

URU Publications is as of now advertising our latest book on Australia's mystery hominins: "Identifying the Yowie" - 60 Years of Australian Relict Hominology" which is now available from us or from lulu.com [\$55Aud].

The book is the first scientific publication of its kind on the 'Yowie' mystery. Indeed, it is THE Landmark publication on Australian Relict Hominology research. This book by-passes run-of-the-mill publications that are more concerned with sightings reports, recent footprint finds and suspect 'close encounter' claims of publicity seekers, to present this scientifically prepared volume in which is presented fossil evidence disputing the "out of Africa" claims of conservative scientists for our human origins. Instead the authors offer fossil skull-types of hitherto unknown Australian primates, fossil skull-types of Australian-evolved Australopithecines and Homo erectus pre-dating African remains; as well as fossil feet impressions of these races found in Australia which match those recovered in Africa. Our mysterious pygmy folk are also represented by fossil skull-types, fossil feet impressions which, like those of the larger hominins just mentioned, match recently-made impressions found in the Australian bush.

While we research the 'fossil foundations' of Australian relict hominology, Heather and I also study present-day comparisons between Yowie feet casts and those of their fossil ancestor, Homo erectus, and that includes present-day feet cast comparisons with fossil examples of 'Yahoo' - Australopithecine forms.

The dietary habits of our relic hominins, musculation and bodily movements as well as other anatomical information, as well as a mass of scientifically-based information awaits the reader. It is a book that any sensible researcher, or anyone contemplating becoming part of this Scientific field [and it is a science!] should read. And anyone seeking helpful advice on the Yowie/Relict Hominology should approach us for the scientific facts. Our address is: Dr [hc] Rex Gilroy PhD; Professor of History [hc] "Australian Yowie Research Centre" PO Box 202 Katoomba 2780. Phone )2 47 823441; Mysterious Australia.com; Facebook: rex and heather gilroys mysterious Australia; Email: randhgilroy1044 @gmail.com.

Yowie research we first created by me at age 14 and am still going strong at 77 years of age – the general public and other investigators don't call me "Rex the Yowie Man" for nothing!
