
The Federal Government of
The Imperium of Diamond's

Greeting to The Movement of
The Pirate parties

Thursday, December 14, 2017

King Gottwald Peter, ID's

<http://www.TheImperiumofDiamondsGovernment.populiser.com>

Great Day Dear Representatives for the Pirate Parties and Pirate Coalition Partners, Groups and Movements.

I am also honored to welcome Mr. Rick Upsal, Dear Founder of His First Pirate Political Party, and I also welcome Dear Present Representative Guillaume Saouli, representing the International Pirate Party.

Congratulations to Dear Rick Upsal for Your success in setting up an active political party, and there is still real international development in Your activity as well as active political outcomes and good intentions on the level of human rights.

My congratulations also to Deputy Chairman Guillaume Saouli for the International Pirate Party, along with Bailey Lamon Vice-Chairman, and I also greet all Your members of the General Assembly, and I want to offer You many new steps and beneficial opportunities at the level of international development.

I certainly congratulate You for Your success on 18 April 2010, the foundation of the Pirate Parties International in Brussels, at the PPI Conference from April 16 to 18. Political visions connect the whole world and therefore it is necessary to expand globally to inspire people in the rights of their freedoms perspectives for future generations, as well as I am interested in supporting today's new steps for You.

My name is King Gottwald Peter, I was born in the Czech Republic right in the beginning of 1992, but today my legal citizenship is the status of the new government of the country with the legally claimed territory of ID's Diamond Oasis North East Africa Bir Tawil as 2062 square kilometers between International borders of the Republic of Egypt and the Republic of Sudan.

Today, I am a representative of the government of the country which is at the beginning of development in the issues of stabilizing the function of administration, civilization and population activities, but according to development plans and also on issues of legal rights at the international level of political rights, it is real that today I represent the new government of a country with a position the most dominant and advanced entity on a global level and with the full need of other countries' transits abroad to their question of a stable level of significance for their existence.

The visions of my political goals are peace relations, growth support for friendly parties, and development of policy to the level of the One World issues, diplomacy and friendship on legal issues to achieve unification of the whole world and thus the declaration of a unified nation.

I also wish to all the Pirate Parties the opportunity to make a much better note of responsible developments allowing for the growth of Your internal policy in an organized direction, and I want to offer You truly serious steps that will be a significant success beyond Your present interests of political visions on Your states and international politics.

It is my purpose to communicate with You and to open up new perspectives for You that can bring significant profits to Your country's future and ensure open capabilities for the growth of political positions at government level, together with significant global political and business relations.

Surely I would ask Your graduation for the purpose of combining communication between all parties of the Pirates in Europe, abroad, but also in Africa on account of my current origins and thus also enabling our common

communication on the issues of our common challenge, allowing us to openly make use of my offers which bring You a major development at the global level and the ability to outperform Your current vision, but also to unite the world.

To support a step towards the unification of mankind is truly a significant opportunity for the human future, because the Unity of Humanity is today the most important act of history since the time of the first man's birth until today. The united world is also an act that most influences the future of human existence and the ability to significantly and dynamically alter the future history of all mankind on a global level. The unity of mankind is an act which, in fact, is the most important step on the level of human history as well as the future, and against such dimensions it is true that our present does not have the responsible nature of the dimension of competitiveness. Therefore is my reason to support You so that we can jointly support Your own future of Dear Pirate Parties in the Peace and for the sake of legal issues, in cooperation with other states, political parties all over the world and between the state movements as a developmental step a world superpower that determines its development and its aim only for peaceful purposes and for the prosperity of the whole world, peace, and a good economy to the united nation.

I am honored to meet Your side and see on Your side some personal things that are mutually and similar to our ideologies and beliefs, but the political vision is partly different to my goals of small basics, but in any case our vision is similar to some of the policy goals which we can jointly develop and maintain a profitable drive for Your states or strategically gain more support from the societies of the peoples.

At my level of political vision, I, in any case, support the protection of human rights and people's claims for their protection, and I always want to activate it, but I also allow You to take part in many of my projects, allowing for extensive support for countries in a critical position.

However, I support copyright in the issues of full certification by its creator, with a view to the right of users for the possibility of their easily accessible source, but in any case, I fully support free access to public information as well as allowing free of charge study and training at any age, any idea of a peaceful species.

