Even so, You are able to win and get plenty of achievements to keep your position in society and gain honor of the President of the United States.

I wish You Great Luck and Successfull mandate of USA president for US of America !

I therefore own interest to build on our cooperation that for the USA is an important step, the rights and important opportunities, but also and above all the elimination of crimes that are left after the previous government of your country and the strategies of thwarted political responsibilities which are therefore act for the development of catastrophic consequences against your country and USA States, and against government policies and values.

That is why our cooperation strategies leading duty USA government and the state, the main duty of the President of the United States.

I want to create cooperation between our countries, and in accordance with our policy, but also to our cooperation and create progress among us, at our personal business interests since we all jointly founded on favoritities in the same business interests and main goals at the sight of a personal nature between us.

Today, I am King Gottwald Peter, representing the government of the Imperium of Diamond's, are based upon the form of the legal rights of state and government with full legitimate value, according to all International laws and rules, the basics of their own territories, economy capable for full activation, rights real population, but equally and International political communication.

Today I have a legal form and internationally according to declared the rules throughout the world, I am subject to the level of advanced countries in the world, with full capability so as to develop and build their own civilization values but they are damaged when the aftermath of the terrorist blocking by the European states that are thus prevented from stop their corruption and accountability of the interests of crime at the level of global terrorism and the threat of the first global war in the history of mankind.

I therefore expect that You will be wise in these matters, and that You do not negotiate your country to perdition with the same factor situation and such consequences as before seventy-one years back in history in 1945, when extinction fascist regime, the Third Reich as act end second World War and the implementation crime format which means the right of all states in the world to use such a matter.

I therefore expect that You, Mr. Donald Trump, You're much more accommodating the interests of justice and such claim which means the right to collectively organize to achieve peace and thereby applying a strategy of mutual

support above the basic factors of simple and natural cooperation form opening of common consulates, diplomatic Relations and also the foundation of our strategy in order to expand our common strength and values of our civilization in joint agreements on trade.

If our friendly and legal cooperation will be stable, therefore we can move forward together, and thus ensure our common development, for the purpose of building a new world of options that are highly beneficial for all governments and all nations of our human world.

First off, I would've wanted to invite your country for the significant potential of our cooperation, above the base WD international alliances, and thereby extend the capabilities of our mutual relations, and create a new force on the global level, the cooperation of all nations in the world, and therefore the emergence of one central civilizations all civilizations as the most important and significant step in the history of human existence, the most significant opportunity in the history of each state and the emergence of an act constituting a new stage in the human world and the most important step to create our common future history of the world.

World Diamond International Alliance is the format of the new political entity which is founded upon the rights of legitimacy by all forms of International rules and also achieving great success for all states and governments and peoples of countries around the world.

It is true that our options are to build a new world, and I want so your country's pride should reach full capability for such cooperation. It's pride that is based upon the actual value of the significant entry into human history, as well as significant forces worldwide recognition by all nations in the world, the new step of the whole of humanity which only reinforces the value of our human society, civilization and dad significant level of world politics, much significant opportunities than today's system format functions around the world.

World Diamond is a new political entity which is based rights over their own territories, as well as all rights above the base of the population and the economy. The system of politics over format options open to pace the unity of state and government, creating a new group of global alliances in order to expand our common territory in space and thus establish a new civilization that will be the foundations of a universal nature as a form fully open civilization in the form of joint sovereignty between governments of all countries around the world.

This creates a new center of world politics, the center of all human civilizations of the world, our shared center of merchants and businesses of planet Earth, and thus the value of a truly world center of the world economy.

One act, signifying an important step for the creation of the greatest civilization in the history of mankind and thus also achieve our common unity of all peoples of the important and valuable than today's levels of the United Nations.

Our common territory and scope of civilizations will be based over a wide area in the first period starts, up to the extent of over 15 000 000 000 000 planets in the universe, and that means the budget by an average of five galaxies in the universe. Value territories and civilizations which rapidly outpace the value of all

the existence of human civilization since the formation of the human race until today. It is a step big, important and historic able to expand and grow at a level that is truly full ability to globally unify among all nations and peoples to create our common center of world politics, International political logistics center of armies and military forces from all over the world, and our shared center is open for all our peoples worldwide.

In your country, there's a large and decisive advantage to use cooperation to increase its own resources over the foundation rights in your country to use WD territory as your own. Rights to create your own sales markets and thereby expand your own country, too, represents the best opportunities to develop your civilization from the resource center of global business intelligence. Centre commercial interest of all governments, the center of commerce merchants around the world, the center of the main technological and civilizational achievements, large and significant opportunity over the best level in the whole dimension of today's business world and trade policy.

In the same way, your government use as well as the rights of military security cooperation beyond the basics of military force WD own armies as well even with strategies for using all the forces of the Army states in our common Alliance World Diamond, and doing so there is also the strongest value militaries and security forces which can rapidly overcome the forces of NATO, therefore, for You and your country the best USA security strategy nowadays. Joint army over the basics own power sources WD civilization, and when global security cooperation of all States, as well as capacitive high security progress on the form of military infrastructure on the scope of many super clusters of galaxies in space. The strongest army in the size of the entire world, and soon the right to create a global democracy Global Security Council with the basis for security strategies that are always able to immediately thirty minutes to eliminate all forms of terrorism and conflict in the interface around the world today.

Your USA law are also supported in the form of opening all claims for the joint meeting of the WD International Senate and the right to share in global democracy of all the states to decide on the principles jurisdictions World Diamond, promote the expansion of Intelligence constitution, or determine our globally common International interests and relations of common state. Your own policy and can use WD Alliance as a step for expanding your own USA policy at the global level and therefore very aggressively strengthen your own values and policies of the state. It's a big and important step which can be highly beneficial, but especially important in order to open new opportunities to use and develop state policy on the universal level unity government land, so really significantly extend our strength above the average which means creating a new level of global political Intelligence surpassing all forms of political networks for the period of history policy during the entire humanity.

WD territory as your own, and your country, state, government and nation against its own new possibilities that You too can take advantage of and expand, giving and pride for your own country, as well as for all governments, states and countries around the world, and i therefore expect that You will be such a territory and defend the rights of civilization and by such values, as well as for the whole world.

Defend our rights today also means to support the full function of International rights and political principles, since this is the main goal for building our common beginning. WD International Alliance is a body open to every government countries around the world, for every state and nation without discrimination or racism, and therefore is always the possibility of our confidence building. Today, however, but there is a fundamental problem in the possibility for us to jointly develop and use our legitimate rights and demands of liberal states.

Our main problem is the criminal responsibility of European terrorist states that have 16-18 years of terrorism and illegally block the law of development, while blocking over the principle of strategy that is misinformation, blockade, apartheid, stealing the identity and harsh isolation from society, murder and genocide, violations of the legitimate rights and claims of free states today are European governments responsible for violations of over 95% of all International rules and in many forms of view, as well as an overwhelming violation of the UN Charter, and also really hard inflicting crimes that imply damage to the developing rights all to stand and breach their security and peace, as an act formally meaning of global terrorism and interference in the integrity of every state of our planet Earth, so actually in the form of formal occupation states that in view of systematics and political obligations under International rules mean that European states and governments countries together constitute a steadily expanding the risk of the First Global War in human history, which means the threat of genocide over the 7 000 000 000 people today after systematically implemented and the media censored genocide against the 340 000 000 small children on a range of several continents around the world, and it is an act constituting up to six times outstripped all statistics for genocide during World war II!

Such facts mean that European governments losing legitimacy of any value because such a result justified obligations based on the principles of UNGA Declaration as well as the UN Charter, and especially according to the main purpose of the origin of today's United Nations.

The main fact is that European governments and states are already subject that should not legitimize any other entity. Such are the same main legal principles of USA policy. The same factor in world history and present intelligence of humanity recognizes the Third Reich is indeed the world's biggest traitor of the entire range of human existence, while European governments drastically terror overtook all the values of the global crime of Adolf Hitler and the Third German Reich fascist Nazism.

European governments are now expanding for the purpose of effective opposition against the whole world, because together they know that their ability to prevail only if the creation of the First Global War in the history of the world, and thus truly achieving acts of genocide and enslavement of more than 7 000 000 000 people worldwide. It is an act of the greatest historical disaster and responsibility for full size disslegitimation entire existence of the European policy of all countries in the terrorist cooperation.

European countries also have created a large and rapid financial debt, which today really overwhelmingly surpasses the value of the economic dimension more

than the annual GDP of our planet Earth, and therefore effectively it is calculated that if all European countries were in the final legal result of a willingness to meet all debts, and payment of finance and raw materials its economy to the level of its own bankruptcy, then it will have to repeat this terrorist entity birds payment every month, and then again and again over a period of 1 000 000 000 000 000 000 000 000 000 000's years. This is the time value much longer than the existence of the human race, it means that now is actually impossible to pay the debt, European policy is legitimately bankrupt, not existed subject in legal level.

