

# Do You Want To Give Us Your Opinion?

Minecraft Server is basically a free alternative to Minecraft Realms with which you can create your own server within Minecraft's open world, so that you can play with your friends online and craft collaboratively.

Total control over your Minecraft world.

This software for Windows allows you to create a completely customizable server. You can set the rules and invite anyone on your local or national network.

What are the things you can configure with Minecraft Server

The server.properties.exe file is located in the folder where the Minecraft Server.exe was launched. This file allows you to configure various options to create the Minecraft Server.exe. You have full control over banned, permitted, and penalized gamers. You can also send messages to all members of the community at once.

- Maximum amount of players per server. - Maximum height of the buildings. - Game mode.

- Level type.

- Difficulty level.

Map size.

- Server name and IP.

Requires Minecraft

- Requires Windows XP or above.

- Requires Java 1.6.0.

- To be able to run the server, you have to open the EULA text file and accept the user conditions, changing the field false to true.

We would love to hear your thoughts. Do you want to give us your opinion?
