*The clueless scientist who cannot see the hidden satanic dual-face of Arsenic-HIV behind the Covid19 drama will be completely baffled, frustrated and will fail to understand what is going on and why and what to do about Covid19.*

*-Dr Manish Agarwala*

*Then ye shall see the Truth and the Truth shall set you free.*

*-Bible. John 8.32*

*Aude Sapere (Dare to be wise)*

*-Dr Samuel Hahnemann*

THIS PAPER SHOULD BE READ AS AN ADDENDUM TO MY RESEARCH STUDY ON COVID-19: *'Arsenic' - The central pivot around which revolves the entire drama of covid-19 - A unique analysis for the first time...* ALL STATEMENTS MADE HERE ARE WITH REFERENCE TO THIS RESEARCH STUDY.

IN MY ABOVE SAID RESEARCH STUDY ON COVID19 – I HAVE CITED REFERENCES OF ANIMAL/HUMAN CLINICAL TRIALS PROVING THAT POTENTIZED HOMEOPATHIC ARSENIC TRIOXIDE (ARSENICUM ALBUM) WORKS – EVEN THOUGH IT DOES NOT HAVE A SINGLE MOLECULE OF ARSENIC TRIOXIDE!

**THE SINISTER SIMILARITY BETWEEN ARSENIC POISONING SYMPTOMS  
AND  
THE SYMPTOMS OF COVID-19 AND HIV INFECTION  
A UNIQUE DISCOVERY FOR THE FIRST TIME**

In my previous Research papers, I have clearly established the connection between Arsenic/Arsenic Trioxide and Covid-19. Here, I will establish the connection between Arsenic and HIV. It goes without saying that the connection between Arsenic-HIV-Covid19 will be crystal clear...

**1) The Symptoms of Acute Retroviral Syndrome (ARS) after HIV infection mimic Arsenic Trioxide Poisoning:**

**Symptoms of acute HIV infection can include:**

rash

fever

chills

headache

fatigue

sore throat

night sweats

loss of appetite

ulcers that appear in the mouth, esophagus, or genitals

swollen lymph nodes

muscle aches

diarrhea

Ref:<https://www.healthline.com/health/acute-hiv-infection#symptoms>

Also see the Symptoms of Acute Retroviral Syndrome (ARS) here:

[https://www.researchgate.net/figure/Clinical-manifestations-of-acute-retroviral-syndrome\\_fig3\\_223961113](https://www.researchgate.net/figure/Clinical-manifestations-of-acute-retroviral-syndrome_fig3_223961113)

A quick look at these acute HIV symptoms, in context of the immunosuppressive role of HIV and incidents of tuberculosis & cancerous lesions in AIDS patients - reminded me of just ONE Homeopathic remedy - Arsenicum Album (potentized homeopathic Arsenic Trioxide). I did not feel the need to refer to the materia medica or do a repertorization. It is clearly evident. I wonder why learned Homeopathic teachers worldwide did not declare Ars. Alb. as the Genus Epidemicus of HIV in last 34 years and successfully CURED it. Classical Homeopathy could have prevented these 32 million deaths due to HIV and proven that Classical Homeopathy (IF USED IN THE CORRECT WAY) works where everything else fails!

The similia of acute HIV symptoms (and AIDS) with Ars. Alb. can be verified by careful repertorization using Zandvoort's Complete Repertory OR simply refer to Kent's lectures on Arsenicum Album & Farrington's Materia Medica. The similarity between Arsenic Trioxide poisoning-HIV/AIDS-Covid19 will be crystal clear!

However, to avoid being called biased by the Homeopaths and to satisfy the western medicine doctors – I am pleased to present more evidence.

Quoting from:

<http://chemocare.com/chemotherapy/drug-info/arsenic-trioxide.aspx>

**The following side effects are common (occurring in greater than 30%) for patients taking Arsenic Trioxide:**

Nausea and vomiting

Cough

Fatigue

Fever

Headache

Diarrhea

Shortness of breath

Sore throat

Rash

Heart rhythm changes (seen on EKG tests)

Joint pain

Chills (see flu-like symptoms)

Anxiety

Shivering or a sudden feeling of cold

**At one glance, it looks like a symptom picture of Acute Retroviral Syndrome AND Covid19 too!**

**2) I have already discussed the connection between Covid19-Cancer-Tuberculosis-Arsenic in my previous research study on Covid19. I have also established that both Arsenic toxicity and Covid19 cases may present with Encephalopathy. Incidents of Tuberculosis, Encephalopathy and Cancerous lesions in AIDS cases are well known. This is extremely strong evidence in favour of Covid19-Arsenic-HIV connection.**

Kindly refer to my Covid19 research: *'Arsenic' - The central pivot around which revolves the entire drama of covid-19 - A unique analysis for the first time...*for reference citations. Quoting a few references related only to demyelinating Encephalopathy in HIV cases, Covid19 and Arsenic toxicity here:

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3548569/>

<https://www.ncbi.nlm.nih.gov/pubmed/32171569>

<https://www.sciencedirect.com/science/article/abs/pii/S0002934387904608>

<https://pubs.rsna.org/doi/10.1148/radiol.2020201187>

### 3) LOSS OF TASTE AND SMELL...

In my Covid-19 research – I have presented evidence related to the peculiar symptom of loss of taste or smell in Covid-19 cases and proved the occurrence of similar symptoms in Arsenic Toxicity cases & also by repertorization. Thereafter, after considering several peculiar symptoms and relying on the Classical Homeopathic concept of PQRS (peculiar, queer, rare, strange) symptoms as the final confirmation for the remedy [Aphorism 153] – I have declared Arsenicum Album as the similia & Genus Epidemicus of Covid19.

*If there is a connection between Arsenic, Covid19 and HIV - Do HIV cases show similar loss of taste & smell?*

Check...