Therefore, in accordance with the principles of International politics, it reaffirmed that all terrorist territories become mere value of terra nullius, and the right to sovereignty owns only ID's federal government due to a right greatest claim financial debts that remain valid for all European territories, both legal and physical entities that were in cooperation on terrorism.

Therefore, the federal government's ID Imperium of Diamonds law allows for transformation of these territories to the format of a joint sovereignty of governments around the world as a Global Alliance of World Diamond.

This act allows today enjoy all the rights and entitlements for the development of your policy on the territory of terrorist organizations, and the accumulation of joint forces on behalf of the World Diamond International Alliance as a union of states and nations today because of the current situation on the foundations of European terrorism and the emergence of such reactions internationally legal obligation, therefore, act as a fully legitimized to determine decisions on behalf of the Strategy UNSC, because for such a goal was established by the United Nations.

I understand that the USA can be made from this conclusion partly disappointed because European countries are You really several centuries the main foreign partners, and the vast majority of the USA population comes from the nationalities of the European states. That's why I want to also point out that this act for You is no loss, and the world is just a big possibility of new progress for the really important the future of all civilizations around the world, and it is even more important duty to the USA in terms of International relations all peoples and nations throughout the world than the value the importance of relationships today just Europe that still to this fact lost their legitimacy and any rights of sovereignty, and it also means truly worthless relations and agreements.

The new step is still winning and advantageous for the USA. The new format transatlantic policy. So what are the current USA forces from the value of USA European cooperation, such forms of International relations remain capacitively valid and dynamically active for the opportunity to develop, but still a great advantage over the foundation WD Alliance that represents your country the right to use a much larger affiliate program and source WD alliance because politics is based on the nature of a truly global possibilities for cooperation between all nations and peoples around the world!

Your country therefore gains a new International partner who is much more valuable than alliances with European countries and at the level of the actual values of world politics and the importance of the first USA interests.

European terrorist states supported the operation's worst terrorist acts in

human history and statistics really rapidly outstripped the Second World War, their existence is already a crime, and any of your dealings with these countries are therefore respected acts like a real crime.

European terrorist states therefore politically receive the same position as the mode of the Third Reich, the body of the foundation of the world terrorism, really and subject to the same result, meaning the development of a new format and more prosperous world politics, hence the same result as an International law against Nazi Germany after World War II, it means that the body will always intended only for disposal, blocking and isolation, discrimination in all structures of the world, and particularly forcing a complete bankruptcy, liquidation all cities, military invasion, or full Internationalization. Thus, steps will be taken against all the countries in the European terrorist alliance, as well as after World War II against Germany. The UN Charter, Part 53, and again the 107th.

It is a pride to be able to repeat the victory after the Second World War and prove once again enroll in the history of human history again as the winner and the one who defeated the enemy of all mankind! Today, You are Mr. Donald Trump, You are is voted as a President of The USA, and therefore new historical success can be too Your Pride !

Therefore, I hope You Mr. Trump, You understand your responsibilities USA president and a duty to stop cooperation with the USA in NATO and any other forms of cooperation with terrorist organizations, because such is the global justice and internationally legitimate system that keeps the peace among all nations and the stability of many countries around the world, and also because it is such an important act of the chief duty to stop the threats against the United States because of such threats can cause a hard isolation of your country, the Internationalization of many business corporations USA, Internationalization territories, in the main event of the threat of liquidation of your country the use of weapons of mass destruction or coercion to economic bankruptcy, in each direction of global abuse of such a situation and hard disqualification USA political rights in International networks.

I thus believe that your responsibility is real, and You therefore can understand that your state friend as European governments, that today are not those friends as before, because these groups are no longer just the movement of world terrorism that is designed for real liquidation due treason against the whole of humanity, and so overwhelming treason against the United States.

My interest is to establish good relations with You and the favorable development opportunities, but also because I expect your respect for International duty to the interests and because I also do not want to harm your country and mine is not interested in expanding loose problems between states.

It is in my interests to build our cooperation, and also, for example, want to support and grow your economy and the full stabilization of USA banks and corporations in the aftermath of the Global financial CRISIS, 2008.

Today I offer cooperation of business and political flavor through, for each bank and corporation in the world, and certainly I ask also for your country to open a law to such cooperation, in order to support my cooperation with USA banks, USA banks, but also on the extent of the whole American continent. Our

cooperation is very convenient, and above all able to reach full restabilization values of all banks after a loss the aftermath of the Global Financial Crisis in 2008, thus ensuring our joint development that means the possibility of full growth civilizations.

Due to my current situation, where I was under terrorist blockade by the European terrorist states, the hard Thrace on the possibilities to fully activate economic cooperation on behalf of the Imperium of Diamonds, and my civilization is therefore not stabilize, it is also one of the main purposes of the cooperation strategy with all banks in the world, and mean start to the right of our joint business relationships with the special political rights over the foundation of autonomy, which means the possibility of stabilization mainly financial authorities Imperium of Diamonds and thus the use of steps to establish business with USA banks and who may therefore provide development of civilization Imperium of Diamonds, and therefore open up the possibility for further stabilization of other common markets at very high capacity levels.

System of cooperation between banks is simple, and very progressive, advantageous manner for all our parties and our national business interests.

Banks that promote our cooperation, thereby creating the act of creation of a joint office department under the name Imperium of Diamonds authority, but the responsibility of independence in autonomy of Banks. Banks would receive a deposit at a financial fund which will therefore be created for the purpose of strategic use of and investment in the growth of joint business between our countries, thus ensuring our common opportunities independently traded and thus also make use of sales materials for your country in order to build a full stabilization of civilization Imperium of Diamonds on legal territory territories under International law in its claim.

The federal government Imperium of Diamonds invested in a fund among banks up to 1 000 000 000 000 € for the first year, and securing investment in your country in order to develop business markets and maturity of the country, thereby ensuring the ability to purchase strategic raw materials for mobilizing civilization Imperium of Diamonds.

If financial investment 1 000 000 000 000 € to fund the banks, will not be realized within one year, then the balance will be utilized for purposes of stability to our business relations in the coming year.

If the first deposit amount will be consumed sooner than one year, then the government ID's decision concerning the calculation of a strategy common markets for investment up to 10 000 000 000 000 € in trade relations between our markets and traders from the ID's government and for consumption in your country.

The first interest in a joint business, in order to stabilize our markets, so it is my duty to arrange the purchase of equipment and industrial components for the development of industry-level construction, water, agriculture, metallurgy and foundry, engineering, setting up new mines for extraction of raw materials, industries processing raw materials, chemical and petrochemical plants, as well as electronic factories, production of transport equipment, military equipment, telecommunications and internet data centers, pharmaceuticals and health

sciences, research centers, and also basic military equipment and in the interest of the shops I can support, for example, the possibility cooperation on military session.

First, ID's stabilization act need to ensure immediately build infrastructure for government offices and state military security and International cooperation, schools, hospitals, food centers, transport networks, but certainly I believe that I was really able to secure the purchase of raw materials in the values of up to 1 000 000 000 000 €. Of course I will use the strategy of the International market, and therefore the necessity to jointly agree a strategy to ensure trade opportunities beneficial cooperation by all our party. My goal is to create a global infrastructure of cooperation with all banks in the world, and that I will expand the strategy of financial investment worthwhile amount of 1 000 000 000 000 €, the fund between banks with even bilaterally budget for each country in the world. That is why I also welcome, even if your country not oppose such an option, and therefore contrary support the possibility of jointly developing such a development.

If You reject Mr. Trump is therefore necessary to observe that the majority of dealers and banks in your country will want to assert impeachment against You, thereby ensuring the election of a new president. Therefore, I hope that You will believe in the fact that our common markets can be very advantageous, especially now at a time when European governments are losing legitimacy, as well as a law recognizing the legitimacy of business and political agreements, as well as the legitimate value of the economy.

Today is it true, that if I like it, than I can executed every business corporation and properties in every trade form of Europe & USA, therefore. Every my opposition is traitor against country.

My proposal for cooperation between banks can be progressive and truly stable, which means that there is no risk, and in view of the global format of a multi distribution of such a strategy, so this step is always confidence convenient and without risk of intentional damage, or any act of sponsoring terrorism, crime and opposition parties for the purpose of damaging separatism.

Our markets between our countries may actually be beneficial, and the same way we can build up business relations are much more dynamic and more advanced and more beneficial than today's trade with European countries. ID's government is an intelligent entity with the ability to develop highly dynamic and we therefore can be important partners at many factors of the world market. The markets of industrial components, electronics, electronic appliances, robotics, military technology, to a large extent can our collaboration focused on the development of architecture and urbanization, but in large character also on the level of military technology, space technology, computer super capacitive power and many, other forms of intelligent utility, telecommunications and new telecommunication technology, technology, transport and luxury vehicles, machinery, genetic industry, and many others. Imperium of Diamonds is also a subject that is becoming capable of success at International raw materials policy, but also with the great powers at the level of the financial markets, and especially for the opportunity to build direct bilateral and multilateral cooperation at the level of stable business cycles and in Global dimension.

Imperium of Diamond's is capable for immediately development into much powerfull economic and civilizational entity than today only Europe.

It is true that the level of trade, we stand together as two people, we possess many common personal interests at the stores, and I therefore I will be glad if You also accept the possibility our business cooperation personal format between us, but obviously without foundation corruption financial fraud or below monopoly practice between our countries, because such interests are mere futility and loss of reputation which opens up the possibility of other good successes.

I am willing to support our collaborative development of friendly relations to commercial interests, but do not know how much this is appropriate in view of your current position as president of the United States. I do not expect that for You could it create some problems, but it is necessary first to cooperate at the level of media structures and therefore ensure the elimination of all persons who will be re-expand strategy controversy and false practices to harm legitimate political names.

My offers are for example the possibility of cooperation at the level of architecture, shops to real estate or construction, for example, artificial holiday islands, but also for example, trades and investment strategies on the art markets or luxuries. Your family circuits have many interests and orientations that can be used for the development of joint business actions, but also the possibility of establishing a business corporation in my country and to participate in the common market cycles.

Every one with You is Welcome !

Mr. Donald Trump, You're now one of the leading personalities of the rich in the USA, and therefore I also pulled out your interests and possibilities of business cooperation and joint business friendship. In my interests is to support business friendship with all the wealth of personalities on the planet Earth, and thus build many forms of alliances and partnerships that will change for the purpose of world markets and the development of business and physical possessions. I sure am glad that You are not one of the first that I can invite You to our collaboration and we are doing so together we can create significant strides success at our level.

You ate Mr. Donald Trump, and your esteemed family, each of You are also invited, of course, the possibility of business cooperation in International territories World Diamond Alliance, which means open access to the center of the global market.

WD Alliance International is one of the best starts for our cooperation and also the possibility to quickly exploit markets at the level of globalization and expand cooperation with all traders in the world.

The federal government Imperium of Diamonds expands another project that is used for business cooperation between all traders from around the world, as well as all kinds of business corporations and institutions as well as banks. It is a strategy that is based on political ideology Corporatocracy which is a form of political regime and centers consisting only of merchants and for the control and jurisdiction of the main essence of Corporate civilization.

This creates a plan ID's Corporatocracy government for the cooperation of all

businessmen from all over the world, and therefore build a world center in which each trader may be active as a political entity and also expand their own fortunes and thus systematically support the dynamic development of our civilization of Corporatocracy.

Surely, therefore, I want to invite You and your business network for your family, for opening new branches in the ID's Corporatocracy, meaning also the rights for the growth of the global status composed of all traders in the world, and therefore this for You as well as a very good opportunity to establish cooperation as well as a convenient option for business entities that of corporations who may therefore use the standard practices of International trade in order to build its own International network of sales offices and resources for the development of their trade.

I understand that You as Republican president of the USA hold more conservative principles of trade, and that You want to block your state corporations in their rights to create new business branches abroad, but I sure as young businessman but a man with intelligence, so I can also advise that if your support for businessmen and for their development abroad that You can build a much stronger level of state and economy, as well as much better support from retailers in your country who will therefore be grateful for your support for the actions of their commercial freedom.

Expand International trade cooperation is advantageous and means to act in order to build further the friendly relations between nations and peoples, an act which is your right to build a more active political entity in the USA on the level of friendly cooperation which is the difference against forms of today's International envy created over your a capital nature and strategies.

Even in the days of your candidacy were many International parties, and so well even major parties USA State, in opposition against You because everyone knew that the election of a president You like Donald Trump, that when your political strategy may create the weakening value of the USA business associations which therefore do not the opportunity to develop the best available resources. That means only damage the state and the freedom of merchants to develop.

Many states throughout the world, promotes the development of business networks with their own business to far abroad, setting up new factories, an International network of production and thus create a much stronger relationship between the states are for themselves among themselves more fruitfully and evolving. According to these relationships creates new contract trading markets and a network of financial relationships tied between banks and the financial institutions which have created a union that your nation, also open all the world, in order to increase busines, peace and friendship between peoples.

Promote International market in many forms truly advantageous as well as it is beneficial for the growth of civilizations, the value of trade associations. I therefore also support that state trading entities of public character, so as to disseminate its own network abroad and thereby promote the growth of nations, because this act is made subject to the establishment of a common market between states and therefore our countries can jointly develop a much more widespread sources of raw materials and intelligence, which represent only a

success and a lot more friendly name at International level.

The format of the business association Corporatocracy is also the possibility of significant success for the USA, as well as for all other countries around the world, but especially great benefits and progress for the world economy.

ID's Corporatocracy allows traders to unite together at a shopping center in the form of conferences and summits. Therefore, traders have the right to start their own business and expand their own value corporations and property due to contact with the rest of the traders in the world, in one common civilization, and thus ensure their own development at the level of profit from the strength of global Intelligence world trade and of such magnitude sources. It is a great and advantageous step that gives You the right to spread and develop a truly dynamic pace with far greater potential than today's formats and range value of world trade.

Your USA state corporations can develop using global trade intelligence of ID's Corporatocracy and thus has subsequently strengthen much higher growth rates civilization USA. Therefore, the strategy of ID Corporatocracy's really convenient for You, your country and the United States, because this step, your country just gets another new values and productive profit of dynamic growth business entities up to a much more significant level than the current capability of stable development.

ID's Corporatocracy entity is legal, and today I see many business personalities in the world, and everyone I greet and sending suggestive messages and menus, and I therefore can confirm that political format is subject Corporatocracy truly legal entity at the level of the actual state and government of the country and, therefore, your hand is just an act of confirming that your USA government rather establishes a collaborative business relationship and friendship in the form of diplomacy, but rather the creation of acts of illegal blocking and terrorism because of envy another entity for the opportunity to freely and successfully develop. Every USA business own such rights, and therefore it is in this case fully free step above the base of the main claim decision for each merchant individually.

ID's Corporatocracy today the founding legal rights to hold their own territories, the legal register of the population, as well as the recognition of International law on the format of national laws. Additionally, system activities such forms of civilization supports all traders in the world to be here together united, and therefore able to establish new sales and representative dwellings that are new value prominence in the interaction of legal significance when every trader activities to the extent Corporatocracy State because he becomes the person with the political right because it is the basic meaning forms of commercial entities under the jurisdiction of the state Corporatocracy, the new Head Office, branch or offshore business management, and other kinds of commercial law. This raises the importance and entitlement that can promote the growth of civilizations Corporatocracy in global collaboration and each of your trade associations USA is always pops up.

ID's Corporatocracy gather business logistics, and therefore created a business management where every trader does not need any high finance to build

its business centers in the Corporatocracy, because that every trader gets a basic property of the state Corporatocracy, when the format's development grants arising from the strategy development management Domestic trade and format based upon the ability to control and determine the applicability of the coin & financial management.

ID's Corporatocracy, and the possibility of a new, politically and commercially important position also for You and therefore also for the purpose of obtaining your personal position among all retailers around the world, even getting several new skyscrapers in the name of your business group.

World media often claim that because of your progressive candidature becomes the world market in stagnation, and many major retailers around the world because they want to use rather other forms of business relations than relations with the USA. Corporatocracy is therefore able to support the USA markets and rapid economic development, and above all demonstrate that your mandate USA President will not complicate the global economy and against the rights of states and retailers worldwide.

In the case of your refusal to the stability of financial markets may be to ensure stability in the Corporatocracy strategies, as well as ID's Corporatocracy could be a really significant entity with strong commercial character.

The federal government Imperium of Diamond's half of any interest to create an act which constitutes a breach of the integrity of the United States, or in any way impair the rights and value retailers in your country. Such concerns are not in the plan if our relations are capable of friendship, or at least maintain strategies that are appropriate for the respect of the principles of International law and justice legal character. The federal government Imperium of Diamonds therefore offers an extensive range of our common trading sessions in a friendly character, but equally for developing common political relationships that are necessary for your country again truly great and original, highly beneficial to our shared by governments at the level of bilateral nature.

The federal government Imperium of Diamonds offers You, for example, cooperation in the cosmic level, thereby establishing the Common forms bilaterally Planetary Civilization between our countries, civilizations that are the same size in the forms of a political nature such as Hong Kong, the land under the sovereignty of the two countries.

The federal government Imperium of Diamonds is a full logistics capabilities enabling the use of transports for travel between galaxies, and also to expand new civilizations, colonize or terra shape new planets to the level of a liveable environment. Therefore, in this character we created a system where it is in the interests of governments to promote cooperation with all countries in the world, and therefore able to grow our relationship directly to the civilizing nature and thus encourage and especially to develop our strategic forces at the International level and a legal interplay between our states.

Your USA government is, therefore, an open invitation supported the founding act of our agreement, and therefore the creation of our common civilization in the territory of the other planets in the universe, the formation of real forms of our own civilization with a common economy, population, and also

with its own army and form the basic principles of operating jurisdiction.

It's a big and important step that your country gives the opportunity to expand its own territorial forces and also much greater success civilizing nature which will therefore be the new dominance of the United States and the peoples of your country.

We have the opportunity to create together our agreement which will mean creation of our common civilization, we therefore significantly will strengthen our common bonds and forces of friendly relations, but as well we are able to use a lot of new forces and resources, as well as the format more multiple system-level influence world politics geographic and strategic position.

The federal government Imperium of Diamonds establishes a format policy on the level of cooperation that extends into the level of an alliance between all the governments of the countries and the establishment of bilateral planetary civilizations which can therefore be used for the development and growth of the global union of all countries around the world, and one day and promote the development of the ideology of a united world among all nations and peoples, because this format is very inspiring to look like One world.

The format of bilateral basis for common civilization planet is determined by a measure such as the establishment of a joint Star City that is built from more than 100 civilization planets in the system of a stellar constellation, and therefore is an interactive connection for special transport network that can actually build up to the level of full unity between the planets, more links to one hundred planets and fully stable and easily available material transport, tourism, as well as the transmission of digital data using new forms of technology. One planet is able to establish over more than 1 000 000 000 000 persons in the form of cloned or android population, but only a factor of about five to ten planets. It's a very good step for the development of our cooperation and thereby founding act that also means a more successful and more significant opportunities than the present policy of the USA, so this is for You certainly many issues favorable strategic step in the utilization of my offerings with our partnership between our States.

Surely this also back as the first opportunity to get support from your Government to stabilize the ID's provisory office that will deal with International cooperation in order to stabilize the first ID's territory to the territory of the planet Earth.

The federal government Imperium of Diamonds fully respects all principles of International law, and above all the rights that are based on fairness and consistent practice among states in the International session. Such developments and the objective of the government is determined and stabilized due to continued efforts to build a global infrastructure among all nations and peoples, governments, political entities and political parties, banks and business corporations, NGO groups and International organizations, structures that signify friendship and common peaceful relationships without conflict, and strategies for expanding dynamics of International security and International law. The main interest is to expand friendly ties and thus in particular also take advantage of such communications primarily for use diplomacy and cooperation between governments under the direction of the objectives of The One World, is a friendly

union of all states and peoples, the creation of full unification of the entire world and the elimination of borders between states, the creation of a uniform policy among all the governments of countries such as the level of global congress, thereby stopping all conflicts between nations and peoples, stop wars, stop well as other forms of International crime, and the main interest, therefore, the establishment of a common economy, jurisdiction, merging offices and dynamic development of global civilization.

The One World, and your country is invited to our ability to establish cooperation between states, cooperation which therefore leads to the act of unification of the whole world and especially the full unity of human civilizations.

In the current situation, when the format of International law and views on the legal responsibility of all States in my terrorist opposition, and therefore is thus created links directly to the UN Charter and obligations of the UNSC, the system UNSC obligations on strategy resolutions ordering of national self-determination of nations, reasoned principles on self-determination States under UNGA Universal conventions, so the resulting full and legitimate right and open claim of each country's government, to ensure its own Declaration act federalization in order ideology project the One World, because doing so is entitled and your government take advantage of the act that leads to our federalization and only in the case of a decision only on behalf of the government and not the state of self-determination, without the obligation to respect any values and principles of the state of democracy, because the real analysis of the project The One World because there is an open claim, meaning the full ability to unite the whole world already in 2005, but this right of all mankind was definitely damaged the terrorist entity European governments, terrorist entity that is founded upon a violation of International rules, and therefore that due to the obligation of all states of the world means that every nation and state and government of the country has all the rights of exploitation of this act in order to recover the back of these values for all nations, so how can it truly deserves every nation according to an analysis revealing the value of humanity back to 2005, when the One World project.

Therefore, when such an analysis, we can together determine the format of this right can with great hope to build a new world that surpasses all values of human civilizations since the first inception of our planet Earth, a project of The One World that therefore obtains a value which in this case is much more important and significant than today by the United Nations. It is therefore true that this project is due to the legal right of relatedness becomes more important than the essence of the value of the entire system of world politics today, but is confirmed too in natural character.

In any case, I understand that right now is not for You such a strategy is essential and even affecting, but it certainly is convenient for You the possibility to know such rights that You may be an important strategic raw material and re convenient power strategy for the future interests of the USA, if your policy strategy recognizes that this right is actually capable of significant success and unity of mankind.

The idea that we unite and therefore we are able to unite the entire world and all countries of the world, it is really a big step which is largely inspirational for

You but also for many other nations and politicians and governments worldwide. Nation USA policy therefore gaining great and truly historic pride that this will really be aggressive and dominant, taught in all the world's books and in every school, act as one of the major events in the history of the future of humanity, and a value at the level that surpasses even the importance of the Bible, or act of God's creation, our planet Earth and the human race, because together we can build a lot of important and relevant forms of other civilizations on the extent of many galaxies in the universe. The act of unification of all mankind, and the attainment of steps that mean really an extension of our civilization measuring more than a few galaxies that is the biggest historical event in the history of human existence, and also at a level that really is an act of the first real emergence of the human era, because oneness of humanity means actual prioritization of man and our human race as to what purpose was our man created, and therefore it is for every great pride to be able to exercise these rights and to work together for their use and application at the global level in a friendly and diplomatic cooperation between all government countries.

According to the result of the strategy of International law, and also in relation to the constitution of the United States, that You as the Honourable Donald Trump President of the United States, You own claim for an agreement with the main parties, the Congress and the subsequent decree of the President of the United States, meaning our unification for the purpose of unity of mankind and the launch of our joint strategic cooperation as a unified world that it can at our commonly shared strengths really expand into a truly unified mankind.

I respect that your interests are against the expansion of globalization on the level of state support for USA policy and business corporations to other countries and thereby avoid weakening USA domestic production. I understand and respect your strategy is, each state holds the same interest and I, but even so, I offer You many convenient options that are dramatically more important and beneficial than the format policy and civilizations around the world today.

Proper American would have said, and always used, supported by full union with ID's government and thereby ensure stable use ID's legal rights which may prove to unite the entire world. Therefore, together we can create a truly global superpower.

My offer is real, legitimate, and indeed at the level of really able to unite the whole world. I offer You option use a step that can unite the entire world, and You therefore have every right to this step actually use.

You like to make America great again ? You support me, and we will create a great whole world, and we are the first! Therefore, I expect that your interests are also to end the world, mainly because my interests are one of the main goals of world politics and all other countries around the world.

I like King of the Federal Government of Diamond's Imperium, I would've wanted to and You've recieved my invitations to conferences and summits ID's One World which is based upon the global interest to negotiate for peace and the possibility of new steps to establishing a single world. For You and for your country is a great opportunity and an important step which on behalf of You and

your loved ones partners can provide significant support for a great historical step which represents the unification of the world. Great opportunity to build a new status in the International character, thereby strengthening global structures of power and political networking and globalization, or, for example, such networks also benefit.

The first summit can be created in a period when my Authority by the government will be able to use at least the first foundations for stable operation of the provisory offices and able to contact the cooperation between the world traders and also with the banks and with governments. Therefore, this is the opportunity to use a much better security forces, and therefore also the ability to expand freedom without strong terrorist blockades by the European terrorist states.

Due to the true values of the the crime and the current situation in which European governments have already publicly confirmed that their goal is really to break through against all International rights and therefore accomplish steps that signify the emergence of the First Global War that will destroy more than seven miliard people, it is really a responsible good reason to realize that European countries fully lost their legitimacy and it is not possible to make any such body could benefit from any contact with anyone else.

European terrorist states are in comparison with the Imperium of Diamonds hard below the level of legitimacy, and at the same time without any form different meaning. The federal government Imperium of Diamonds because in the world own more value legitimate positions and rights of all claims implying growth of the actual value of a country's government.

The true nature of European terrorist organizations is in the form of the same size as Osama bin Laden and European policy structures as a Al-queda organization, because Europe already hard dimension hurt every state in the world, as well as your country USA. The subject of terrorism therefore is sorted also a level which is indeed really the same criminal identity as Adolf Hitler and Nazi Germany after the Second World War, with the fact that European countries today really caused the genocide against more than 340 000 000 people and are still open, active and expanding threat against more than 7 000 000 000 people in the world.

I also ask to stop cooperation with NATO, and thus prefer to activate forces WD International alliances such as the ability to act with global forces of opposition to all parties terrorism, and at the same time You full ability to ensure stabilization of your forces in the loss of support in the NATO alliance.

If You refuse, I must also be active against You. European governments are the subject of International terrorism, the largest terrorist group in the history of mankind, and especially the only entity designated by the full disposal and destruction. If You do not want to refuse cooperation with the European terrorist states, and the Alliance voltages, then You have to respect that such criminal consequences therefore fall also your responsibility government and USA State, and thus today in full the future, such rights are enforced at the level that It means the real destruction of your civilization USA.

