What Makes Computer Science the Most Preferred Engineering Branch in India?

Engineering in itself is a very hot profession today which an increasing number of youth want to pursue. There are many branches of engineering taught in various colleges in India, but computer science is the most popular of all. You may check the **gwalior top 10 engineering college** list, or those in Delhi NCR, or any other part of the country, you will surely notice this trend. Even in the topmost engineering institutions of the country such as the IITs and NITs, computer science is the favourite branch. So, what makes computer science the preferred option for many engineering graduates? Well, here are some possible reasons for that.

Firstly, it is a known fact that IT sector is a blooming sector in India with an annual growth rate of over 10%. In such a scenario, there is no dearth of jobs for CS graduates or B. Tech computer science candidates; the future is even more promising for them. In other words, there are ample of good jobs available for computer engineers in India. The job security is also relatively high. There are many superb overseas opportunities as well, if you are a deserving candidate.

Secondly, there are a lot many choices available to a CS engineering graduate. They can opt for a role of their choice from the varied choices available before them such as software engineers, system administrator, programmer, game designer, network engineer, and IT manager, to name a few.

Thirdly, the salary packages offered to computer engineers are much more lucrative than those offered to the engineering graduates from other branches. If we talk about the top companies in the field of software and technology such as Google, Facebook, IBM, Cisco, Oracle, Cognizant, Infosys, etc., the pay packets they offer to candidates are unbelievably high and many benefits are also provided besides remuneration, provided you are a truly capable candidate.

Fourthly, the success stories of several startups in India such as Snapdeal, Flikart, Myntra, Ola Cabs, and several others, which are all founded by CS engineers, have inspired a whole generation of students to pursue computer science engineering.

So, if you are also thinking on which engineering branch to choose, computer science would really prove to be an intelligent choice. If you stay at Gwalior and looking for **top engineering institutes in Gwalior**, then we would like to suggest you Amity University Gwalior, which is a leading private university in Madhya Pradesh for engineering studies.