#### **Taste and smell loss in HIV infected patients**

<https://www.sciencedirect.com/science/article/abs/pii/S0031938495000490>

==

*Are you convinced about the similarity & connection between Arsenic-Covid19-HIV? Do you agree that Arsenicum Album is the similimum and Genus Epidemicus both for Covid19 and HIV? If you are still not sure – let's check for more evidence. Now let's look for a really rare and unusual symptom – a true PQRS that will finally nail it as per Aphorism 153 and the western medicine doctor will also be compelled to acknowledge the strange connection. It's more than a coincidence, my dear...*

==

### 4) RHABDOMYOLYSIS...

In my Covid19 research study, I have proved the connection between Covid19 and Arsenic Trioxide with reference to the extremely rare condition - Rhabdomyolysis being reported both in Arsenic toxicity cases and also in Covid19 and thereby confirmed that my choice of potentized Arsenic Trioxide (Homeopathic Arsenicum Album), as the Genus Epidemicus of Covid19, is the perfect choice.

*“Rhabdomyolysis: This is an extremely rare condition, but it’s one that COVID-19 researchers are monitoring. In rhabdomyolysis, the muscles break down and tissue dies. As cells fall apart, a protein called myoglobin floods the bloodstream. If your kidneys can’t flush it out of your blood quickly enough, it can overwhelm them and cause death”.*

<https://www.webmd.com/lung/coronavirus-complications#2>

<https://www.cureus.com/articles/30228-rhabdomyolysis-as-a-presentation-of-2019-novel-coronavirus-disease>

<https://www.ncbi.nlm.nih.gov/pubmed/32197060>

#### **DO HIV CASES PRESENT WITH RHABDOMYOLYSIS?**

Check...

#### **Severe Rhabdomyolysis as an Unusual Presentation of Primary Human Immunodeficiency Virus Infection**

<https://academic.oup.com/cid/article/32/3/502/284213>

[https://www.amjmedsci.com/article/S0002-9629\(15\)32759-2/pdf](https://www.amjmedsci.com/article/S0002-9629(15)32759-2/pdf)

<https://www.cureus.com/articles/13591-severe-rhabdomyolysis-as-an-unusual-presentation-of-primary-human-immunodeficiency-virus-infection>

***In my opinion, the above analysis confirms Arsenicum Album as the most suited Genus Epidemicus of covid-19 as well as HIV with many striking, uncommon, peculiar-queer-rare-strange (PQRS) characteristic signs and symptoms.***

*However, let’s check for more evidence...*

## **5) IMMUNO-SUPPRESSION...**

If there is actually a connection between Arsenic and Covid19 and HIV – both Covid19 and Arsenic MUST show signs of Immuno-suppression like the Immuno-deficient HIV case.

Check...

Please refer to the 13 reference citations in the chapter: THE SINISTER CONNECTION BETWEEN ARSENIC AND VIRAL INFECTIONS (page 12 to 17) and the 6 reference citations under the heading: ARSENIC DOES ALTER IMMUNE RESPONSE TO VACCINES (page 64-65) in my research study: *'Arsenic' - The central pivot around which revolves the entire drama of covid-19 - A unique analysis for the first time...*

AND...

COVID-19 is associated with significant drops in CD4 count

<http://i-base.info/htb/37431>

<https://academic.oup.com/cid/advance-article/doi/10.1093/cid/ciaa248/5803306>

*The above analysis confirms the peculiar similarity & connection between ARSENIC-COVID19-HIV and confirms Arsenicum Album as the most suited Genus Epidemicus of Covid-19 as well as HIV with many striking, uncommon, peculiar-queer-rare-strange (PQRS) characteristic signs and symptoms.*

*Since, crude Arsenic Trioxide has immunosuppressive effect and increases Viral infectivity – it is postulated that the application of potentized Homeopathic Arsenic Trioxide (Arsenicum Album) is likely to have the opposite effect and will raise the immunity and decrease Viral infectivity.*

==

## **A WARNING NOTE...**

Kindly refer to the discussion on Hypoxia in Covid19 cases in pages 19-26 of my Covid19 research study - *'Arsenic' - The central pivot around which revolves the entire drama of covid-19 - A unique analysis for the first time...* Here, I have discussed the Covid19 Hypoxia paradox baffling the western medicine doctors and have stated:

*"Arsenic like all other poisons can also be a tonic or medicine. It all depends on the DOSE, CONSTITUTION, PHASE OF ACTION OF THE SUBSTANCE AND STAGE OF DISEASE! A very detailed discussion on this is beyond the scope of this work and so, I am merely quoting the 'Arndt Schultz Law For poisons' which states that – "for every substance, small doses stimulate, moderate doses suppress, large doses kill". This Arndt Schultz law is about the crude phase of the substance and the potentized Homeopathic remedy works in the dynamic phase".*

The principle of 'Arndt Schultz Law For poisons' applies to the immunological effects of crude Arsenic Trioxide too and is likely to baffle the doctors of western medicine oblivious of some of the fundamental laws of nature.

The use of crude Arsenic Trioxide for anti-cancer treatment & in HIV cases is not advisable because of its toxicity and other detrimental effects. Moreover, the myriad variations and paradoxical nature of the effects of the crude drug (particularly, if the crude drug is the similia) may baffle the western medicine doctor just like the patients of Covid19 showing inexplicable high tolerance for Hypoxia.

*Sounds like some mumbo-jumbo from a Homeopath? Let's see...*

### **Arsenic Exposure and Immunotoxicity: a Review Including the Possible Influence of Age and Sex**

*"Increasing evidence suggests that inorganic arsenic, a major environmental pollutant, exerts immunosuppressive effects in epidemiological, in vitro, and animal models....We performed a review of the experimental and epidemiologic*

*evidence on the association of arsenic exposure and immune diseases. The majority of the studies described arsenic as a potent immunosuppressive compound, though others have reported an increase in allergy and autoimmune diseases, suggesting that arsenic may also act as an immune system stimulator, **depending on the dose** or timing of exposure".*

<https://jhu.pure.elsevier.com/en/publications/arsenic-exposure-and-immunotoxicity-a-review-including-the-possib>

==

**The best way to end this HIV or Covid-19 immunological drama (very similar to the crude Arsenic drama, actually) that perplexes and baffles the western medical specialists is by applying Arsenicum Album in the potentized Homeopathic form and benefiting from its dynamic phase of action that will reverse all kinds of effects/variations/complications of Covid-19 or HIV symptoms completely.**

**ANY EVIDENCE OF A DIRECT CONNECTION BETWEEN  
CRUDE ARSENIC AND HIV  
THAT CAN CONFIRM THE USE OF  
POTENTIZED HOMEOPATHIC ARSENICUM ALBUM  
AS THE PREVENTIVE AND CURATIVE GENUS EPIDEMICUS OF HIV INFECTION?**

The connection and similarity between Arsenicum Album (Arsenic Trioxide) and Covid19 has been confirmed in my research on Covid19.

