply sources.

(2) Code "P1" is applied to parts which are very difficult or uneconomical to manufacture. Service manufacture is considered impracticable. Code "P1" parts may be requisitioned and installed by any maintenance level.

b. Code "M" Manufacture, Parts Not Procured.

(1) Code "M" is applied to parts which are within the capabilities of any activity to manufacture. Procurement is not justified in view of no anticipated or relatively low usage, or storage and installation factor of these parts. Needs are to be met by local manufacture as required.

(2) Code "M1" is applied to parts which can be manufactured only by utilizing the capabilities of the Overhaul & Repair Department of Depot. Procurement is not justified in view of no anticipated or relatively low usage and installation factors. The needs of all activities are to be met through local manufacture or requisitioned from the nearest des-

ignated overhaul activity.

c. Code "A" - Assemble, Assembly Not Procured.

(1) Code "A" is applied to assemblies made up of two or more parts, at least one of which is purchased and carries an individual part number and description and which may be assembled by any maintenance level.

(2) Code "A1" is applied to assemblies made up of two or more parts, at least one of which is purchased and carries an individual part number and description and which may be assembled only by activities having Overhaul and Repair Department or Depot Facilities.

d. Code "X" - Parts Considered Impracticable for Manufacture or Procurement.

(1) Code "X" is applied to main structural members or similar parts which, if required, would suggest extensive aircraft repair. The need of a part, or parts, coded "X" (wing spars, center section structure) should normally result in a recommendation to retire the aircraft from service.

(2) Code "X1" is applied to parts for which procurement of the next larger assembly source coded "P1" is justified; e.g., an integral detail part, such as welded segments inseparable from its assembly, a part machined in a matched set, or a part of an assembly which, if required, would suggest extensive reconditioning of each assembly.

(3) Code "X2" is applied to parts which are not procured for stock but may be acquired for use through salvage. Activities requiring such parts shall attempt to obtain from salvage; if not obtainable from salvage, such parts shall be requisitioned through normal supply channels with supporting justification. Repeated requests shall justify a change in code to "P1".

e. Code "*" - Parts Not Procured, Manufactured or Stocked.

(1) Code "*" is applied to installation drawings, diagrams, instruction sheets, field service drawing numbers, obsolete parts which cannot be procured or manufactured.

1-24. FIGURE AND INDEX NUMBER. This column gives the figure and index number of the illustration or illustrations on which the part listed may be found. For assemblies which have not been assigned index numbers, only the figure number appears in the column.

1-25. QUANTITY PER AIRCRAFT. This column gives the total quantity of each part per aircraft.

1-26. NUMERICAL INDEX OF STANDARD AND VENDOR PARTS.

1-27. PART NUMBER. This column lists all standard and vendor parts used on the aircraft covered by this document. The use of letters and numbers together requires a special numerical arrangement for uniformity of listing and to find part numbers quickly:

Part number arrangement begins at the extreme left position and continues, one position at a time, until all parts are arranged. The order of precedence for the extreme left (first) position is as follows:

Letters A through Z
Numerals 0 through 9

The order of precedence for the second and succeeding positions is as follows:

Space (blank column)
Dash (-)
Letters A through Z, then
Numerals 0 through 9

NOTE: Alphabetic (letter) O's are listed as numerical zeros.

1-28. STOCK NUMBER. This column contains the equivalent number for the standard and vendor parts as stocked by the Aviation Supply Office.

1-29. FIGURE AND INDEX NUMBER. This column gives the figure and index number of the illustration or illustrations on which the part listed may be found. However, for Government and contractor's standard parts, only the figure and index number of the first illustration on which the part appears is listed.

1-30. QUANTITY PER AIRCRAFT. This column gives the total quantity of each part per aircraft.

1-31. IDENTIFYING PARTS.

1-32. PART NUMBER AVAILABLE. If a part number is known and the illustration is needed for identifying or placement of the part, the part number will appear in the Numerical Index together with the figure and index number of the illustration on which it appears. However, only those parts for which a figure and index number is shown are illustrated.

