ROAR WHITEPAPER

What is Roar Token?

- Roar is a staking and a launchpad specializing in meme tokens platform in development. Built on Binance Smart Chain, technology dedicated to decentralized transactions at high speed and low cost, the Roar platform proposes to the market to be a pioneer in what it will present.

Why Binance Smart Chain?

- Binance Smart Chain (BSC) is a blockchain protocol from Binance that runs in parallel with Binance Chain. Unlike Binance Chain, however, Binance Smart Chain powers smart contract functionality and boasts compatibility with Ethereum Virtual Machine (EVM).

- What's more, BSC has one of the fastest blockchain transaction times and lowest fee structures, which makes building DeFi apps on the protocol so appealing for developers.

- Binance Smart Chain's BEP-20 token uses essentially the same format as the Ethereum protocol's popular ERC-20 tokens.

Why a lion?

- Because lions are the kings of the jungle. Lions are the kings of the jungle because of their raw power and ferocity. Lions fear no other animals. Like a king, lions maintain order. Perhaps this is why the lion is considered king, because it is control of the land it lives on and all the other animals that live on it. Lions also rest about 20 hours a day. In a sense, they have the life of kings. They eat, drink and sleep and do away with pests. This is why lions are considered the kings of the jungle.

What Is a Meme Coin?

- In a nutshell, meme coins are cryptocurrencies inspired by memes and internet jokes. Dogecoin, for example, was inspired by the Doge meme created from a viral photo of a Shiba Inu.

- Once it gets popular and spikes in value, retail investors sometimes jump on board and further boost the coin. Prominent online figures and celebrities also drive up the popularity of certain meme coins. Elon Musk is probably the person most famous for it, and there's even a fork of Dogecoin called Floki Inu based on Musk's actual pet dog.

- Meme coins are then, perhaps, a form of highbrow humor for people who are in the know. And everybody wants to be in the know.

Opportunity

- There is no other platform on the market that presents to the market what Roar proposes: a staking platform and meme token launchpad. In addition, the token itself, which will be used to acquire the tokens to be launched on the launchpad, automatically rewards holders with BUSD. Roar's liquidity is locked until the year 2100, in addition to the fact that the contract is waived, making script changes impossible. Buying Roar is investing in a promising and unique project.

DEFLATIONARY MECHANISM

- The Roar token has a deflationary mechanism and it helps the token to get high demand and we can see constant price growth. The main deflationary mechanisms of Roar include a 13% fee in which 4% redistributed in BUSD to holders to reward them for their trust and support for the project, 4% is destined to burning and removed from the supply forever which helps in an increase in demand and price of the token, 4% is destined to marketing and 1% of every transaction contributes towards generating liquidity that goes automatically into Pancakeswap. Simply hold ROAR in your wallet and you will get BUSD in each transaction.

BSC Contract:
0xb401af5d5acd418a1f151351e53f5
1087ac424e2
Name: ROAR
Decimals: 18
Supply: 100.000.000.000

DXSALE (LIQUIDITY LOCKED UNTIL
THE YEAR 2100):

Utility

- Roar is a governance tokencreated on the Binance Smart Chain. Utility tokens are tokens that are intended to provide digital access to an application or service through a blockchain-based infrastructure.

- Roar will be required for the following activities:

- -To buy new launched tokens on Launchpad

- -To enjoy better stake rates from other meme tokens, according to the ROAR token balance in the wallet

- -To get BUSD rewards

ROARMAP 2022

- **Phase 1**
- -Plan & develop the smart contract
- -Social media accounts
- -Design & launch the website
-
- **Phase 2**
- -Influencer partners & ads --- now
- -Listing on Coinmarketcap and Coingecko
-
- **Phase 3**
- -Big influencer partners & celebrity shoutouts
- -Staking and DEX platform
- -CEX listing (can come earlier)
-
- **Phase 4**
- -Develop ROAR NFTs
- -NFT Giveaway to ROAR holders
- -Meme tokens launchpad + Staking
