Peace of Mind Guaranteed

Thank you for purchasing this Merlin Product. Please read the instruction manual carefully before using the product.

The documentation provided will allow you to fully enjoy all the features this unit has to offer.

Please save this manual for future reference.

Instructions

1) Please connect the IP Camera and router via a network LAN cable.

2) Make sure that the power indicator light of the router is on (yellow), and the Network Indicator light is flashing (green)

3) Insert the Micro SD Card in the Micro SD Card slot for recording while away.
   (The built-in MicroSD Card function supports upto 32GB)

NOTE: The IP camera can be reset to factory settings by pressing the reset button for 10 seconds.

The reset button can be found at the back of the camera
1) To setup surveillance function for Apple iOS and Android: (Attach QR Code for Both Apps)
   Download the "Merlin IPCAM" app and install it.

To operate and control the Merlin Wifi IP Camera Lite, kindly download the following Application available on the Google Play and the Apple stores for free

Google Play Store   Apple App Store

There are two ways to add the camera.
a) Click on add camera, upon clicking the camera a window will pop up. In the "Device ID" text box enter the UID or click "Scan barcode", located at the bottom of the camera or the QR sticker provided in the box.
   In the "user text box" enter the username; in the "password" enter the password.
b) Click on "search", the software will automatically search for the LAN cameras.

NOTE: The camera's default username: admin, and password is: 12345

2) Setup WiFi:
When the camera shows "online"; click on the (Settings) icon on the right side of the camera list. In the pop-up "IP Camera Settings", window; click the WiFi Settings, then click "Manage WiFi Network. Select the desired router in the SSID list, enter the router WiFi password, click finish and wait for the camera to restart and connect to WiFi, if you're using a wired network just let the camera restart.

FAQ's
Q) My IP Camera doesn't turn on or boot up normally?
A) a) The switch of the power supply does not have a proper electrical connection
b) The switch of the power supply is damaged
c) The possible reason for the device not booting up properly might be that the power supply is wrong, the input voltage is not stable or too low, or the hardware of the device might be damaged

Q) Why the system can't detect the Micro SD Card and is not recording on it?
A) a) The Micro SD card might not be inserted properly. The card slot or the storage device itself might be damaged.
b) Make sure that when you're browsing the camera from a mobile device or PC, to turn on recording function and then enable SD Card option to record on the in-built SD Card.

Q) I cannot see my IP Camera in the Merlin App?
A) Please make sure that you have followed the setup instructions properly. Sometimes if the error still prevails, please reset your IP camera (refer to reset option) and do the setup procedure again.

LIMITED WARRANTY
Merlin Products are covered by a limited one-year warranty policy. If the product suffers from a manufacturing defect, the customer will receive a replacement if claimed within 15 days of the purchase date. Otherwise, the product will be inspected for possible repair options. The product will either be repaired and returned free of charge, or replaced. All repair services past the one-year warranty period will be charged for any repairs that need to be made.

If the client is located outside the UAE, or is otherwise unable to personally deliver the defective product to our service center or retail outlets, he/she may send it via post at his/her own cost. The repaired/replaced product will then be returned to the client via courier mail at Merlin's cost, as long as the warranty period is still active.

Important: This limited warranty DOES NOT COVER normal wear and tear, accidents, damage during transit, misuse, abuse or neglect. Attempting to disassemble the unit will render the warranty null and void.