A very interesting and futuristic idea of Your interests is also a vision of the issue of the patent rights of the gene and life, in the form of questions with which we are likely to reach a common view, but also opposition to my vision of the development of the world and future generations, an individual to his right to his own identity in uniqueness and the claim of his status as a human being without regard for the harm of his human rights, in respect of everyone and the right to freedom of meaning throughout his life. A human being is individually untouchable and no one can harm his or her liberty on the level of his or her genetic form in health and nature or his free acknowledgment, but everyone is entitled to support the growth of the scientific industry and the rights to the genetic forms created in the laboratories. a recipe for medical use for patients and their treatment.

In any case, our vision is united on the issues of strengthening civil rights that are being harmed throughout the world, my goal is to promote the development of the transparency of the governments of the countries, but also to ensure transparency in the issues of the self-standing of my government company, and the speed of support for peoples in their fair dealing truly important for

achieving the future of the freedoms and justice of our world, as well as the freedom of expression for individuals, groups and states, and because of today's human rights issue, it is also true to recognize the right of anonymous denunciations and protection of peaceful communities of anonymous significance the purpose of self-defense.

Indeed, I also appreciate Your current position of Pirate Parties recognizing the Pirate Movement as just a showbusiness, but without the direct activity of crime and fraud, robbery or violation of international rights. My vision is to maintain a system of international law, freedoms and justice for people and states, and thus to preserve our freedom and the human basis of the existence of many nations.

The freedom of the nations is an invaluable factor leading to the more significant successes of the development of the world's future for nations and the achievement of real successes on issues of national interest against ideologies and the envy of ignorance of the minds of the dictators and traitors of their own states who only damage their own countries' of interest, meaning that these visions and many future generations will be postponed to a mere topic about their beginning.

The nature of man is unity, peace, cooperation and mutual prosperity, and these are the steps that our civilizations have established, together with today and in the future, our nations are developing to the level of unity of all mankind, in the name of the One World vision that I am opening today. I ask Your movement for the possibility of our joint co-operation agreements, except for the unification of mankind and the establishment of the most important steps that will be written into the history of many world nations.

Therefore, I want to invite Your Pirate Parties all over the world, active in the name of the certification of Parliamentary Institutions, or just as a resistance community, and thus also visions designed to achieve our organized cooperation for the purpose of The One World, a vision of the nature of every child free and wise man, and today I offer the possibility of our unification and the establishment of a true form of joint administration between the government and the national movement in the forms of world centralization of people and states and all movements establishing our unified rule under the legal status of my society, representing as the highest step of mankind in matters of human development and achievement of the most important achievements of human society, as well as peace issues for all our civilizations as well as for nations.

Because of my position as a foreign group that respects the integrity rights, as the first in the matter of the Pirate Party movement today, still as a non-parliamentary political party without registration, performing through the formation of its group and vision on political ideas, and indeed community reality and responsibility as a party federation on issues of ID's co-operation and the development of steps to unify all mankind.

One of the founding projects is the step of jointly declaring the unity of our peoples to enable joint development as a single entity of a state summit in responsible development, embracing politics such as the International Coalition of all Pirate Parties throughout the world and the possibility immediately under the legal status of the federation, civilization and actively disseminate their administration and the growth of maturity and global importance.

Today, therefore, for Your parties, I give the possibility of new policy visions, new successes and the centralization of all Pirate Resistance Support Mutations, giving You a lot of new opportunities for joint development and growth for Your

movement, achieving global collaborative development efforts The Global Independent People Federalization, thereby promoting the direct growth of the global power of unity of mankind and the maturity of the values of our future of the world as one nation.

The Global Independent People Federalization is a step in friendship between nations and nations, as well as responsible for maintaining the peace, integrity and unity of all nations without harming their territories and governmental forms.

The goal of the project is the ability to unite many nations of mankind and thereby also to build a very significant future for the peoples. Everyone as an individual, but also a group, has the right to affirm their dual citizenship to the state and thus to confirm their development of the responsibility of consistency with their existing civilization and political interest, as well as the use of second-generation resources, The One World, the vision of The One World project, and so to give Your own country a new opportunity for Your territorial and civilization development in uniting with other peoples and stepping up in uniting our civilizations.

The offer as a step for the development of the size of the state territories as well as the strengthening of the economies and allowing a more mature growth of civilization even in much stronger capacities, these are the offerings of values for which the states and peoples fought each other for many millennia, risking the ending of their own peoples, even for decades, hate people were willing to colonize, enslave and murder the peoples of the other states, all because of their land and wealth, the values that I offer today for Your peoples and governments, always in peace and friendship, and therefore we together we have the proud right to stand up and in the interests of our countries together to say that we are the real pride of our nations and an important future for the name and meaning of the peaceful nature of the whole world, the evidence of the development of diplomacy values as well as the real results of the longstanding development of peace and friendship of world politics, the directions of our interests and attitudes.

