

# SAFE INVESTMENTS

EARN 3% PROFIT INSTANTLY!

**Safe Investments** is an **open-source** Ethereum investment game built with its **smart contract system**. Ignore all other Ethereum multipliers you find, because they are unsustainable. Join my investment game instead where you can **Earn a stable 3% profit easily and instantly**. My investment game is sustainable for the longer term and you can invest as many times you want, there are **no limits**. You will **get paid guaranteed instantly** after somebody after you invests, it's **automatic**, and it's **a lot of fun**.

## HOW IT WORKS:

- Invest a minimum of 0.5 Ether (500 Finney)
- Wait until somebody else invests
- You will get paid automatically: **your initial investment + 3% Profit instantly** to the address you invested from
- Repeat!

## HOW TO INVEST:

**Send minimum 0.5 Ether here:**

## **TRANSPARENCY:**

**Safe Investments** is **100% open-source**, **automatic** and **transparent**, **I can't run away with the money**, it's impossible, all funds are managed and stored in the contract, and I can't access it, that's how Ethereum works. A contract is like a **robotic artificial-intelligence** on the Ethereum blockchain, that executes the code that is written into it, and the money can only be accessed by the contract, and you can **verify the contract source code here**:

## **SOURCE CODE EXPLAINED:**

If you don't understand the code language then let me sum it up for you:

1. Your deposit gets registered and is waiting for payout
2. A small commission is sent to me
3. Another investor invests and his investment gets registered too waiting for payout
4. Your payment gets sent automatically: initial investment + 3% profit
5. Repeat...

It's that simple, and it's all automatic, Ethereum is a wonderful technology and it can make you rich automatically!
