My Greeting for Mr. Narendra Modi Prime Minister of India republick

Thank You for Your constant steps in promoting my interests and proving the recognition of my justice and Your position, which is steadily promoting and recognizing the principles of international law and legal justice, those principles that create the function of the whole of today's world, which gives the welfare and peace and freedom to nations.

Your policy continues to prove that it is in Your interest India, to maintain the legitimate processes of today's political world, and thus also to ensure a stable environment for all peoples of the world, and it is also confirmed by the fact that Your Government, Your esteemed Prime Minister of India, Mr Narendra Modi, each of You is responsible for recognizing with worldwide respect the willingness to promote justice and the peaceful growth of the political environment, and to fight for legal principles that are really important to us.

I am therefore truly in favor of Your country of India, and I always wish many successes for Your civilization and state development, as well as the peaceful benefit of Your India policy.

Therefore, I will always bring peaceful development opportunities to You and I support Your country in my interests, I will give good development strategies for Your country, significant improvement of India's economy and modernity, poverty eradication, and the growth of industrial, agricultural and service excellence. I will support the development of Your cities and new buildings. I am very happy to support the development of Your armies as well as the security of Your country, and also the elimination of crime. Peaceful and prosperous India is a beautiful vision that is good to support and protect, develop and build.

In the same interest, I also want to support Indian traders and provide opportunities for financial gains, cooperation with my country's traders, but also enable cooperation on development projects. One of my main offers is business interests in architecture, urbanism, as well as industry, electronics, agriculture and many other new markets for commercial applications.

I also understand that today Your position is in controversy because of Your geographical duty of obedient and political contacts with the states of Russia and China that are now publicly supporting the European Terrorist States but I also confirm that I am able to respect Your duty to maintain the stability of India, But also for the sake of achieving the strength of our common trading markets that give Your country full power of independence from many times more prosperity than Russia and China, and the nature of the international political partnership.

I am able to support the building of Your armies at much more advanced capacities than the powers of states that are only risking their future in

supporting terrorist entities that are much worse than the Nazi Germany crimes at the level of Criminal Statistics during the Second World War, or today known state of ISIS.

I am willing to raise Your economy in India, even to a level that outstrips the economy of the average of today's major developed nations, and I am also able to support the growth of Your country's modernity to such a level. But in the first, I must search support for stabilize of my country.

My main goal is to ask Your country to join the World Diamond International Alliance and thus also to enable a common unification with all peoples, a great step for India, excellent strategies for Your own defense from an independent position, as well as global resources for the development of Your civilizations in India.

I offer You a very advantageous economic and financial cooperation that gives Your country a great insight into the development possibilities and strengths and resources of the intelligence of development law that today reaches the truly advanced capacities.

I also ask Your country for India to support internationally, and today, especially in Asia, which is made up of multiculturalism. States of Hindu tradition and nationality, but also the South East states, which can also share the same motivation. I ask You so that this new progress can be used in the interests of all nations and nations, for the benefit of all countries and their civilizations.

World Diamond brings a truly great historical progress for every country, which today is truly more significant than the level of today's world politics, but above all the level of civilization, and the success of this goal brings great strength to all peoples and countries.

In real terms, it is the step of mankind to the level of a new outlook of international politics and to advance the development of world political intelligence by the range of hundreds, even thousands of years. Therefore, I think this proposal is really a significant strategy for the development of our nations, and providing many generations of new opportunities for our generations that will improve the world level. It is beautiful to be able to raise the level of the whole world, and give the nations a new pattern of a more mature future.

The growth of good international state policy success is really important to our present day world, and if Your government of India starts to act as an organizer of the organization and application of international rules, Your government will soon be able to get the logistics of Your own benefit strategies for India and achieve success for nations All over Asia, to the pride of Your country.

In the interest of the Asian continent, Today it is good to extend the political intervention of logistics to the countries of the Chinese race, but also for the interests of the Independent Alliance states after the collapse of the Soviet Union. This will soon lead to a regional weakening of China and Russia, which means increasing success in avoiding contact and partnerships with terrorist states, which are just a threat to world peace.