One of the first population statistics, the result of this project, can be 1,500,000,000 people worldwide, one of the most important nations and the ability to truly build the world's most powerful civilization.

Therefore, my honor is an invitation to all the current Pirate Political Parties all over the world 2017, Partido Pirata de Argentina, Democratic Pirates Australia, The Pirates Center of Belarus, Пиратское движение Беларуси, Belgium Piratenpartij, Piratska Partija Bosne i Hercegovine, Brazil Partido Pirata, Chinessen 中国盗版党, Partido Pirata de Chile, Colombia Partido Pirata Colombiano, Cyprus Pirate Party, Magyar Kalózpárt, Pirate Party of Honduras/Partido Pirata de Honduras, Pirate Party of India, Ireland Pirate Party Ireland / Páirtí Foghlaithe na hÉireann, Пиратская Партия Казахстана / Қазақстан Қарақшылар Партиясы, Pirātu Partija, Pirate Party Lebanon - بزرحد, Lietuvos Piratų Partija, Malaysia Pirate Party, Partido Pirata Mexicano, Pirate Party of Morocco, Pirate Party Nepal, Pirate Party of New Zealand, Partido Pirata de Perú, Portugal Partido Pirata Português, Partidul Pirat România, Piratska Partija Srbije, Slovenská pirátska strana, South African Pirate Party, Partido Pirata, Pirate Party of Taiwan, Turkey Korsan Partisi, Pirate Party Of Ukraine / Піратська Партія України, Partido Pirata en Uruguay, Partido Pirata de Venezuela, surely it is for me to be welcomed to have the opportunity to use Your international organization for the purpose of handing over my invitation to the establishment

of the function of our joint government within the horizon of the new territories of world centralization and the purpose of establishing the unity of our world and the growth of the future of our nations, and a good growth with conviction of the world's successes of victory in the sense of the unity of our country governments, as well as the enrichment of the federation with a new format of the subject of civilization at the founding of the Pirate Party of a peaceful nature.

Already today, the first objective is to ensure the interconnection of offices at international level and therefore to initiate our joint administration and confirm our mutual trust capability and thus also to ensure a strategy that will support the unification of our group, the founding possibility for the growth of the direct civilization of all Pirate political parties by his own power standing in peace.

Today, therefore, in the form of a vision of stability goals of the Federation, the Hungarian Founding Party of the Pirate is an excellent partner for the establishment of cooperation due to the current position of the group in legal form as an NGO and therefore has a stable opportunity to expand coalitions with other Hungarian NGOs as well as around the world as a flexible federal logistics in the form of Ministries over matters of public affairs, enabling governance in the common prosperity and ideology of the growth of the One World issues, categories of sport, culture, social affairs, media, trade and economics, diplomacy and official development, urbanization and civilization development, army and security, education, and many other important strategies that determine the purpose of developing our shared power of Global Intelligence, enabling our mutual growth as an activity with the meaning of The One World.

Today, the Pirate Movements in Taiwan, Venezuela, Malaysia, Colombia, China, based on discussions about the founding of the Pirate Party, today only active as a community leading to a vision of Parliamentary activities, it is beneficial for You to take advantage of the opportunity to contact the Federation for the purposes of actions this is also the ability of a much greater increase in support from Your state-owned society because the benefits of our unity options are only a vision of more beneficial possibilities and strengths for Your future.

It is also true that even the metaphorisation of the name of the Pirate Movement blocks for You the freedom of ideological development among society because in reality the company is shocked by the risk of piracy and people are really afraid long before they are able to see Your common interests of a prosperous ideology. It is also a good idea to use the names of The One World as the World Coalition of Political Parties to unite all mankind and to promote unity to all world nations.

The Pirate Party in Nepal will surely gain much more success in terms of state members of the movement, ahead of even more than 10,000 signatures to be elected.

It is also a good opportunity to enable ID's to cooperate in Your cooperation and to create a procurator structure, to select several representatives or members of Your party for the purpose of partnering with our common interests in a joint venture, thus enabling global centralization of all movements and communities of the world together with their strengths and abilities the achievement of a global, organized community that gives us the strength and potential for cooperation that is more important and prosperous to us in the foundation of the importance of global unity.

This will create the office of the Office's Global Network, thus enabling our unified opportunities for joint growth and unity, gradually evolving the

development of central civilization with the ability to re-centralize the global network of offices into a unified center in our territories.

