

NEW: US election data was forwarded from Frankfurt, Germany to Rome, Italy where the man pictured below partnered with members of MI6, the CIA, & the Italian defense-contractor, Leonardo, led the operation & built the algorithms that were used to manipulate US election data. ▼

1/ This is according to articles & videos shared by tech entrepreneur [@PatrickByrne](#) who funded private cyber-security teams to monitor the 2020 election. The report alleges that US election data was altered then sent through an Italian-military satellite operated by Leonardo.

2/ Leonardo is an Italian multinational company specializing in aerospace, defense, security, and the eighth largest defense contractor in the world with €13.8 billion in revenue in 2019. The Italian government holds 30.2% of the company's shares & is its largest shareholder.

3/ Former CIA Senior Operations Officer Brad Johnson & the current President of American's For Intelligence Reform ([intelreform.org](#)) discusses the operation behind the alleged US election hack in this video shared by [@PatrickByrne](#).

5/ During the election, something unprecedented in the history of US elections occurred. Vote counting stopped. At that point, Rome went on stage by receiving the data from Frankfurt in order to recalibrate the hacking attack to deliver the victory to Biden.

The role of Leonardo and the Italian government in the fraud

At this point, Johnson offers a revelation even more shocking.

There is another actor that played a crucial role in this operation and it is Leonardo, an Italian government company leader in the aerospace and defense sector.

Once that the hackers created the new algorithms to switch more votes from Trump to Biden, they sent "these new numbers back up to a Italian military satellite operated by Leonardo" claims Mr. Johnson.

After been doing this, the new manipulated data were sent back to the Dominion voting machines in the US.

Therefore, if this version is correct, the Italian government would be directly involved in this attack.

Leonardo's largest shareholder is the Italian government, because the Italian ministry of Economy owns 30% of this company.
