Avast Internet Security Premium

The image is a promotional banner for Avast Internet Security Premium. It features a row of software boxes for 'Passwords Premium', 'Premier', 'Cleanup Premium', and 'SecureLine'. To the right, there is a promotional card with the Avast logo and text stating 'Avast 2019 comes with more features than any other antivirus around.' and 'World's most trusted antivirus with over 220 Million Users'. Below this card is a 'Buy Avast Antivirus' button. The Avast logo is also present on the right side of the banner. At the bottom right, there is a 'SOFTWARE Sales' logo. The entire banner has a yellow background with a blue border.

Avast Internet Security provides every feature required to secure your network & online activities. Home-Network Scanner scans your network for any issue persistence or presence meanwhile to add an extra layer of protection Safe Zone, Secure DNS and a firewall builds as a line of defense to shield. Home Network Security, in a new approach, scans your network and routers for potential hitches to help prevent attacks.

If you buy Avast Internet Security, the feature of silent firewall will stop hackers from hacking your system by eliminating known threats and risks and therefore isolate suspicious files. A secure virtual environment is provided by its Safe-zone so that you can bank, shop, and pay bills online safely. Sites can also be white listed so that Safe-zone starts automatically when you visit those particular sites. DNS hijacking is the biggest risk which can cause big problems on a Wi-Fi network. Avast Internet Security can also keep you safe from this risk as it can encrypt the traffic between the DNS server and secured devices.

Here are amazing features you get in Avast Internet Security 2019:

- Keep Home Network Safe: When your home network gets attacked just like your PC then with just one click, you can scan your network for latent security problems. Scanning will help to prevent attacks on your router as well as network.
- Bank in a Safe-zone: This feature isolates your banking to give an extra-secure place to bank and pay bills online. You can pair it with Secure Line to really secure your privacy & identity.
- Stay protected behind a firewall: you can use Avast secure personal firewall to protect your OS, software, and hardware from hackers.
- Cut out Spam: Get to know which messages are spams before you open them and avoid getting a phishing attack.
- Sandbox test space: It makes sure that your applications run safely and there is no interruption in files opening.

There are features for prevention like firewall, anti-spam, real site, Wi-Fi inspector, cyber capture, behavior shield, ransomware shield, smart scan, do not disturb mode, browser cleanup, passive mode, etc.

You can go for 30 days trial version and then Buy [Avast Internet Security](#). The system requirement for PC is that it should have Windows 10, 8.1, 8 or 7 installed. There must be 1GB RAM and 2GB of hard disk space. Scroll down to our online store to get other products of Avast on affordable prices.