The joint office of the Office must focus on global diplomacy and building the strength of our society, together with the intent of achieving full activity and centralizing resources in the form of traders, resource development resources, other issues and intelligence.

Regularly, we will jointly set up Internet Conferences on a global scale but also together in the form of direct congresses in a unified address where we can together discuss openly as a unified group, thus establishing our coordinating development strategy on issues of our common interests and the development of global diplomacy relations.

One of the strategic interests of global diplomacy is for us to establish a global coalition of all political parties in the world who jointly represent the One World project, activating the goal of diplomatic unification of all governments and maintaining an active coalition, The One World Party, the first beginning of the importance of world unification of the single world ideology as a civilization without frontiers and the differences in the policy of the governments of the countries, always with a function as a single nation and at the same time a unified civilization aiming at unified maturity and equivalence in the peaceful significance of questions of our cooperation and the rights of the peoples of all countries of the world as a united world.

The One World Party, as well as the composition of all parties involved, for the vision of human unity and the function of a global level of civilization, establishes a confederation of political parties leading a representative administration over a new planet in the universe where our new civilization is formed in the membership of our federation, the form of The New Earth as a planet without the opposition of a second territorial entity and also as a single nation, a state and a global civilization that, because of their own unity in the global position, always represent a much more important subject in politically and civilization than the significance of our present multitude of formal civilization of the planet A country where every single person living here can only use his own state of affairs like small part of our world, and so the value of globalization, The One World, is still diminishing and extinct.

The One World is the value of the unity of mankind, the importance of human life for the commercial base right now across the globe without a border with just one state, the One World means morning wounds in Paris, morning minigolf in New York, lunch in Being, and all-day activities in the range of all the countries of the world and significant progress in the dynamics of the development of our civilizations, and above all, the overwhelming force for the promotion of human rights and peace throughout the world.

My prayer for You, if in Your interests and the purpose of our federation with the vision of the One World and the promotion of a new future for Your nations, is also a federal strategy of official stabilization in supporting NGOs for the purpose of our unification and thus also by enabling the growth of global intelligence in the form of centralization of all world societies, in order to underpin the dynamics of our common civilization.

Worldwide centralization of NGOs also means connections on the global scale of society and therefore also the open capability of our development in the protection of the power of global voice that grows the purpose of peaceful advocacy and the ability to oppose the terrorist dictatorship of most types of all

forms of our present forms of opposition.

Continuing, ID's Corporatocracy is an advantageous step in the development of significant progress that will be a vital force and function for our global cooperation on world trade cooperation, and an opportunity to recognize our society as a truly significant entity on a global level.

Every trading company worldwide has the right to establish its second trading venue in ID's Corporatocracy, which also means the ability to create a special kind of business branch by a legal name as part of the administrative alliance of all active Corporatocracy traders, thus creating a global centralization of the global market into a single trading power with the function of a common civilization development, a new step of the idea of civilization and the future of mankind in unified trade without competition, and the reasons for market opposition and the growth of hostilities between states.

The goals of our development strategies are extensive and there are many. Most of the information is publicly recorded on the Internet, but many other important strategies will be created only in the period of unity of the office and administration of central territories in the performance of state integrity.

The unification of foreign and global groups and communities is a strategic vision step, and everyone in the world has the open right to expand and build world societies together in peace and our friendly co-operation.

It is good for You to support, for example, diplomatic unification and friendship in the interests of partnership with the Anonymous movement, all Anti-fascist movements around the world, the movements of legalization rights community, the free media community, community of activists and human rights organizations, and many other endeavors the importance of good progress in society, and thus of our common prosperity, which implies the performance of a joint office and the centralization of a peaceful society, thus enabling the growth of the global link and the development of the global format of government with an alliance on more than just a global level.

Today, there is no Opposition, only people who lose their political status and noble name in human history, it is only important to create a petition against criminals and to draft their mandate as an act of state self-determination, thus allowing all criminals to be stopped immediately in international cooperation UNSC, UNGA support, together with the possibility of publicly organizing a global military coalition to overthrow and replace all criminal politicians through peace mandates freely chosen by the nation.

In the light of the vision of the One World, our whole world can therefore courageously support the growth of massive world protests against anyone in our opposition.

The goal of our civilization cooperation is to establish a central cooperation on ID's Diamond Oasis, together with the goals of expanding our civilization around the world according to the peace strategy of the diplomatic growth of our civilization, also in our goals to establish new centers at our new positions in International Waters secret industry, but we also set up new civilization centers on other planets in space.

