

GoFire™ LLC
ENTERS THE
VAPOR CONCENTRATE MARKET WITH
The GoFire P.E.N.™

G O F I R E™

GoFirePen.com

Boulder, Colorado based GoFire, LLC releases its new portable solid or liquid concentrate vaporizer in one of the fastest growing industries in the U.S., with plans to redefine the space with the “Evolution of P.E.N.™” campaign.

THE EVOLUTION OF P.E.N.

GoFire announced the release of The GoFire P.E.N.™, the first ancillary concentrate vaporization device designed to offer a true mobile dabbing experience with dose control. The campaign is aimed at encouraging responsible moderation and consumption nationwide.

GoFire announced the release of The GoFire P.E.N.™, the first ancillary concentrate vaporization device designed to offer a true mobile dabbing experience with dose control. The campaign is aimed at encouraging responsible moderation and consumption nationwide.

“Patients and consumers have been in search of a more innovative and functional vaporizing device in an industry riddled with poor-quality products,” said **Ricky Cherry, Chief Marketing Officer**, GoFire, LLC.

The device is designed for both medical patients and recreational consumers. It eliminates the need for an at-home rig or water-pipe with its patented extrusion and “slide-to-dab” systems.

“We set out to simplify the smoking process for everyone,” said **Peter Calfee, Chief Operations Officer** for GoFire, LLC. “Simply select dose, select temperature, slide to dab, and enjoy the preserved taste of medical quality vapor.”

Performance Meets Portability

The GoFire P.E.N. was designed to eliminate the time-consuming and dangerous process associated with at-home dabbing.

GoFire's patented "slide-to-dab" process separates its loaded cartridge from a patented 'closed-coil ceramic heating system', as demonstrated below:

About GoFire™ LLC:

GoFire was founded in 2014 by a team of Boulder, Colorado-based concentrate connoisseurs with a consuming passion to reposition the medical and recreational markets in the eyes of the general public. The company wants to make mobile medicating a real, practical possibility with its first generation line of portable concentrate vaporizers.

About The GoFire P.E.N.™

The device is designed to enhance, simplify and customize the consumer's vaping experience based upon their needs per dose or "dab". The GoFire P.E.N. puts the consumer in control of his or her 'vaping' experience with its patented Dose Control, Temperature Control and Application Control capabilities.

Other unique benefits designed to deliver an optimal mobile dabbing experience include: functionality with any form or variety of concentrate; refillable, reusable stainless steel cartridges, as well as temperature settings ranging from 350 to 900 degrees Fahrenheit.
