Sustanon is by far one of the most popular steroids around. You'll find people that use it for Testosterone Replacement Therapy but there are also bodybuilders that use it during a blast and cruise. Based on anecdotal experiences, Sustanon 250 should be taken every 2 to 3 days to maintain stable hormone levels.

For the uninitiated, Sustanon 250 is a quad-stack of four testosterone esters, two of which are shorter acting esters, one is a medium ester and one long acting ester with a half-life of about 15-20 days. The idea behind stacking different esters into one product is to minimize the frequency of pinning. Or so the manufacturers seem to think.

Our guy @dan.matsyuk came through today and has seen some CRAZY results recently! Dan just finished up his stack that helped him put on muscle and drop body fat AT THE SAME TIME!??????

Sustanon-250 can be stacked with a variety of other steroids, like Deca Durabolin, Winstrol, Anavar and Trenbolone. Your choice of stacks should depend on your experience with steroids and your specific goals with each cycle. Sustanon and Deca makes a great bulking stack that will also make you feel great.
