

# Minecraft Java Edition And Bedrock Edition Are Coming To Xbox Game Go For Pc

Minecraft Live 2021, Mojang's annual celebration of all issues vivid and blocky, is happening proper now, and whereas we've been expecting updates about updates and new mob reveals, Mojang has also unveiled that two versions of Minecraft are coming to Xbox Game Move for Pc later this yr.

To be more particular, the 2 versions are Java Edition and Bedrock Version, and they'll each be out there by way of Xbox's Sport Go for Laptop service from November 2, 2021.

Now if - like us - the many alternative Minecraft variations scare and confuse you, then here's roughly what each of these versions supply. Java Edition, which is often offered by way of the Minecraft website for £17.95 / \$26.95, is probably the most customisable version of the game, and is the version you'll want in case you plan on using custom Minecraft skins, Minecraft mods, and booting up customized Minecraft maps and servers. These are basically all of the issues that make Minecraft on Laptop among the best sandbox video games round.

Nonetheless, Java Version can be much more demanding on your hardware, which is why you may want to take a look at Bedrock Edition, which is the multiplatform, cross-play, and gamepad compatible model of the sport. It's additionally a lot less demanding on hardware. Bedrock Edition is generally obtainable on the Microsoft retailer for £22.49 / \$26.99. This version additionally features access to the Minecraft Marketplace, the place you should purchase additional maps, skins, and various other goodies.

If you've never signed up for Xbox Recreation Cross for Computer then you will get the first month for £1.00 / \$1.00, which then becomes £7.99 / \$9.99 month-to-month - you may enroll right here. And in case you're curious about how much else is on there, we ran a check a couple of months again and found that it might take 4,000 hours (at absolutely the least) to beat each game on the subscription service.