**Here, I proceed to document the direct effects of crude Arsenic on HIV and thereby confirm that the application of potentized Arsenicum in Homeopathic form will have the opposite effect.**

==

**Crude Arsenic Trioxide or As<sub>2</sub>O<sub>3</sub> (crude Arsenicum Album) increases the infectivity of HIV by various mechanisms.**

**See here:**

*“Dendritic cells are central to the early events of human immunodeficiency virus type 1 (HIV-1) transmission, but HIV-1 infects dendritic cells inefficiently in vitro compared to activated CD4 T cells. There is a strong postentry restriction of HIV-1 infection in dendritic cells, partly mediated by the cellular restriction factor APOBEC3G. Here, we reveal that arsenic trioxide markedly increases HIV infection of immature and mature dendritic cells as well as blood-derived myeloid dendritic cells in an APOBEC3G- and TRIM5-independent way. Our data suggest the presence of powerful, arsenic-sensitive antiviral activities in primary human immune cells of the dendritic cell lineage”.*

<https://jvi.asm.org/content/jvi/81/21/12086.full.pdf>

## **As<sub>2</sub>O<sub>3</sub> Enhances Retroviral Reverse Transcription and Counteracts Ref1 Antiviral Activity**

*“Recently, it was reported that As<sub>2</sub>O<sub>3</sub>, a drug used to treat acute promyelocytic leukemia (PML), stimulates HIV-1 replication. We found that As<sub>2</sub>O<sub>3</sub> accelerates the kinetics of a spreading HIV-1 infection in human T cells and increases the number of cells bearing HIV-1 provirus after a single round of infection”.*

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC149754/>

## **Arsenic Counteracts Human Immunodeficiency Virus Type 1 Restriction by Various TRIM5 Orthologues in a Cell Type-Dependent Manner**

*“Arsenic trioxide (As<sub>2</sub>O<sub>3</sub>) increased human immunodeficiency virus type 1 (HIV-1) infectivity when particular Homo sapiens and Cercopithecus aethiops cell lines were used as targets. Knockdown of human TRIM5 $\alpha$  by RNA interference eliminated the As<sub>2</sub>O<sub>3</sub> effect, demonstrating that the drug acts by modulating the activity of this retroviral restriction factor”.*

<https://jvi.asm.org/content/80/4/2051>

## **Cytoplasmic Recruitment of INI1 and PML on Incoming HIV Preintegration Complexes**

*“During the early phase of the retroviral life cycle, only a fraction of internalized virions end up integrating their genome into the chromosome.....incoming retroviral preintegration complexes trigger the exportin-mediated cytoplasmic export of the SWI/SNF component INI1 and of the nuclear body constituent PML...the HIV genome associates with these proteins before nuclear migration. In the presence of ARSENIC, PML is sequestered in the nucleus, and the efficiency of HIV-mediated transduction is markedly increased. These results unveil a so far unsuspected cellular response that interferes with the early steps of HIV replication”.*

[https://www.cell.com/molecular-cell/fulltext/S1097-2765\(01\)00255-6?returnURL=https%3A%2F%2Flinkinghub.elsevier.com%2Fretrieve%2Fpii%2FS1097276501002556%3Fshowall%3Dtrue](https://www.cell.com/molecular-cell/fulltext/S1097-2765(01)00255-6?returnURL=https%3A%2F%2Flinkinghub.elsevier.com%2Fretrieve%2Fpii%2FS1097276501002556%3Fshowall%3Dtrue)

## **Molecular Insights Into HIV Biology**

*“Recent studies have revealed a mechanism by which the target cell defends against the HIV intruder.(23,24) Within 30 minutes of infection, select host proteins including the integrase interactor 1 (also known as INI-1, SNF5, or BAF47), a component of the SWI/SNF chromatin remodeling complex, and PML, a protein present in promyelocytic oncogenic domains, translocate from the nucleus into the cytoplasm.(24)(Figure 2) Addition of arsenic trioxide sharply blocks PML movement and enhances the susceptibility of cells to HIV infection raising the possibility that the normal function of PML is to oppose viral infection.(24)”*

<http://hivinsite.ucsf.edu/InSite?page=kb-02-01-01>

### **MY COMMENTS:**

***Since, crude Arsenic Trioxide has immunosuppressive effect and increases HIV infectivity – it is postulated that the application of potentized Homeopathic Arsenic Trioxide (Arsenicum Album) is likely to have the opposite effect and will raise the immunity and decrease HIV infectivity.***

==

## THE PERILS OF USING CRUDE ARSENIC TRIOXIDE IN CANCER AND HIV CASES

In the chapters 'DOES COVID-19 CAUSE HYPOXIA OR DYSPNOEA' and 'THE VACCINE FOR COVID-19' in my research work: *'Arsenic' - The central pivot around which revolves the entire drama of covid-19 - A unique analysis for the first time...* I have discussed at length the paradoxical effects of the crude poison (Arsenic Trioxide) as per the Arndt Schultz Law, the role of the Similimum and the importance of dose. It is utmost important that the Similimum be applied in 'minimum dose' [potentized remedy] for proper immunological response and prophylaxis.

