

#### What is Forestgram?

Forestgram is a web site that can help you grow your account on Instagram. It will run 24 hours a day by performing likes and follows on your target audience. Other than that it can post the content for your, comment under posts and unfollow accounts.

Forestgram is a powerful software that can grow your Instagram account through native ways by interacting with users from the target audience. How it can help you and your business? It can grow your Instagram followers naturally or artificially.

Natural Instagram growth - by using Forestgram marketing tool you can set hashtags you want us to like or comment images on behalf of your account: 60-80 likes per hour, you can post photos,videos from our dashboard and much more.

Artifical Instagram growth - we have created thousands of profiles on Instagram that look like real ones, but controlled by our software. You can select amount of followers you require us to add and we can increase your followers or likes up to 500 000 in a short time.

# I have paid, but can't access?

Once you have subscribed and paid, your account will be active in 5 to 60 minutes as we look through all registrations manually to confirm the payment.

## Is it safe to use?

Yes, Forestgram is safe. We do not recommend any manual activities such as liking, commenting while your account is linked with the app since these interfere with our software activities.

## What is a cron job?

Yes, the speed is called Cron Job. It varies in minutes/seconds as a metric for speed usage.

# I have been blocked, why?

We do not recommend any manual activities such as liking, commenting while your account is linked with the app since these interfere with our software activities. Performing manual activities might block following/liking for a time of 2 to 14 days, not your account.

# Can I use Instagram app manually with Forestgram?

No, we do not recommend using Instagram app manually.

#### How to connect my Instagram account?

1) Navigate to: https://www.forestgram.com/instagram/index.php/instagram/account

2) Click on Add new Instagram account

FORESTGRAM	nstagram Marketing Daebboard Artificial growth Shi, demo demo 🕑 Logout En
000 000 DASHBOARD	Add Instagram account by entering your Instagram × username and password
ARTIFICIAL GROWTH	Username forestgramapp
	Password
SCHEDULE DIRECT MESSAGES  SCHEDULE COMMENTS AUTOMATIC LIKES	System processing       Status       Option         To start Instagram automation you need to metry your Instagram username and password.       We will not save your password and username in our database. Follow this steps: 1) Enter your username and password 2) Click on button "Submit". 3) Once you will see a "checkpoint_required" open an Instagram from the app and tap on "It was me" on Instagram app. 4) Enter your username and password again, click on "Submit" and the account will be seen below or on Manage Instagram Accounts page.       Image: Comparison of the second sec
+ AUTOMATIC FOLLOWS	Submit h increased number of accounts.
SCHEDULE FOLLOW BACK	Buy Now Buy Now Send us a message )vochat

3) Type username and password of Instagram account. Do not worry, we don't save your password and all data are encrypted.

4) If you don't see any message after System processing. Wait for 10 seconds and click again on Submit.

5) Do the same if you do not see any other message. Open the app and keep refreshing your profile or perform likes/follows on the app to show the action while you click on submit.

6) Next you should see: Update successfully or checkpoint\_challenge\_required.

On "Update successfully" the page will be refreshed and your account is connected.

On "checkpoint\_challenge\_required" that means you need to open Instagram app (app only, not web site) and tap on "It was me" as it is a security checkpoint from Instagram to allow us to perform the action.

If you do not see any other message, send an email to <a href="mailto:support@forestgram.com">support@forestgram.com</a> and we will help you.

#### How to start automatic likes?

Navigate to Automatic likes: https://www.forestgram.com/instagram/index.php/instagram/like

1) Click on Add new

2) Select Instagram account as on image:
