PASSIVE INCOME WITH GAMING

First of all register Here (Gaming Marketplace)

What you will need :

- **Internet Connection**
- **Social Networks Account + Email Adress**

The website I gave you above is popular site where people sell Games, Giftcards, ... usually for a lower price than anywhere else. You can buy and sell basically anything game related on there, but that's not what you are going to do to earn passive income, it would involve too much active involvement.

The website has a referral site where you send your personal link to people, as soon as they click on it the site saves your personal cookie on their PC. If they continue to buy something from the site, you are gonna get a portion of what they spend.

An important things is that the referral system on the website has 3 levels : If you refer someone, and then this person refer someone and then this person refer someone, you will earn money for personal buying of each of them !

What we are going to do : We are going to contact Twitch streamers & Gaming Youtubers (on social networks or on their "contact" email) and present them this referral system, they will see an opportunity of monetizing audience and will register on the website: PUT YOUR AFFILIATE LINK when you contact them ! Then they will put their link in description and brings you Level 2 Referral Click ! And of course brings you commission ! And then brings you totally passive income :D

Steps by Steps:

1- **Register Here**
2- **Find Small Gaming Youtubers & Twitch Streamers (big one most of the time already have their affiliate link in description)**
3- **Contact them, be friendly and present them this system as an opportunity to Earn Money for them ! Don't tell them that you get commission :D ! Of course include your affiliate Link !**

4- **Repeat steps 2 and 3 and enjoy your 100% Passive Income (they will continue to upload video and it will brings you more commission)**

PROOF (After 3 Months):