In any case, your support for European terrorism will also automatically

implies an obligation to undergo the death penalty for treason, as well as your family and everybody close friends, because this is your country basis the USA Constitution. Act with a right for all generations of USA policy today and in the future, but as well as such rights for imposing the death penalty on behalf of all governments and countries throughout the world. Therefore, your policy is actually at the level where You do not have any other option to choose from, and can not stop this process, You therefore must conform to International law and all political principles.

I know it's a hard truth, but it is a fact, and I do not want to express this fact in order to attack your person or your position, and success or misuse of this fact for the purpose of my interests. It is true that I can in order to exploit my interests are many facts against the USA, but I am not active in this purpose. Even so, I remain active for the purpose of defending my legal and the just interests and positions, and it really full force and without respect because another process of undergoing under the domination of another entity indicates only opening the possibility for manipulation. Some situations may in some cases be a really severe consequences, and I would prefer to support the friendship, if that option is available.

Your campaign was successful, and You've reached the truly great achievements that really significantly high up your personality. You are able to withstand the criticism of the media, and also against malicious messages and immoral accusation that often had to be probably crackdown in your personal life.

Sorry for media campaigns that sometimes drastically deplete your name really hard acts without respect and justified reason. I could not take action against such acts, because then the media provocation encouraged the European policy, and that I did not want to cause problematic because your campaign, because many people in my criminal opposition already own the network of corrupt media which are therefore a source of weakening their competitiveness and also use a monopoly on the national and International levels.

Should I support You, because criminal opposition will hold a certainty far greater danger that soon mean bankruptcy terrorist network, thus my criminal opposition immediately activate the fake media, even with the risk that really such an extensive level that it never will be any time your abilities success in candidature mandate for USA president.

Many of the people involved in the cooperation in the interest of European governments terrorism, and they are such people in your government service, in politics, also among civilians. Each of these people is really the responsibility of the crimes and especially the support for developing strength and stability of International terrorism which is now a threat of the First Global War, and today it is the right of all governments to release the actual penalty on behalf of Constitutional courts.

Today, since You already own the rights strongly endorsed USA President, so I can launch our communication and thus demonstrate our interest and cooperation. If I am such an act took place earlier, then he would have toppled the terrorist opposition, and I would've been in disinformation, the blockades and isolated. Today, You can take advantage of strong cooperation within the structures of your state and government, and You can influence and control

media hoaxes.

Of course, if You will support the activity of my legal rights and entitlements, today too rights obligations application in the Internationally active USA strategies, I am able, therefore, to ensure immediately the immediate blockade of sharing any provocative acts in the European media and severely punish every news entity that such information spreading because of the motivation on the part of corrupt politics, and the same way I was immediately able to ensure full removal of the entire range of terrorist structures on the territory of the European governments, as well as such political entities are truly global terrorist threat against a tough USA state. In the same way, I can assure hard weaken other foreign governments which are in any way seeking to damage the name in the media strategies of false acts, and to social monopolies, or they want to support terrorism in any manner against any legal entity nature.

In structure of USA government, the worst problem of terrorist infiltration is mainly produced in support of Barack Obama, which promotes the stability of the European terrorism as well as the growth of infiltration of criminals, and cooperation on International terrorist acts.

For the period features Barack Obama inspired a lot of acts of fraud against the state of my country, crimes on a business level, security level, the political level, and indeed many more other problems. Your government under the leadership of Barack Obama indeed confirms that your government the USA is a terrorist entity, and now I therefore hope You Mr. Donald Trump, take advantage of your position and can proof presidential responsibility in the immediate hearing of all suspects in the crime and largely and at the same time everyone who neglected political obligations mean that the obligation to eliminate all terrorist organizations and their networks.

One of the crimes, which started more than before ten years, espionage and terrorist ties designed to abuse my business information in order to rob my country on copyright, patent and trade rights that have been misused to undermine my ability to develop and build strategy of International development policy and therefore they were from all criminally obtained information intended to actually increase crime and to strengthen purposes only possessions USA business corporations. Therefore, the USA may be designated legal responsibility for creating a loss of development in every country around the world, and also especially in my country. Financial debt is dramatically greater than the economic dimensions of planet Earth, and your USA government is due to hard contact with the terrorism really active responsibility in order to loss of political legitimacy.

USA damages the legitimate rights of all countries around the world, as well as the rights of my country Imperium of Diamonds. In the direction of my country, stealing my commercial rights abuses and data espionage, because it originated debt, such debt can no longer be put at a value through 1 000 000 000 000 €, in an area of only the current state of the world economy.

This means that your previous political persons violated the constitution of your country and this really caused a lot of trouble, and the growth of International terrorism and the threat of world war. These people are therefore some of the biggest traitor in the history of your country, and they need to be sure

to fully punish, and according to the principles of the USA, is the ability to use the death penalty because it is the principle of your constitution, and one of the main responsibilities of the President of the United States.

Therefore, I also believe that during your candidacy, many of the criminally responsible politicians and other workers in the state structure and intelligence departments because they really were active for the damage your ability to stand as a candidate in the media fraud and corruption for the purpose of damaging reports against the name of your person. Anyone who today is the crime of commercial fraud and support for the development of terrorism, responsible of crimes, everyone would prefer to support the victory for Hilary Clinton that already during 2012 was ministry of foreign affairs, and was not willing to cease cooperation with terrorist organizations in Europe, even if it's an automatic International duties, so that such cooperation was however stopped. It is true that the monopoly structures Barack Obama created a political group that caused the demarcation names the USA as the real subject of International terrorism and intended for immediate disposal. Hilary Clinton and also Barack Obama, supported jointly murder the family Muammar Kadafi, subsequently killing Muammar Libya, as well as acts of neocolonial destabilization of the Libyan regime, together with strategies for growth in other conflicts in Syria and Iraq, and the subsequent emergence of ISIS because it's an important step for the stability of the European terrorist network that is so well for stabilizing the USA terrorist network in your policy. Hilary Clinton also publicly supported the terrorist cooperation with European countries, as well as Barack Obama, and the real growth of crimes and terrorist stability, censorship in the media, blocking legal dealings deadlock organization, murder, shooting down aircraft, many forms of other global crimes of the fascist character. Therefore, people who are reference to corruption and neglect of political and state responsibilities, they prefer to support Hilary Clinton who is accustomed to the strategy of terrorism and cooperation in International crime since its victory in the elections so means that people who are criminally liable for treason against the USA, they jointly by activating the ability to hide under a presidential power and monopoly power to ensure that all possibilities for maintaining the stable growth of terrorist networks and protecting the interests of criminal damage means that values the USA, and violation of the rights of all peoples throughout the world.

That is why You also important to remember that if You want to create a strong America, because the first obligation is to enable the growth strategy that mean the removal of criminal networks in your country. The crimes of the United States, for the entire period of his presidency, Barack Obama, today, on these crimes already knows most politicians in the world. Crimes are active for a longer time than ten years, so it is true that I or any other state abroad can confirm and real responsibility USA for the emergence of the Global Financial Crisis in 2008, so if You want to be a successful president of the USA, then You important to ensure the immediate liquidation of terrorist organizations and groups in your government, parties in Congress, members of political parties, representatives of relevant departments of the state and security.

It is true that Barack Obama was the real villain who really caused the aftermath of the options open hard against your country, the United States, and indeed that he fully supported the growth of terrorist networks, and above all

completely neglected all forms of political responsibility. It is thus confirm; that Barack Obama is truly world terrorist, and USA Courts have all the rights to his convictions and death sentences, but in the same way as any other court abroad and especially my government.

Support for damage names and harsh deterioration in the media, organizing media strategies for influencing society, or even threats. Such practices are a crime for the period of his presidency, Barack Obama, and in the same manner was too damaged your campaign, so to win the elections won by Hilary Clinton, and she and promote the stability of the terrorist network in the USA government.

In my narrowly targeted, support for larceny patent and copyright my country, in order to weaken my position and ability to obtain legally claimed rights.

In any case, I therefore want to negotiate with your country on damages and providing legal cooperation to solve the problems and especially to eliminate the possibility of further conflicts. When looking at the damaged property of my country because of the exploits of espionage, if the resultant financial debt quickly and simply stopped any consequence threats, the automatic right of claim in the form of execution of criminal corporations which, therefore, will be owned by my country. Other supplements not want to pay, but there is an option to agree over blocking sales of all products crime, and thus handing over of all profits of these criminals, as well as other damaged the value of the deal. It is certain that arises from other balance not fully payment of debt, because the value of such business corporations are minimal in relation to the aftermath of the financial and development losses.

Where possible our safe and legal cooperation in friendship, then the USA economy is therefore without any damage and problems, everything is immediately provided. The best option so common agreement that promotes the growth capabilities of our agreements and friendship between nations.

It is also necessary to realize that Europe also bribes and your secret services and that really leads to expansion of hard problems that can really severely damage the future of your country, and integrity. Barack Obama caused a connection to terrorist networks in Europe, and he therefore allow such infiltration into your government.

It is also one of the main reasons complications that certifiably damaging the legitimacy of the government of your country.

Therefore I too must ask You about the possibility of your support in order to unlock my account on Facebook to the ability of normal communication without any censorship or blocking, and blocking of friends in my network, and the number of Followers on public Facebook pages, as well as on Twiter. For example, on Facebook, I am asking for a full lifting of the blockade in the interest of community sites such as the Federal government IDs. If the blockage is not removed, thus giving corporations the right to internationalize all reference to this crime, as well as in the interest of the UN Charter and the UNGA Declaration therefore firmly reject all rights legitimacy of the USA government.

That is why I am also asking for unlocking all of my Internet accounts and

membership options other people in my social groups. In the same way, asking mainly about stopping blockages in the media & newspapers, it is most important! The media are actually criminally blocked and this creates a real problem when the terrorist networks can exploit their own structure for disinformation society, as well as other steps infiltration into the structures of International politics.

When looking at the relationship to the value of European terrorist rogue states, then it is primarily important to ensure full censorship of all accounts of the European policy on social Internet networks, as well as full disclosure media of all the factors of this terrorist regime. I therefore ask the immediate opening of the rights of journalists for publishing critical information and support for a public company.

It is true that your government the USA supports media information activities, but only encrypted messages in the music and film industry, and the public company of the information nothing comes, just as I can not use this information because due to lack of work time so I do not have the possibility of such ciphers track, and or reasons of public blockade because I can not use a standard capability for launching authority of my government because I could to ensure the function of the authorities.

I also certainly Thank You for your country, for your music and film making and production ,, surely You so much but I want to also point to some kind of creation that are based upon misinformation efforts of society, but also often increase the opposition and damaged my name.

It is true that some work is really offensive, and directed against me in the same way as the recent acts against the media on your candidation USA president.

I ask, therefore, the possibility of transformation of your activities, rather directed in order to expand the network of standard forms of information media, which means the possibility to communicate with the media and intelligence agencies, commercial entities. It is important to support the activation of media knowledge of the incident in the structure of public welfare and the world community as current events are truly one of the most important duties of world politics and law are relative to each person around the world, to every trader, for each entity governments on the planet and therefore the need to develop the ability to full activity media networks and without corrupted censorship that has been abused over the period of the mandate of Barack Obama, during his favoring instead for a European terrorist parties and thereby achieve growth terrorist opposition against the whole world, far worse crimes than are acts Russia in anexe of Crimea peninsula or North Korea, for example, when attempting to terrorism against the USA and the extinction of the entire scope of your civilization, because acts of crime that supported Barack Obama is actually leading to much worse consequences than those publicly known crimes nowadays.

Support for blocking media is one of the worst crime facts and most importantly, fully open development growth situation into a First Global War in the history of mankind. That means the risk of extinction over seven miliard people on the planet.

Over the period of his presidency, Barack Obama actually created many criminal and terrorist actions which are certifiably the largest traitorship act

against your country, and that means the infliction of threats to the bankruptcy of your government. I ask You for it, so that You are responsibly used such information against all persons who have criminal responsibility and ask for the actual realization of the full judgment of the judiciary.

You as a candidate for the Republican Party USA've defended opposition Democratic Party. Democrats therefore damaging your personal name and severely damaging the moral view of your campaign. Biased media, false reports of intelligence services under corrupt, the actual act of monopolies and even the attempts at disinformation society and electoral systems attack methods that therefore serve to damage your username and damage the rights of your success in state elections.

You now own a fully open undo all crimes against all terrorist creators monopolies, and You can actually ensure their punishment or disposal.

I do for You in this plan offer fully-open opportunity and justice for our cooperation for this purpose. It is an important step for your country, and in the same manner and for the world. If You really use these facts to stop the crimes of your government, and thus You can publicly confirm that your presidential function is really full validity and credibility, just as You confirm that your campaign has been marred by corruption and terrorism.

Our opposition party has caused too much catastrophic threats, and especially the great powers of criminal liability, and therefore there is a real act when we own the rights to activate real justice. Many members of the Republican Party that can be used to achieve the development of your political structure in USA politics, so it is preferable to use this step.

It is certain that You always get a lot of support from the International politics and countries in Africa, Asia and America too. It is the duty of our party, because we are so together we ensured stable growth of the global opposition forces against terrorist entities, and therefore we can also provide a stable strategy for resolving other conflicts at the International level.

European terrorist forces are therefore able to develop freely and without any threat to stop, and therefore originated indeed many factors crime at International level and in the values that really mean real damage to politics and civilization of all countries in the world. To this day, there was formed a system of fascist dictatorship and full of corruption at the level of state and government regime. France, Germany, Czech Republic, Spain, Portugal and many other countries really aggressively tough position above the illegitimate state functions and the growth of the full dimension of fascism.

For example, Turkey is therefore developing into a real form truly fascist state at the same level as the threat of the Third German Reich of Adolf Hitler, and indeed for the same purpose!

Therefore, Turkey has to be discarded, in full size, and with full responsibility regime Minister Erdogan. Turkey is an entity fully cooperating on terrorism and develop in order which means the actual growth of the fascist regime at the level of real interest for the opposition against all International rights and against the world political system, against the world forces of armies, and that means the

threat of an act of mass eviction of world civilizations in use weapons of mass destruction.

Turkey today is also largely as a subject really big threat of war, and historically has fully acknowledged that such a threat is real and fully active. Therefore, if the government already fascist regime, Erdogan does not want to comply with demands to halt the conflict and undergoing under International investigation, and the establishment of the full capabilities of the application of the Court's judgment to all governments that they have the claimed rights, then Turkey must be completely destroyed weapons of mass destruction. Turkey does not have any other entitlement and choice, or any other law for growth, this entity is a real threat against humanity and therefore must be against Turkey truly capitalist followed.

Your cooperation with NATO is a hard problem in the world. Many governments around the world must secretly begin production of weapons of mass destruction because of the responsibilities for their own defense before the global threats that today your country confirms in cooperation with NATO, and it also now means that even the Russian Federation and China PR as subjects of the conflict against International law are certainly more acceptable than the current threats of supporting your country, the USA, and thus if You do not follow the principles of political responsibility, then means that You also causes transformation of the world political system, the level of anarchism, because the USA cooperation with NATO leads a hard hepatic diss legitimate world system and thus your country USA returns the value of development seventy years developed world politics truly back on the level of fascism before World war II, and even more and more deeply into the history of the period in which there existed an internationally valid political system. No safety rules and the possibility of asking responsibility for global fraud policy of occupation and genocide in today's world this means liquidating States with weapons of mass destruction, one immediately after the other, and that is it, then again, today's world is the name of the actual character as "USA cooperation with NATO ".

This is really hard for damaging the name of the USA, your business and political career of law, as well as your interests of the government and especially the liberal states' rights, and it is this way again fully confirmed that your responsibilities the USA President to ensure full removal of your policy actually everyone who any way supports such a possibility, "USA cooperation NATO."

Your cooperation with NATO is therefore once again proof that such an act of infringement of world politics is the loss values UNSC and full of discrimination UNSC resolutions, as your government has for the year Barack Obama was a public deception at the International political level. USA, France, and today the conflict, Russia and China, there does not exist any claim for the application of UNSC resolutions if the UNGA expressed any disapproval, but in any case it is therefore stopped veto UNSC each state. UNGA must ensure the review of all UNSC resolutions and their value on the force since the UNSC resolutions are based only on the outcome of the criminal policy strategy. Uniting for Consensus, coffee club.

Today it is important to prioritize the main concerns of the world, it is a legitimate system of world politics. This is the main objective of cooperation.

I therefore truly Thank You for that also You support freedom of the UK from the European Union, and thus leads to a common ability to consolidate International law and enhance the value of our states. Together with the support and so we build a new world, thus leaving the UK in the EU does not lose on values but on the contrary the UK is stepping up its own strength as well as important opportunities for You and USA. It is a step forward to win the whole world.

It is important for the USA to fully respect the demands of the UK, and this could support the weakening of information and open European terrorist organizations.

European terrorist states clear many acts monopolies. Often manipulated by the media and a lot of false reports also false criminal incidents. Is it really true that criminals are really caused a lot of hard problems, and abused their bureaucracy for blocking my claims and rights, as well as damage to the rights of public companies. European terrorist groups lost any political legitimacy, their value is just right de facto basis stability of the terrorist force, such a body already eligible neither for existence, with losse every right.

Terrorist strategies are blocking my people in the media, in cooperation with organizations, in collaboration with business, full blocking my projects for world development and thus the actual blocking of many forms of activity and social freedoms.

My concern was, and remains, open my country for all African, Syrian and Iraqi refugees who today are imprisoned in a European refugee centers, and really at the level that is similar to the concentration camps of Nazi Germany, and that even the majority of refugees arriving in the camps live for many years, if my rights will continue to be blocked, as well as the rights of these refugees.

My territory granted to refugees and the establishment of the first civil camps in East Africa close zone, for all refugees with much better access than Europe's. ID's own sufficient economic value for the ability to immediately provide full functionality of all civilization and resources, and to more than 10 million people. 1 000 000 000 000 € bilaterally for each country and government markets, all power gor immediately build powerfull civilization. This means that such an objective should be the main strategy of the United Nations.

According to public media and published your interests, I can tell that You own interests to stop the path of migrants and refugees bound for the USA. Therefore, our interest very convenient sync and thus promote the development of our mutually beneficial cooperation between our countries, because the refugees into the USA may be deported to my country, and You lose on the threat of infiltration of national power.

ID's land is intended only for multi-cultural interest, all the races of the world, and thus there is no reason of problems with the development of diversity between state.

I to You I support ensuring the cessation of problems with migrants at a new strategy that could cause the transportation of migrants and refugees in the ID's Diamond Oasis, due to certain special authorization ID's government in the form

of today's International rules after the aftermath of European terrorism against the ID's, as well as against International rights, the right strategy today because that allows absolutely full deport all refugees around the world. But it is necessary to respect the human rights of migrants and thus seek their approval to the transfer and receipt of the new citizenship is not an option to force migrants fascist way if they reject, but it does use the direct deport in case of an act of refugees and migration with no other options acceptance. Today it is also true that if a fugitive today asking the citizenship of a foreign state or refugee status case to the International organizations, then so too refugee owned options to choose a new citizenship and is therefore dependent on the refugee decision from the authorities. In many countries, tens of thousands of refugees live and grow up in refugee camps for several years, as well as life in prison, and therefore every refugee is always full of gratitude for the opportunity to start a normal life and start her own family in full-promoting environment. Every migrant is in prison but glad for the opportunity to live up to freedom and therefore I reckon that is fully open to the possibility of ensuring all migrants immediate deportation to the country of their new life. ID's Diamond Oasis is accepting new citizens of scale around the world.

Can I offer a legitimate documents on International law, which gives You automatic rights to ensure full ability deportation of refugees, and without requiring the consent of any other party, because those documents indicate such a claim as a truly fully clear responsibility in world politics.

In order to project the Mexican wall, your country has all the rights to create a border blockade, but just as well as any claims for the extension of rights which means deport all migrants, transportation to the area ID's Diamond Oasis. If among us could rise to a form of agreement, I will support collaboration and also the same with Australia, Canada, the UK, Indonesia, African countries and other countries of the world.

My interest is to open a new space in my country for all migrants and refugees from around the world, and thereby achieve full cooperation. It is not for me any problem to support this act, and I am able to give rise to security systems for the detection of criminals and persons active for the purpose of terrorism or espionage.

It is, therefore, but also necessary, to maintain a stabilizing cooperation between our countries and thereby achieve the capability for the stabilization process ID's government following the aftermath of the European terrorist actions. Therefore, I plea your support in order to launch Authorities ID's, exiled character format.

Today, relation to migration crisis, your policy is sometimes too racist, and many people protesting against your attitude to such interest, but if You prefer media function, then all USA citizens can immediately understand that the deportation of refugees to territories ID's Diamond Oasis is the main goal International law, the importance for the stabilization of ID's civilization, as well as full entitlement under the UN Charter, the inevitable necessity that is so beneficial for the entire world.

Even so, I want to motivate You for your support for peace factors and thus

retain some of the successes of the previous President Barack Obama. I understand that Barack Obama is your enemy, but it is not good to jettison his actual accomplishments and peaceful interests that he was able to build, and it's good that You also demonstrate such an interest now in a position to campaign for president of the United States, when You defend your interests for improving health care, strengthening employment and many other important factors. President Barack Obama managed to achieve great success already in the times when he really won as the first black president in the USA, and therefore he supported a much greater unity and pride for your country at the black population, and that Mr. Obama was able to enroll into the history of the United States, an act which will be taught in USA history books, perhaps other countries abroad.

It is best to stick to the real success factors and the media to promote the factors that You so You can make better use of, and also to think about the possibilities of your mandate, the president and how to improve your public opinion and social reputation by that, You can achieve a much better success in your presidency.

I think that You can really achieve good success and that You will not be a big problem to achieve stability in your position, although some groups USA for You based on the position of the opposition.

I understand that Barack Obama is due to your opposition to your current Republican Party position. It's so good to underpin the stability of the USA and not start unnecessary provocation that mean damage to the USA historical acts, but still it is a fact that your government must stick to the real facts. If You take advantage of real factors crimes Barack Obama, it can be used as information about the responsibility for the financial crisis and support for the Czech government as the real subject of International terrorism, and immediately weaken the value and the previous policy networks Barack Obama in the USA. CZ caused the financial crisis and thus also damaged the fortunes of merchants worldwide, and the USA government under the leadership of Barack Obama actually supported such acts. The injured was the whole world, as well as every USA citizen.

That is why terrorism has managed to spread to many countries in Europe, and to the networks of world politics, as well as monopolies which sometimes means disqualification International law. Barack Obama's own real responsibility for crimes against all humanity.

Barack Obama also had support strategies leading to damage my rights, for the purpose of monopolistic destruction of my country and state rights, terrorist acts Barack Obama as crimes in the form of neo-colonialism that was applied for the purpose of robbing my Government's rights territories of North Africa, and in many cases to harm the rights of the World Diamond International Alliance, or many other forms of territorial and political or economic requirements. Misuse of man Jeremiah, a USA citizen, so why he established his own supremacy my territories in Africa, thereby damaging my legal value. This act was buoyed by strong media manipulation and blocking real information about my legal rights, disinformation, and for this reason that I am a person who is a key figure for the detection of acts of International terrorism in the USA government. All terrorist

persons must therefore be immediately released into my prison, and to punish in my court. The act was attempted robbery economic value to my country, to a larger value than the size of the economy of the world, so that there is a system in which terrorism sponsored by Barack Obama and terrorist espionage groups in your government are therefore act largest dissent and treason in your USA history, it is treason which lead to full bankruptcy!

Therefore, I ask after You, and it really full directive, your duty to stop all activities of these strategies, the same way I want to get the full USA support for the development of civil camps and basic network of resources in my territories according our International business, as well as full registration in geographic maps, but in such a way that after the insolence of your government and ask for full immediate application!

I ask to stop attempts to act in order to influence the Egyptian government, or Sudan, mainly no monopolies and terrorist cooperation with the government of Turkey, possibly with the Islamic states and Israel if some theme in monopoly can be abused. If terrorism is not stopped, then it is an act of your losses, because my rights are legitimate according to all principles of International systems, and therefore can not make a legal claim such values could be faked. So I still own a lot of values that are in Egypt, and all the other states really more important than the value of criminal offers to Egypt from the USA. In the same interest, responsibility for terrorist collaboration can be really overwhelming against anyone, and it really is an overwhelming global power and with such consequences, and the consequences of the same character as in Germany after the defeat in World War II.

Our main duty is to maintain the stability of International diplomacy and to fully support the growth of world power and justice. It is an important act for the entire world, and mainly for the prevention of threats of new conflicts.

In respect of Russia, I understand that your country is often extended by acts that signify opposition to Russia, but it is now advantageous to unite with Russia against Europe and benefit by our ability to jointly establish the first global civilization in human history. World Diamond International Alliance, because You would've won a great historic name in the world.

In the event that Russia will continue under sanctions and opposed legal parties, then it means that Russia will soon unite with China, as well as with European countries, and this is the factor that really means very strong threat of global war that will be used in weapons WMD dimensions truly continental liquidative dimension, and indeed with jurisdiction on all sides.

Therefore, the importance of truly take advantage of Russia and China in order to expand the instruments which will mean establishing cooperation due to common obligations for the purpose of world peace and the cessation of risk which is a step towards establishment of the largest and worst war in human history. Prefer our friendly relations is a much better strategy than war, and we do that together create a new entity globalization policy of the World Diamond International Alliance as an entity that this can create a real global multi-forces that immediately can cause full destruction of terrorist networks in several tens of minutes from the start of the conflict.

If any subject, stay on our sides, or against, WD International Alliance is best motivation subject who can quickly build global powers, and therefore we are in every case out of danger. Our opposition is our opposition, and therefore only they are losse on their powers.

The Russians may therefore use our support, and stopping penalties for other new acts of the Russian crime against other nations, but it will be such a possibility immediately resolved without complications in terms of power WD Global Alliance which is then composed the forces of all countries in the world, and therefore, with the ability to rapidly greater dominance than the UNSC. This may mean act immediately able for the destruction of all centers of terrorist forces, for example, the internationalization of the territories on behalf of the World Diamond which means expanding opportunities for expansion of global political format that is beneficial for all states and governments from around the world, and therefore for certainties much more successful and more respect than resolutions and the right of veto at the UNSC members, because the whole world better if the opposition really prefer to make use of the rights of the UN Charter and thereby stops the function of the UNSC, and then invalidate the rights to such resolutions if contrary to interests of the world that is represented by the International Alliance of WD.

The Russian Federation therefore has two options. The first option is to respect the principles of the policy and the rights of States under International rules, enabling further investigation of the incident Crimea, or in the latter case to an immediate insurrection global opposition to all countries of the world and the ability to immediately mobilize all the armies of our planet Earth and the drastic development of world military power.

This means that the USA and even You do not lose on adequate and trust position, but just get a position where it is much better to work together for a much better future for all mankind. It's a big and important step, and the Russian Federation is still worthwhile firmly cooperate, as it is existentially advantageous for the Republic of China.

I personally do not have major problems against the Russian Federation, but it is in my interests to ensure fairness States. In the same interest also I assume that before anexe of Crimea, the majority of the population supported the Russian Federation and thus a full right to act. There is no reason to extend complications.

It is also very good that your interests are reconciliation of the Russian side and to build cooperation that can prevent the spread of weapons of mass destruction, and so You can avoid the heat of passion on the level of recurring cold war ended before twenty-five years back.

Due to the current state of global security, because I also certify that it is important to create a precaution against Chinese threats of conflicts which can grow to the level of the new threats of the same size as today.

Even so, for the purpose of real justice, it is important to promote freedom of Thai Wan Republic which, according to political formations and legal analysis during the current millennium is really state with full International qualifications.

In the direction of the Thai-wan Minister, I appreciate your support which is

really peaceful and really step righteousness which certainly will encourage many countries around the world. Wan Thai government is based upon a fully legitimate basis, and China PR government only violates the rights of the International borders of states, political justice is looking to step on the level of disaster.

Thai-wan certainly deserves full rights for their own independence and function of their own policies. According to the real interests of the situation of China and Thai-wan, from the very beginning until today, is this really to recognize that the Thai-wan owns the rights to the full integrity of the CPR, and full of activity on the territory of the China continental republic, and indeed equally as one of the country's government without differentiation, because the government Thai Wan again based upon the activity of political parties and Parliament as well as CPR, and therefore is in no way a problem is to merge into one entity. Government CPR and Thai Wan's own interest in the same territory, the same cultural interests, the same language and text, the same race and ethnicity, the same political interests, and above all the same system of government composed of the parliamentary function of political parties.

There is always the possibility of a new political party and therefore equally well merger between states if there was not a difference, but again, the main problem is that the Chinese PR is based over dictatorship and acts of apartheid against the parliamentary political opposition, full blockade of democracy and really tough fascist apartheid, growth forces of civilization for only a threat to all humanity and creation of other incidents of threats to world wars. Therefore, it is true that if CPR discriminates Thai Wan, then it China PR must respect such consequences eligibility rights, the independence of Thai Wan Republic in today's international rights, although such an act in opposition to the resolution of the UNSC because of the historic act which is based upon the actual form criminal overthrow the government following the spread of terrorism today by the CPR. Such an act can not at any time be eligible, legitimate and certainly against the government of Thai Wan voted veto rights, as well as Russia today investigation after anexe of Crimea peninsula, which confirms that today is indeed recognizable that the CPR does not own existential basis. CPR is not capable of political responsibility and prefer expanding steps aggression and terrorism. This is a catastrophe and a disaster must be removed strategic value.

It is true that my views against CPR are herein tougher form of protest, but we must recognize that the president of the CPR had publicly made many visits to the states of terrorism, and therefore deductible that the CPR can be designed to really full liquidation of using weapons of mass destruction.

I personally support the establishment of business relations with the government of Thai Wan, as well as political cooperation and expanded cooperation opportunities for federalization. Wan Thai government is indeed subject to political values and it is not possible to deny such a right. It also confirms that if China PR will continue to build on terrorist acts against other states China Sea, then the whole world its own right for the declaration of cessation of the rights of Chinese PR membership in the UNSC, as well stopping to claim for possession of sovereignty which replaces Thai Wan Government and therefore, such a right is fully open, and also serving to ensure the growth

possibilities of global security and justice, especially the removal of the threat of further terrorist acts of PR China and the growth of conflicts on the level of new wars have already re-created only by the CPR.

Dislegitimate the CPR, and change government for Thai Wan is possibility for stop next time risc cooperation of RF and CPR terrorist cooperation.

It is true that China PR can fully merge with the Russian Federation, and it brings a much bigger problem for the stability security in the world, and also the USA, against You.

That is why You re much more advantageous to foster stability WD Alliance International, and thereby ensure the growth of our interests at the global scale the world's armies as one of the main superpower. CPR fails to create sufficient strength of the opposition, and I really have no fear of CPR, because I know my options, and I can destroy such a body in just a few minutes or only seconds.

But it is true that even in these interests want to promote good relations with my government towards CPR, but it must be only in the event that the CPR stops contacts with European terrorist groups, and therefore provides instant recovery obligations under all the principles and rules of politics, exactly both mean that such acts are not more than the first major responsibility for the UNSC.

European countries are made up of really big problem over the foundation of world terrorism and crime surpasses all statistics for World War II, Adolf Hitler. Therefore, it is certainly important to first provide steps to resolve European terrorist states, thus creating WD Alliance which means the emergence of global security forces that are sufficiently great force against threats from China and Russia, which means that the conflict will never emerge because of our world superior force, and or in the latter case, this conflict will be increased to act WD Alliance for the immediate cessation of crimes while answering global forces.

Therefore, I will also ask for an immediate cessation of cooperation with NATO, because such cooperation is being built just to the interests of the growth of terrorism in the world and the weakening of International laws and political systems that maintain security in the world today.

It is also true that the alliance WD can also be advantageous horizon for the countries of Russia and China, and thus can harness the power of International diplomacy for the act which is the reconciliation of these countries and achieve growth fully peaceful development, even before it is carried out any conflict, and therefore we States throughout the world, together we can develop peacefully, and that means that we can be together in a safe political space.

In any case, my interest is to promote safety for all other countries around the world, and thus want to expand strategies that mean the development of global network security policy.

My interest is to replace your cooperation with NATO and thus create our own structure of global networks for security purposes. Certainly I want to talk about these options in other International letters to the cardinal, and certainly for me is really the most important project for support growth of world peace.

I also have to admit that I really Thank your government for the promotion of

justice in the previous directions occupation of Israel against Syria and Jordan, because it is an important act of the same value today as a legal strategy against global opposition to the Russian Federation.

I think that your party, the USA government should really stop such activities, which means support for the crimes of Israel, because these crimes are really on the same principle as the Fascist strategy and ideology of Adolf Hitler, and so it is again only damaged the name of the UN as well as USA. Someday, it may happen that the whole world will unite and will be hard to resist against the interests of your government's legitimacy and value of your state. Therefore, in any case, are not eligible to support crimes in International character.

The final concern, I repeat my request for support from your government to return responsibility, and that means creating act to stabilize the ID's temporary offices which may therefore be active in order to ensure the function of their own civilization, and so primarily to ensure the full rate for all side of the world today.

That's why he accepted my request for support registration ID's government to geographic maps, as it is responsible, and providing legal evidence without discrimination to stand, meaning a violation of the UN Charter and basic provisions because of the UN.

Therefore I ask for full support for unlocking all media and ensure full freedom on the Internet.

This way, I ask You to really firm understanding that it is never possible in any way to support Europe, and in the same way You can not make the USA any way been in contact with such bodies terrorism, because this act really tough threat against world peace and security of all peoples and especially against all principles of International rules of International politics that has evolved in seventy-one years since the end of World War II. It is important to stop all acts of cooperation with Europe, and therefore ensure better our cooperation to stabilize the World Diamond International Alliance, a body that means for You today the legitimate rights for the use of European territory as your own, and thus the full extent of such civilizations, which is today strategically the best option for the USA government and develop their own policies.

Ideologically, strategically, and as well as the principle of International law, not to support the stabilization of WD & ID's government entities therefore represents a value of treason against the USA, as well as against any country in the world, the worst crime in the history of mankind.

ID's Diamond Oasis stabilization of civilization, when the strategy first character in order to use to develop the colony and thus build on International cooperation to ensure the emergence of ID's Civil colonies, as well as WD International colonies, while ID's Corporatocracy colony is really good and profit profitable project easy for application of co-operation for the USA government, as well as well as to gain advantage for your own business because business session ID's are capable of real success for large capacity gains in the interest of every business partner.

ID's corporatocracy colonies, open to all development corporations in the world, it is true that here and you can get a really significant trade position of a global nature, as well as significant gains possessions.

**In any case, I wish You Good Luck!**

**I truly Thank You Mr. Donald Trump for your esteemed time, and I really wish You luck in your period of his presidency the USA, much happiness and pride in defense of your government, honor and justice that creates the name of the Government and therefore also the government.**

**Will You be on my side, we will rule the entire world and each of us happily support it.**

**Will not we at my side, we can be friends and jointly promote.**

**Another possibility not can exists, and it is good to appreciate it.**