1-33. PART NUMBER UNAVAILABLE. If a part number is not known, the exploded view or airplane General Assembly of the model in question, which appears on the last pages of this Introduction, will aid in determining in which particular assembly of the airplane the part may be found. After the assembly has been determined, turn to the figure number referred to and examine the illustration and those immediately following. By locating the part on the illustration, the pertinent data, including the part number, may be obtained from the corresponding listing. If the part desired is known to be a component of a particular installation or assembly, that installation or assembly may be found more readily in the Table of Contents which is broken down into the major groups of the airplane.

1-34. SYSTEM INDEX ILLUSTRATION USAGE.

1-35. The System Index Illustrations at the end of Section II are for the purpose of visualizing an entire functional system, and to serve as a guide to the figure elsewhere in the section where illustration and assembly breakdown may be found.

MASTER "USABLE ON" CODE

(See Page 2, paragraph 1-16)

The serial numbers assigned to the F2H-2, F2H-2N and F2H-2P airplanes have been separated below into the Contractor's production blocks. Each block is represented by a letter code to include all serial numbers of that production block. Each block further breaks down into individual unit codes for coding cnanges within a block. The Contractor's production sequence number (MAC No.) is included as added information. The following are examples of code usage:

a-b indicates part usable on F2H-2 Serial Numbers 123204 thru 123245

a-e5 indicates part usable on F2H-2 Serial Numbers 123204 thru 123319

a-g, o-s indicates part usable on F2H-2 Serial Numbers 123204 thru 123299, 123314, 123315 thru 123365 and 123367 thru 123382 and F2H-2N Serial Numbers 123300 thru 123313

NOTE: Absence of code indicates part usable on all F2H-2, F2H-2N and F2H-2P airplanes

STUD INSTALLATIONS TABULATION

The following tabulations are for the purpose of determining the proper United Carr Fastener Corp. (UC) part numbers composing the contractor's standard Stud Installations. These Stud Installations are listed throughout Section II and are referenced to this page.

CONTRACTOR'S 9M17 STUD INSTALLATION

(1) TO DETERMINE VENDOR COMPONENTS OF BASIC NUMBER - See table below corresponding to basic installation desired. Vendor Stud number and Vendor Cross Pin number are shown opposite. For example, a 9M17F5-.XXX Installation indicates these components: 98265, Stud and 99836, Cross Pin. To complete vendor stud number, add dash numbers as explained in steps 2 and 3.

SIZE #2		
CONT'R INSTAL. NUMBER	(UC) STUD PART NO.	(UC) CROSS PIN PART NO.
9M17F2	98264	99785-2
9M17R2	98293	99785-2
9M17W2	W98293	99785-2

SIZE #5		
CONT'R INSTAL. NUMBER	(UC) STUD PART NO.	(UC) CROSS PIN PART NO.
9M17F5	98265	99836
9M17R5	98292	99836
9M17W5	W98292	99836

SIZE #7		
CONT'R INSTAL. NUMBER	(UC) STUD PART NO.	(UC) CROSS PIN PART NO.
9M17F7	99798	99799
9M17R7	99839	99799
9M17W7	W99839	99799

(2) TO DETERMINE VENDOR FIRST DASH NUMBER (Indicating Stud Size):

WHEN CONT'R. LAST DASH NUMBER IS:	THEN VENDOR (UC) 1ST DASH NO. IS:	
	FOR SIZE 2	FOR SIZES 5 & 7
.040 TO .100	-1	-1
.110 TO .150	-2	-1
.160 TO .250	-2	-2
.260 TO .350		-3
.260 TO .400	-3	
.360 TO .450		-4
.410 TO .550	-4	
.460 TO .550		-5
.560 TO .700	-5	
.560 TO .650		-6
.660 TO .750		-7
.710 TO .850	-6	

(3) TO DETERMINE VENDOR LAST DASH (Indicating Stud Length)
Vendor (UC) last dash number is the same as contractor's Installation last dash number.
Example: a 98265-1-.140 (UC) = 9M17F5-.140 (contractor's Installation number)

CONTRACTOR'S 9M18 STUD INSTALLATION

(1) TO DETERMINE VENDOR COMPONENTS OF BASIC NUMBER - See Table below corresponding to basic Installation desired. Vendor Stud number, Cross Pin, and Washer are shown opposite. For example, a 9M18W5-.XXX-X Installation indicates these components: 2W5, Stud; 99836, Cross Pin and 295018, Washer. To complete vendor stud number, add dash numbers as explained in steps 2 and 3.

SIZE #5			
CONT'R INSTAL. NUMBER	(UC) STUD PART NO.	(UC) CROSS PIN PART NO.	(UC) WASHER PART NO.
9M18F5	2F5	99836	295018
9M18W5	2W5	99836	295018

SIZE #7			
CONT'R INSTAL. NUMBER	(UC) STUD PART NO.	(UC) CROSS PIN PART NO.	(UC) WASHER PART NO.
9M18F7	2F7	99799	295018
—	—	99799	295018

(2) TO DETERMINE VENDOR FIRST DASH NUMBER (Indicating Stud Length)
Vendor (UC) first dash number is the same as contractor's Installation first dash number.
Example: 2W5-.160-X (UC) = 9M18W5-.160-X.

(3) TO DETERMINE VENDOR LAST DASH NUMBER (Indicating cable length in 1/2 in. units)
Vendor (UC) last dash number is the same as contractor s Installation last dash number.
Example: 2W5-.160-8 (UC) = 9M18W5-.160-8.
4 in. cable

[1] A-45-J-237 Actuator must be modified per Contractor's Service Bulletin 15SB193A (ASC 223A) (Westinghouse Service Bulletin 1-L-2928-3). After modification reidentify as A-45-J-237-4.
[2] Must be modified per Aircraft Service Change 282 before installation on any aircraft coded a-g, o-s.
[3] Removed from any aircraft coded a-g, o-s on which Aircraft Service Change 282 has been incorporated.
[4] Installed on any aircraft coded a-g, o-s on which Aircraft Service Change 282 has been incorporated.
[5] Usable as coded on any aircraft on which Contractor's Service Bulletin 15SB67 (ASC 50) has not been incorporated.
[6] Usable as coded and on any aircraft coded a-d9, o-q1 on which Contractor's Service Bulletin 15SB67 (ASC 50) has been incorporated.

\# Alternate for R88-A-350-11.
2 Installed for usage with AN/ARC-27 radio system on any aircraft coded a-n, t-aa on which Contractor's Service Bulletin 15SB126 (ASC 181) or 15SB177 (ASC 194) has been incorporated.
3 Usable as coded on any aircraft coded a-g, o-q on which Contractor's Service Bulletin 15SB161 (ASC 197) or 15SB162B (ASC 193A) has been incorporated.
10 Removed when AN/ARC-27 radio system is installed per Contractor's Service Bulletin 15SB126 (ASC 181) or 15SB177 (ASC 194).
13 Removed from any aircraft on which Contractor's Service Bulletin 15SB173 (ASC 199) has been incorporated.
14 Usability same as 15-80485-9 when modified by Contractor's Service Bulletin 15SB171 (ASC 168).
15 Usable as coded and on any aircraft coded t-y8 on which Contractor's Service Bulletin 15SB171 (ASC 168) has been incorporated.
16 Usable as coded and on any aircraft coded a-d, o-p, q2 and q3 on which Contractor's Service Bulletin 15SB53 (ASC 74) has been incorporated.
17 Usable as coded when Contractor's Service Bulletin 15SB171 (ASC 168) has not been incorporated.

[A] Indicates component of Box "A" of Kit required to convert Standard F2H-2B to Operational F2H-2B.
[1] Must be modified per Contractor's Service Bulletin 15SB157 (ASC 169) on any aircraft coded ab-ad8.
[2] Must be modified per Contractor's Service Bulletins 15SB190B (ASC 228A) and 15SB195B (ASC 238) before installation on any aircraft.
[3] Must be modified per Aircraft Service Change 265A before installation on any aircraft.
[4] Usable as coded on any aircraft on which Contractor's Service Bulletin 15SB157 (ASC 169) has not been incorporated.