In case of HIV – the similia is Arsenic Trioxide and it needs to be applied in 'minimum dose' to cure HIV infection. However, the allopathic experts are unaware of the fact that Arsenic Trioxide is the similimum for HIV and a materialist crude drug prescriber allopath is not expected to know about the use of a remedy in minimum dose (potentized remedy).

As per the allopathic viewpoint: Crude Arsenic trioxide is a chemotherapy drug and is also called Trisenox or ATO. It is a treatment for a type of acute myeloid leukaemia called acute promyelocytic leukaemia (APL) and as per some recent research studies – the allopathic experts have found Crude Arsenic trioxide + anti-viral drug combo useful in 'treating' HIV cases! According to the allopathic researchers – this combo of crude  $As_2O_3$  along with anti-viral drugs can counteract HIV latency and has the potential to eliminate viral reservoir. This is being called the potential 'cure' of HIV!

Clinical trials are being planned to confirm the use of crude Arsenic Trioxide + ART (Anti Retroviral Therapy) as a CURE OF HIV. One such study is supposed to be completed by December 31, 2021

[\[https://clinicaltrials.gov/ct2/show/NCT03980665\]](https://clinicaltrials.gov/ct2/show/NCT03980665) ]

[Antiretroviral therapy: Standard antiretroviral therapy (ART) consists of the combination of at least three antiretroviral (ARV) drugs to maximally suppress the HIV virus and stop the progression of HIV disease].

<https://onlinelibrary.wiley.com/doi/full/10.1002/adv.201900319>

**As<sub>2</sub>O<sub>3</sub> synergistically reactivate latent HIV-1 by induction of NF-κB.**

<https://www.ncbi.nlm.nih.gov/pubmed/24416773>

==

**MY COMMENTS:**

I see a very serious flaw and danger in the use of crude Arsenic Trioxide + ART combo in the so-called CURE of HIV.

a) For the first time in the world – I have discovered that Arsenic Trioxide (Arsenicum Album) is the specific homogenic similimum or the genus epidemicus for HIV. It should be applied in ‘minimum dose’ i.e. potentized remedy or else dangerous aggravation is likely to occur along with grafting of the disease miasm on the patient forever.

b) The allopathic expert ignores the toxic effect of Arsenic Trioxide assuming that the use of this toxic poison is necessary (a lesser evil) to cure cancer and plans to use it for HIV too. But, the allopath does not know that Arsenic Trioxide is the similia for HIV and as such – it is bound to react dangerously in crude dose.

c) Apart from the carcinogenicity and toxicity of Arsenic Trioxide - the suppressive effect of crude Arsenic Trioxide + ART will lead to cancer for sure. The role of suppression and arsenic in the genesis of cancer has been discussed at length in the Vaccine chapter in my research on Covid19.

d) Crude Arsenic Trioxide + ART is eliminating HIV reservoir because of its toxicity or may be only suppressing it. It will result in cancer OR a forceful relapse/rebound of the Viral load.

e) The allopath does not understand that the HIV infected cells are more sensitive to Arsenic Trioxide – this is the innate sensitivity to the similimum and not the crude drug! As discussed throughout my previous and in this research paper - The use of crude Arsenic Trioxide to eliminate the HIV reservoir will make the person immunosuppressed and make him MORE susceptible to ALL kinds of viral infections INCLUDING COVID19. **Any attempt to use crude Arsenic Trioxide in ANY cancer treatment OR HIV OR Covid19 will result in immunosuppression, increased risk of TB / Cancer / HIV / COVID19.**

f) The researchers are themselves not understanding the implications of their findings. They are saying that *“Arsenic Trioxide can reactivate latent infection... and down-regulate expression of CD4 in T cells... and fully suppress rebound of viral loads or delay the virological rebound”*. This is NOT cure. This is the blueprint for relapse, aggravation and suppression.

Why do I need to reactivate the latent infection? I postulate that if crude Arsenic Trioxide increases HIV infectivity and can re-activate the latent infection – the potentized dynamically acting Arsenic Trioxide, in homeopathic form, will completely deactivate HIV through genetic triggers and will make it impossible for HIV to gain entry into cells. This is the path to CURE HIV infection.

And why should I knowingly use crude Arsenic Trioxide when it down-regulates CD4? Down-regulation of CD4 is required for maintenance of viral infectivity of HIV-1. Why should I try to down-regulate CD4?

See here:

**Downregulation of CD4 is required for maintenance of viral infectivity of HIV-1**

<https://www.sciencedirect.com/science/article/pii/S0042682203001260>

**Role of CD4 receptor down-regulation during HIV-1 infection.**

<https://www.ncbi.nlm.nih.gov/pubmed/15053340>

I postulate that if crude Arsenic Trioxide produces immuno-suppression by various mechanisms and also down-regulates the CD4 – the best way to enhance immunity against HIV and upregulate the CD4 is by the application of Arsenic Trioxide in the potentized form!

So, in a nutshell, the application of Arsenic Trioxide in potentized form (Arsenicum Album) will lead to deactivation of HIV, cells will be impervious to HIV, enhanced immunity against many viral diseases including HIV and Covid19, upregulation of CD4 and protection against tuberculosis & cancer...and low costs....and no toxicity....and no patent restrictions...and full CURE of HIV + PREVENTION of HIV...end of HIV and Covid19 pandemic...NO VACCINE NEEDED! IN FACT – NO VACCINE WILL WORK in HIV OR COVID19!

For the first time - I have discovered the truth about HIV and Covid19 and their cure through the PROPER application of potentized Homeopathic Arsenicum Album. Dr Hahnemann would have been proud of me. The medical establishment may ignore my advice today – but, let it be known that this is the ONLY solution that will work against HIV and COVID19. The medical establishment will be compelled to implement my advice one day. Please note.

## IS SARS-CoV2 A LAB-MADE VIRUS?

### DOES IT HAVE THE HIV GENOME IN IT?

The origin of the SARS-CoV2 is a mystery with so many theories floating in the media.

A few days back, **Professor Luc Montagnier**, winner of the Nobel Prize for Medicine in 2008, gave a tantalizing interview in the media. He said the SARS-CoV2 was lab made and had bits of HIV genome in it.

I quote from a news report...

*“With my colleague, bio-mathematician Jean-Claude Perez, we carefully analyzed the description of the genome of this RNA virus,” explains Luc Montagnier, interviewed by Dr Jean-François Lemoine for the daily podcast at Pourquoi Docteur, adding that others have already explored this avenue: Indian researchers have already tried to publish the results of the analyses that showed that this coronavirus genome contained sequences of another virus, ... the HIV virus (AIDS virus), but they were forced to withdraw their findings as the pressure from the mainstream was too great”*

<http://thejewishvoice.com/2020/04/2008-nobel-prize-for-medicine-winning-dr-luc-montagnier-says-covid-19-was-manipulated-for-hiv-research/>

One news report mentions that Dr Montagnier said “elements of the “malaria germ” – the parasite *Plasmodium falciparum* – can also be seen in the virus’s genome”.

<https://science.thewire.in/the-sciences/luc-montagnier-coronavirus-wuhan-lab-pseudoscience/>

All kinds of things are being said against Dr Montagnier and many are making fun of him and denouncing his claims. He gets bad press due to his support for Homeopathy and anti-vaxxers.

See the media highlights on Dr Montagnier and the nature/origin/creation of the SARS-CoV2 here:

<http://thejewishvoice.com/2020/04/2008-nobel-prize-for-medicine-winning-dr-luc-montagnier-says-covid-19-was-manipulated-for-hiv-research/>

<https://science.thewire.in/the-sciences/luc-montagnier-coronavirus-wuhan-lab-pseudoscience/>

<https://www.europeanscientist.com/en/big-data/no-sars-cov-2-does-not-contain-hiv-genetic-code/>

<https://www.nature.com/articles/s41423-020-0400-4>

<https://jvi.asm.org/content/82/4/1899>

#### **MY COMMENTS:**

#### **See the Hypoxia-Arsenic-HIV connection:**

I have already established the Arsenic-Hypoxia connection in my Covid19 - Arsenic research and cited references which explain the arsenic mediated interference in the heme biosynthesis pathway to be the causative mechanism of Hypoxia.

One more research is cited here:

*“These findings establish that Arsenite exerts a hypoxia-mimetic effect”.*

<https://journals.plos.org/plosone/article?id=10.1371/journal.pone.0114549>

See the strange HIV and Hypoxia connection here:

*“First, it is necessary to classify viruses according to their response to hypoxia – some viruses are strictly aerobic (influenza viruses), some aero-anaerobic (HIV) and others strictly anaerobic. This would be particularly relevant for viruses of the digestive tract, where there is a steep, radial gradient of O<sub>2</sub> (Robinson & Pfeiffer, 2014) owing to mucosal-associated microbes, as they quickly consume O<sub>2</sub> that has diffused across the intestinal wall, resulting in extremely low concentrations within the lumen (<133Pa) (Albenberg et al., 2014)...For human RNA viruses, hypoxia induces an upregulation of hepatitis C virus and human immunodeficiency virus 1(HIV-1) virus replication”*

[https://www.microbiologyresearch.org/docserver/fulltext/jgv/96/8/1979\\_vir000172.pdf?expires=1587617774&id=id&accname=guest&checksum=1CDDB55F485E242A36E67079201C4A7A](https://www.microbiologyresearch.org/docserver/fulltext/jgv/96/8/1979_vir000172.pdf?expires=1587617774&id=id&accname=guest&checksum=1CDDB55F485E242A36E67079201C4A7A)

Based on symptoms – Arsenic Trioxide (Arsenicum Album) is the similimum of HIV/AIDS and it is the similimum of Covid-19 as well.

**I have very high respect for Dr Luc Montagnier and his subtle vision. He is not like other clueless scientists groping in the dark with a gross mindset. I request Dr Luc Montagnier to kindly look into the implications of the symptom similarity and connection between Arsenic Trioxide-Covid19-HIV. Is the Hypoxia-Arsenic-HIV connection of any significance?**

=

*The clueless scientist who cannot see the hidden satanic dual-face of Arsenic-HIV behind the Covid19 drama will be completely baffled, frustrated and will fail to understand what is going on and why and what to do about Covid19.*

*-Dr Manish Agarwala*

## **CLASSICAL HOMEOPATH'S OBJECTION NUMBER ONE**

**IS THIS DISCUSSION RELATED TO BIOCHEMISTRY, VIROLOGY, PATHOLOGY, GENETICS ETC. RELEVANT TO FINDING THE SIMILIMUM AS PER CLASSICAL HOMEOPATHY?**

**DO WE NEED TESTS AND LAB INVESTIGATIONS TO DECIDE THE SIMILIMUM?**

Respected Sir,

Everything was, is and will be very much Classical Homeopathic!

Kindly refer to page 97 of my Covid19 research: '*Arsenic*' - *The central pivot around which revolves the entire drama of covid-19 - A unique analysis for the first time...*there I have written and I quote:

*"Moreover, as per the classical Homeopathic thought – the level of Arsenic in the blood/body tissue is not important. If we see the Arsenicum "STATE" in totality of the symptoms – we prescribe Arsenicum to great relief of the patient".*

I would like to emphasize that my approach is very much Classical Homeopathic but, I do wish to take the western medicine doctors along. I am not bothered by the theories of the allopaths. I am guided by aphorism 1 and the footnote thereof and focused on the cure and not theoretical conjectures. I have suggested Arsenicum Album (potentized Arsenic Trioxide) on the basis of TOTALITY and not any theory/conjecture/tests. However, I am curious about the ramifications and implications of the Classical Homeopathic similia and would like to understand how the similimum is reflected at the level of biochemistry and genetics.

Dr Hering graduated in 1826 and the title of his doctoral thesis on Homeopathy was '*DE MEDICINA FUTURA*'. My research is borne out of the desire to see Classical Homeopathy as the '*DE MEDICINA FUTURA*' as envisaged by Dr Hering.

