

Minecraft Java Edition PC Gift Code Only (No CD/DVD).

This game allows you to completely let your imagination run wild. You can create a world, and then share it via the internet. This is a "sandbox", coded in Java, with its 8-bit graphics style. It's not very attractive, but it's still incredibly fun. Several modes are available like the Classic Mode or Survival Mode where you must survive in a randomly generated world. The map is simply enormous and can represent up to 10 times the surface of the earth ! Everything is possible: trees and forests, rivers, volcanoes deserts, mountains, animals, monsters... Even if all goes well during daylight, the monsters will come out at nightfall. You should be very cautious. Your building skills, including traps and other shelters, will be very useful. To build your stuff you will obviously need the resources collected in the trees or rocks found in the world or in hidden chests everywhere. Limit of 1 Qty Per Customer. <https://kd76.com/> Screenshot is required.
