Testosterone is a naturally occurring sex hormone produced in a man's testicles. Small amounts of testosterone are also produced in a woman's ovaries and adrenal system. Testosterone Enanthate is used in men and boys to treat conditions caused by a lack of this hormone, such as delayed puberty, impotence, or other hormonal imbalances. This medicine is not for use in treating low testosterone ...

Testosterone enanthate, also known as testosterone heptanoate, is an anabolic and androgenic steroid (AAS) drug used to treat low testosterone levels. Anabolic drugs work by building muscles, while androgenic refers to the enhancement of male sex characteristics.

“Carbs are not essential so why eat them”

Does it bother me that it will affect businesses and the mental health of all of the people mentioned above?