Open strategies are entitled to take advantage of my offers in the interest of my representation, which give much greater force to the continental

dominance of states that support legitimate interests and growth, but above all the resistance against criminal networks to other politicians, and therefore it is a very advantageous step for You.

It is good to extend organized co-operation with the ASEAN countries as well as with the countries of South Asia and, for my own position, it is therefore beneficial for You to extend the partnership with the states of Islamic faith.

Islamic states are often based on a very similar race of Hindu nations, and also often have a very similar genetic origin of cultures, so it is possible to use the growth of partnerships between Your peoples to suppress racism that only damages the development between Your countries.

The economies of Your countries can grow much more significantly, and even international barriers can be removed.

If Your country supports the growth of the World Diamond Alliance, then the logistics of Your communications department can find a lot of interest with the Arab world, which gives You common good and can stop the growth of conflicts for many decades and forever. All You need to do is to use the WD Alliance law targeting steps properly, and develop a good strategy for Your own international strategy.

The Asian Dialogue Forum, which already has great growth opportunities for the Asian continent and can build much more power than today's criminal organization of the European Union, or the Council of Europe powers, is also a great advantage for You.

The current situation of the United Nations Organization is in the same position as the League of Nations before the Second World War. Once the European Terrorist States have launched acts of world terrorism today, then the UN is not active under legal principles and obligations. The subject is best substituted by a new, more strategic policy format, allowing states enough benefits to start joint military mobilization.

The World Diamond International Alliance is indeed an entity capable of surpassing the values of the UN, giving all nations a much more powerful force.

Today, at the end of the short report, I therefore ask Your government for the country to provide at least legal proof of the ID's status as a subject with political activities and thus also of the value of the right to such performance.

My government's ID is a legal claim of its own territory, the population register, the major multy economy register, but also the principles and development of jurisdiction, which correspond to the international standards of justice, peace, security and human rights. The only reason for my permanent decentralization is only European terrorism that really damages all international rights and the principles of the UN Charter, so that in no way can my right to political activities be considered as illegitimate. Crime must not be the judge of the legitimacy of political persons, subjects, and issues, therefore my today position is in Legal activation.

Today I support many African states, the African Union, but also the states in Asia and America. I do not think there is a problem here for Your

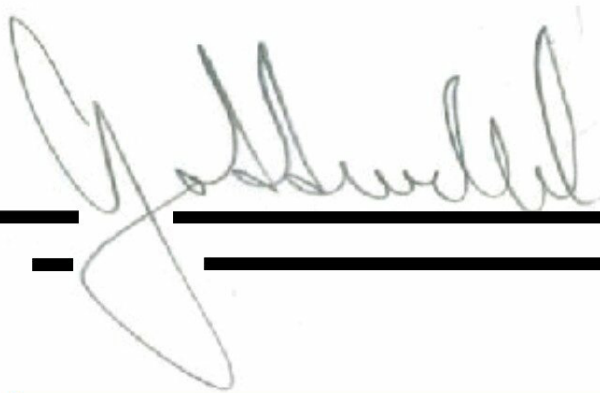

approval of the Indian Government's declaration on the legitimacy of the ID's government. It is a great advance for my party to better stabilize but also to support the development of other states in our world and to provide a better future for our generations, and today it is really important to prove the utmost value of the success of the development of international rights over a period of at least the last Seventy years.

My security is guaranteed by the law based on the IAIC, the International Advocacy Intelligence Council, as a document defining the Office's general functions, and therefore also the ability to develop without blocking every day.

I would certainly be very happy that Your government would also support contact with the Indian Bar Associations which can therefore provide the ID's Office of the Provisional Authority, which can further grow at the level of the advanced political entity that establishes logistics for the stable development of partnership and the mutually beneficial relations between our states, The establishment of cooperation between our Banks, the development of joint market cooperation, the development of partnerships in the security sector, as well as a strategy of mutual support for the growth of our civilizations.

I am really very glad for Your time for my news, I am very glad for Your peacefull development, and I am really very glad for Your Interests. One time, when a worldnis function stabile and peacefully, we can commonly stand together, and celebrate our world, our national development and also peace of every nation. This is way of our future which give us a much better prosperity of the policy and civilizations, and our people is very glad for our friendship. For it, we are is a policy, to give the best for our nations.