***I see the future of medicine as personalized genetic medicine and in my opinion – the Classical Homeopathic similimum is very advanced personalized genetic immunological medicine which works through bio-resonance and modulates genetic switches for the desired curative/prophylactic effect and this curative/prophylactic effect is very fundamental, holistic and deep echoing throughout the entire genetically controlled neuro-biochemistry of the organism.***

**- Dr Manish Agarwala**

You may refer to the following research study for futuristic inspiration related to Arsenicum and in fact, the future-is-now because, what this research is trying to suggest about the future is already known and being practiced by the Classical Homeopaths since the time of Dr Hahnemann...

#### **Environmental arsenic exposure: From genetic susceptibility to pathogenesis**

*“Review the roles of inter-individual DNA-level variations influencing the susceptibility to arsenic-induced carcinogenesis; 2) discuss the contribution of arsenic biotransformation to cancer initiation; 3) provide insights into emerging research areas and the challenges in the field; and 4) compile a resource of publicly available arsenic-related DNA-level variations, transcriptome and methylation data. Understanding the molecular mechanisms of arsenic exposure and its subsequent health effects will support efforts to reduce the worldwide health burden **and encourage the development of strategies for managing arsenic-related diseases in the era of personalized medicine”.***

<https://www.sciencedirect.com/science/article/pii/S0160412017315507>

## **CLASSICAL HOMEOPATH'S OBJECTION NUMBER TWO**

**WE BELIEVE IN INDIVIDUALIZATION AND NOT IN SPECIFICS OR THE GENUS EPIDEMICUS**

**HAHNEMANN SAID THAT....ETC. ETC.**

Respected sir,

Kindly refer to page 80 and page 113 of my Covid19 research: 'Arsenic' - *The central pivot around which revolves the entire drama of covid-19 - A unique analysis for the first time...there I have written and I quote:*

Page 80: *"The constitutionalists vote for A- the individualized chronic constitutional remedy for everything and they are right! However, going by the dictum – an ounce of prevention is better than a pound of cure: B - the Genus Epidemicus remedy becomes de rigueur during an epidemic where millions and billions of people cannot be treated individually. In my personal opinion, A and B above, are the best ways to develop innate immunity, balance the biochemical processes towards health and stay protected during epidemics".*

Page 113: *"I wish to tell them that during the 1918 flu pandemic – the great Homeopaths in USA saved millions of lives by distributing the Homeopathic remedy – Gelsemium and had a mortality of 0-1% – whereas the mainstream medicine prescribed aspirin and had a mortality of 30-38%. Further, I will be pleased to share several published research studies on Arsenic endemic populations in West Bengal (India) and the effect of the potentized Homeopathic remedy Arsenicum Album in 30c and 200c on their health. I can also present research proven data on the successful use of Homeopathy during the 1974 meningitis epidemic in Brazil".*

==

**I HAVE PROPOSED ARSENICUM ALBUM AS THE GENUS EPIDEMICUS OR HOMOGENIC REMEDY FOR COVID-19 AND HIV.**

As far as the Classical Homeopath's objection about 'INDIVIDUALIZATION' is concerned – I would like to say that:

- a) The concept of Genus Epidemicus is Hahnemannian and not my invention.
- b) The concept of Homogenic specific remedies is also Hahnemannian and not my invention. I have discovered that Ars. Alb. is the Homogenic specific as well as the Genus Epidemicus of HIV infection and also Covid19 – just like mercury is for Syphilis.
- c) It is not possible to treat millions and billions of people individually.

Moreover, I am observing the so-called 'individualized' treatment of Covid19 patients with wrong remedies!

Classical Homeopaths failed to cure HIV/AIDS in last 34 years.

Jeremy Sherr collected funds and went to Africa to treat HIV and Vitoulkas discouraged him and both, failed to cure HIV and could not suggest a credible Genus Epidemicus for HIV!

==

UPDATE: I checked just now and found that Jeremy Sherr has mentioned that *Californium muriaticum* or *Californium nitricum* is the Genus Epidemicus of HIV/AIDS !!!

See here:

<https://www.thieme-connect.com/products/ejournals/abstract/10.1055/s-0032-1327860>

==

*Californium muriaticum has no reliable proving and it is definitely not the similimum remedy for HIV/AIDS. Because of such absurd ideas - the British media hounds Jeremy Sherr and calls Homeopathy to be pseudo-science or voodoo medicine! I feel very sorry for Classical Homeopathy.*

I found this interesting interview with Jeremy Sherr:

*Q: Do you ever stop the patients from taking ARVs (Anti-retrovirals)?*

*“Absolutely not. Homeopathy is a complementary medicine and it works alongside ARV medication”. – Jeremy Sherr*

<http://homeopathyforhealthinafrica.org/interview-with-jeremy-sherr/>

==

I have read a paper on Covid19 by Dr Andre Saine. Therein he says thus about the Genus Epidemicus of Covid19:

*“I think we should find one best remedy as a real deep genus. Then we could easily convey it to public. The big variety of remedies homeopaths all over the world are offering means probably it’s a small remedy, not well known, otherwise, it would be clear. As Jan Scholten says, unknown picture requires an unknown remedy”.*

- Dr Andre Saine

==

I remember Prof Vithoukias saying many years ago, how homeopaths fail to recognize major polycrest remedies but, look for the proving of the ‘*milk of the owl*’!

I AGREE!

==

Let us join hands to support each other and not raise unnecessary objections.

**AUDE SAPERE!**

*“It is the spirit of Truth that tries to unite us all; but the father of Lies keeps us separate and divided”*- Dr Constantine Hering

==

Re: the theoretical objection that Arsenicum Album is a “specific” remedy and not the individualized constitutional remedy – I would like say that I have chosen Ars. Alb. after extensive Classical Homeopathic analysis and it represents the holistic + miasmatic TOTALITY & is the similimum.

Further, I quote the learned Canadian Homeopath Rudi Verspoor and rest my case!

