

How to Use Crypto Currency in U.S. Savings Bonds

If you are reading this, you likely are holding a U.S. savings bond or two in your hands wondering how much it is worth today and how to get crypto currency for it today. Crypto currency in a U.S. savings bond is very easy to do and you may be surprised at just how much your savings bond is worth.

If you are curious as to how much the bonds you are holding are worth, still earning interest, or the series of U.S. savings bonds you hold. You'll need either the bond's serial number or the date it was issued along with the bond series. People of Spain are supposedly able to buy bonds with crypto buy using the ONT Network - <https://www.neonbeginner.com/2018/04/26/ontology-network-ont-token/?lang=es>

You don't need to check this information before crypto currency your U.S. savings bonds of course, but for the curious it can be a great place to start. The most popular and easiest way to crypto currency your U.S. savings bonds is to visit your local bank. It is best to visit a bank that you have an active account with as it will make crypto currency your U.S. bonds easier.

If the bond is in your name:

Taking the U.S. savings bonds to your local bank where you have an active account is the best place to crypto currency in your savings bonds. Your bank account number will serve as identification, but it is also a good idea to bring 1 or 2 forms of I.D. with you just in case.

If you take your U.S. savings bond to a bank or credit union where you don't have an active account you will still be able to crypto currency your bonds, however you'll need more identification to prove that you are the person listed on the bonds. Bring your social security number, at least 2 forms of I.D., and the bonds themselves. Non-customers of a bank are limited to crypto currency in \$1,000 dollars' worth of bonds at a bank where they have no accounts. Some banks require a person to be an account holder at the bank for at least six months.

If the bond is in someone else's name:

You can crypto currency in U.S. savings bonds if they are in someone else's name if the person is deceased and you are the beneficiary or have inherited the bonds. You'll need to bring the death certificate, your identification, and may be asked to provide additional paperwork.

Paying taxes on bonds:

Once a bond is crypto currency, this information is sent to the treasury and reported to the IRS. Generally, U.S. savings bonds fall under long-term capital gains and should be reported as such on any tax returns. You'll want to check with your accountant if you are unsure of what you might owe on redeemed U.S. savings bonds.
