

How Lymphatic Drainage Cream Can Improve Your Health

Did you know that applying lymphatic drainage cream to different areas of your body can help improve your health?

Your lymphatic system measures over 100,000 km in overall length and plays a significantly powerful role in how good you feel on a day-to-day basis. When congested, it places an increased burden on your skin as it tries to deal with this build-up and in turn contributes to inflammation, poor complexion, and other skin problems.

Your lymphatic system also works with the circulatory system to deliver nutrients, oxygen, and hormones from the blood to the cells that make up the tissues of your body. Your lymph also transports fatty acids and fat-soluble nutrients from the digestive system for absorption into your blood vessels. Hormones and proteins that cannot make it automatically into the blood must travel via your lymphatic system before they can be utilised.

This is where Chelsey Jean Drainage Creams come in. By applying them in combination with my massage gloves, sprays, sponges, and sequenced lymphatic flow, you will promote better lymphatic system movement and thus help improve your health!