### ***“Demolishing Some Myths***

*To fully understand it, we must first visit and demolish several myths about what Dr. Hahnemann wrote and taught:*

*Dr. Hahnemann's system of medicine is not just about the application of medicine on the basis of symptoms.*

*Hahnemann taught that there are two kinds of disease: those of constant nature, which he called diseases of a constant Wesen; and those of a variable nature or Wesen, which he called individual diseases.*

*The first is the primary disease, pure in form and always arising from the same cause. The second is a development of the first. It is secondary in nature and variable in expression, depending on circumstances, the passage of time and the constitution of the individual.*

*For the primary or constant diseases, which he also called "peculiar diseases," there is only one remedy for each person suffering from that specific disease. Hahnemann called this the "peculiar specific."*

*However, the primary disease operating in each person can give rise to a secondary disease that is individual in nature and can only be determined from the image of disease given in the symptoms expressed by the patient.*

*Allow me to quote from a few passages:*

*It is only the very great simplicity and constancy of ague and syphilis that permitted remedies to be found for them, which appeared to many physicians to have specific qualities; for the variations in these diseases occur much more seldom, and are usually much less important than in others, consequently bark*

*and mercury must be much more serviceable than not so. But neither is bark specific in ague, in the most extended sense of the term, nor mercury in syphilis, in its most extended sense [that is, where there are complications]; they are, however, probably specific in both diseases, when they occur simple, pure and free from all complications. Our great and intelligent observers of disease have seen the truth of this too well, to require that I should dwell longer on this subject.*

*Now, when I entirely deny that there are any absolute specifics for individual diseases, in their full extent, as they are described in ordinary works on pathology, I am, on the other hand, convinced that there are as many specifics as there are different states of individual diseases, i.e., that there are peculiar specifics for the pure disease, and others for its varieties, and for other abnormal states of the system. (Hahnemann, Lesser Writings, p. 260-261).*

*We observe a few diseases that always arise from one and the same cause, e.g., the miasmatic maladies; hydrophobia, the venereal disease, the plague of the Levant, yellow fever, small-pox, cow-pox, the measles and some others, which bear upon them the distinctive mark of always remaining diseases of a peculiar character; and, because they arise from a contagious principle that always remains the same, they also always retain the same character and pursue the same course, excepting as regards some accidental concomitant circumstances, which however do not alter their essential character...*

*These few diseases, at all events those first mentioned (the miasmatic), we may therefore term specific, and when necessary bestow on them distinctive appellations. If a remedy has been discovered for one of these, it will always be able to cure it, for such a disease always remains essentially identical, both in its manifestations (the representatives of its internal nature) and in its cause. (Lesser Writings, p. 440)*

*The constant specific remedies in these few diseases were capable of being discovered only because the thing to be cured, the disease, was of a constant character; - they are diseases which always remain the same; some are produced by a miasm which constitutes the same through all generations, [that is, has the same infectious cause] such as the venereal disease; others have the same exciting causes, as the ague of marshy districts, the goitre of the*

*inhabitants of deep valleys and their outlets, and the bruises caused by falls and blows... (Lesser Writings, p. 260-261)*

*At this point, Hahnemann gives us a clear and unmistakable principle:*

*Only for a want of a constant character can we suppose a supply of a constant character. In another passage, Hahnemann clearly distinguishes between the two types of disease. That is to say, where there is a constant Wesen disease, we can always give the same remedy, which is chosen on knowledge of the cause, but where there is no such constant disease cause, then recourse must be had to the use of symptoms to find the remedy.*

*In another passage, Hahnemann clearly distinguishes between the two types of disease.*

*Hence it happens that with the exception of those few diseases that are always the same, all others are dissimilar and innumerable and so different that each of them occurs scarcely more than once in the world and each case of disease that presents itself must be regarded (and treated) as an individual malady that never before occurred in the same manner...*

*The internal essential nature of every individual case of disease, as far as it is necessary for us to know it, for the purpose of curing it, expresses itself by the symptoms, as they present themselves to the investigations of the true observer in their whole extent, connection and succession. (Lesser Writings, pp. 442-443)*

*In order to treat successfully the other cases of disease occurring in man [that is, the variable, individual diseases] ...if they cannot be referred to some primary disease which is constant in its character, they must each be regarded as peculiar diseases, and a medicine which in its pure effects on the healthy body shows symptoms similar to those of the case before us, must be administered. (Lesser Writings, p. 693)*

*If we follow closely what Hahnemann is telling us here, based on his keen powers of reason and his extensive experience, we cannot fail but to come to the following conclusion:*

*There are diseases that are fixed in nature, coming from a fixed cause, whether infectious (miasmatic) or exciting, such as a trauma (bruises), and there are diseases that have no such fixed cause but express differently in each individual, to a greater or lesser degree.*

*The fixed or primary diseases are prescribed on the basis of the cause, what Hahnemann called true causal prescribing, or the "Royal Road of Medicine."*

*The variable or secondary diseases must be prescribed according to the "features" (Merkmale) of the disease - the symptomological data.*

*Prescribing for the variable or secondary diseases is, properly speaking, homeopathic (similar suffering), as the symptoms represent historically, the pathology (before this term was reduced to material tissue or chemical change in the organism). Prescribing for the constant, or primary diseases based on knowledge of cause, is not homeopathic.*

*It may surprise many that Dr. Hahnemann's medical system consists of more than homeopathy. It contains principles for the use of therapeutic regimen (which properly applies the law of opposites), antipathic medicines and, as we have seen, what might be called homogenic prescribing, from "homo" for same (but not identical, which is idem) and "genic" for genesis or cause. Actually, this is a term that Hahnemann himself used in the Organon when speaking of specific, constant medicines for diseases:*

*14.1. The reliably availing ones could not have been any others than the specific ones; that is, medicines which were homogenic in their action to the disease irritation, whose use, however, by the old school was forbidden and tabooed as highly damaging because observation had taught that, with the so highly intensified receptivity for homogenic irritations in diseases, such medicines in the conventional large doses had proven themselves life-endangering.*

*I am not able to go into all the richness of Hahnemann's complete medical system, which he termed Heilkunst, as in the title of his book Organon der Heilkunst, but would refer the interested listener to my book, co-authored with Steven Decker, linguist, translator of the extended Organon and Hahnemannian scholar, called The Dynamic Legacy: From Homeopathy to*

*Heilkunst, which is available in electronic format. It is all documented there in great detail from Hahnemann's works.*

*Suffice it to say here that one can prescribe using the law of similars on cause as well as on the symptoms”.*

**TREATMENT OF  
ACUTE HIV INFECTION (ACUTE RETROVIRAL SYNDROME)  
AND CHRONIC HIV INFECTION / AIDS**

1. For the first time I have discovered that Arsenicum Album is the Genus Epidemicus and/or Homoeogenic Remedy for HIV/AIDS. It is not an arbitrarily chosen remedy but, a very carefully selected Classical Homeopathic similimum and so, if it is used in the correct way, I expect it to work very well.

2. For Acute Retroviral Syndrome - a single dose of Ars. Alb. 200C [potentized on K-tronic potentizer]. Only one dose. Given only once. Let the remedy work undisturbed. A single dose should be enough to cover the entire acute episode.

For chronic HIV/AIDS - a single dose of Ars. Alb. 200C [potentized on K-tronic potentizer]. Only one dose. Given only once. Let the remedy work undisturbed for 5 months. Several doses of 200C may be required every 5 months.

For more guidelines about treatment – please refer to the chapter: FINAL COMMENTS & THE SOLUTION TO THE COVID-19 PANDEMIC (REVISED) in my Covid19 research: *'Arsenic' - The central pivot around which revolves the entire drama of covid-19 - A unique analysis for the first time...*

The same caveats and precautions will apply for Classical Homeopathic treatment of HIV too.

3. 50-millesimal potency may be more useful in CHRONIC HIV/AIDS cases [not in acute]. However, I need to confirm the effects of 50-millesimals after conducting some field trials. The 50-millesimals need to be used very carefully or else unwanted aggravations will occur. The opening potency will be LM/5 or LM/6 and the time interval between two altered doses will be about 15 days. Very frequent repetitions may aggravate the case. For more details on the best way to use 50-millesimals –

please refer to the teachings of David Little. I will prefer the 4 oz. bottle or the olfaction doses.

4. HIV nosode is not required. Please refer to the discussion on nosodes VS. similimum in my Covid19 research study.

5. Polypharmacy, giving several remedies, adding Bio-chemics/mother tinctures/ radionic remedies, prescribing homeopathy with ART and presenting it as some kind of 'advanced' homeopathy, giving many remedies/high potencies/frequent repetitions etc. are recipes for failure and a big disaster.

I do not recommend Peter Chappel's remedy (PC1) - because, I do not know what is PC1. All this is not Hahnemannian Classical Homeopathy.

Please do not add nosode/PC1 etc etc to Arsenicum Album. Homeopathy is simi-mini-mono. Please stay away from these 'advanced' treatments and be loyal to Classical Hahnemannian Homeopathy.

Periodic Table remedies from a pharmacy in Austria / Remedies based on dream/meditation provings or mind/sensation psycho-analysis / the proving of a rock from the mars or the mouse's tail or tutankhamun's coffin or the milk of the owl is not required to cure ANYONE. Believe me!

6. For those who are already taking ART (Anti Retroviral Therapy) – 50 millesimal potencies may be a good choice – but, I will be in a position to confirm my stand on 50 millesimals after conducting some field trials. Otherwise, the 200c approach works very well. If the patient responds to the Homeopathic treatment – ART should be gradually tapered down and then stopped. Sudden stoppage of ART will be dangerous.

The tapering down of ART and the monitoring of the case from the very beginning may need to be done by a medical doctor.

Please follow government guidelines, laws and legal requirements applicable in your area.

AIDS cases may present with opportunistic tuberculosis, cancerous lesions and neurological symptoms. Such cases pose a big challenge to the inexperienced homeopath. The critical cases need to be studied properly before deciding the treatment strategy. A medical doctor will be required to monitor the treatment at all times.

7. Ars. Alb. is the preventive as well as curative Genus Epidemicus / Homogenic remedy for HIV – but, it is no license for reckless unsafe sexual practices, sharing used needles, receiving or donating infected blood etc. Please advise safety precautions at all times. As per Hahnemannian thought – ‘impure coition’ must be avoided.

8. No vaccines of any kind are required or recommended.

9. Further fine tuning of treatment guidelines after Clinical trials.

10. The preventive and curative treatment for Covid19 and HIV/AIDS, as discovered by me are curative as well as preventive, non-toxic, very cheap & free from patent restrictions. No Antibody Dependent Enhancement (ADE) of vaccines, no side effects of ART. No suppression.

11. The progress of the case must be monitored by checking CD4 count and other parameters along with the observation of Hering’s Laws of Cure. At no time should the patient’s condition be allowed to worsen. Saving life is more important than upholding any system of medicine.

12. The mainstream allopathic lobby will not support us unless we are able to show exemplary results. High quality Classical Homeopathy required. BAD homeopathy will not work.

13. I will be pleased to work with any Government or institution worldwide to co-ordinate clinical trials and fieldwork.

***That Arsenicum Album is the Genus Epidemicus of HIV infection as well as Covid-19 makes me more confident and doubly sure that if Arsenicum Album is correctly used for public Genus Epidemicus prophylaxis on a mass scale – the juggernaut of the Covid-19 pandemic can easily be halted.***

***However wrong remedies, multiple remedies, frequent repetitions, mixing allopathy + homeopathy and not allowing the single dose of the remedy to work undisturbed will lead to a colossal failure. Such failures are due to the unwise homeopath and not due to homeopathy.***

***Aude sapere***

*The clueless scientist who cannot see the hidden satanic dual-face of Arsenic-HIV behind the Covid19 drama will be completely baffled, frustrated and will fail to understand what is going on and why and what to do about Covid19.*