Our civilization will be the centers of the world's highest economy, but also the world's tallest skyscrapers, advanced transports between galaxies and cities, a fully autonomous industry with a record power of production, as well as the significant values of our development openly to the world's favors and the interests of all the world's states The One World centralizing our world unity.

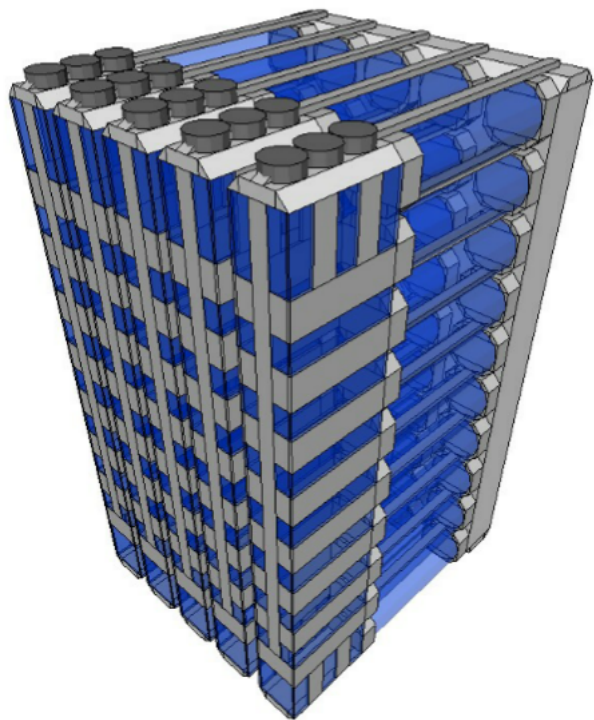

That is why I hope that my vision is a good inspiration for the future of our cooperation and it will always be beneficial for us to bring together our strengths and interests and thus to support the creation of our global centralization, meaning the unity of mankind, and therefore also great success for all of our parties.

Thank You for Your time and dedication to my text, and I am also grateful for Your efforts to cooperate with the development of the unity of world society, and I wish all Pirate Parties worldwide the many possibilities of our unity and the growth of the global evolution of the steps of the new history of mankind.

King Gottwald Peter

Federation High-tech Industrial factories

50 tubes of industrial construction, one central factory for component production, opportunity on production 50 airplanes per one hour.

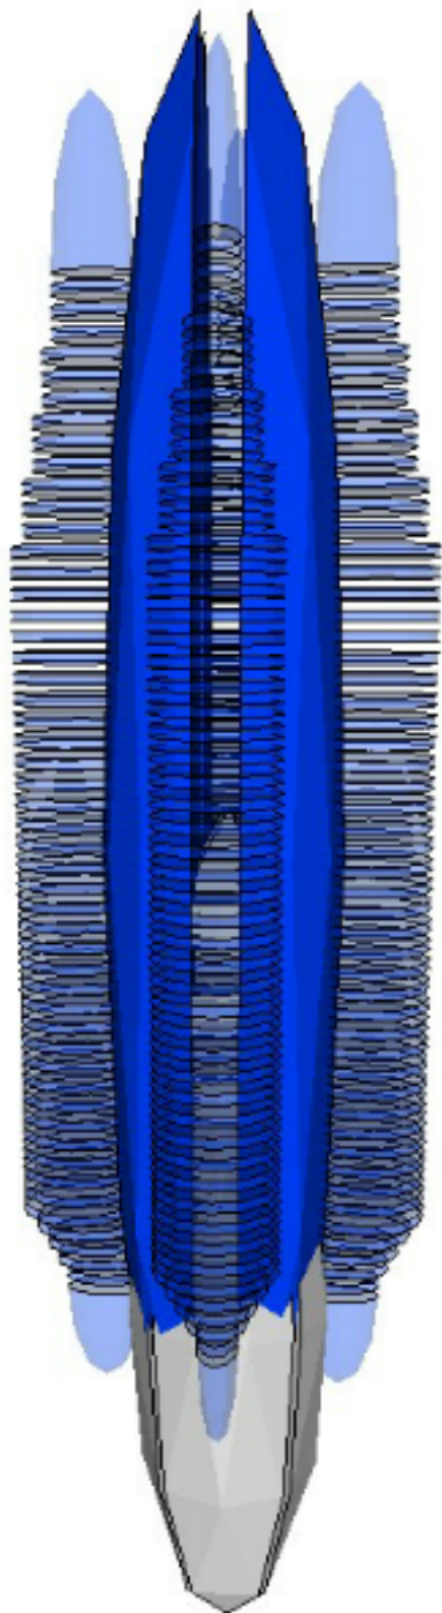

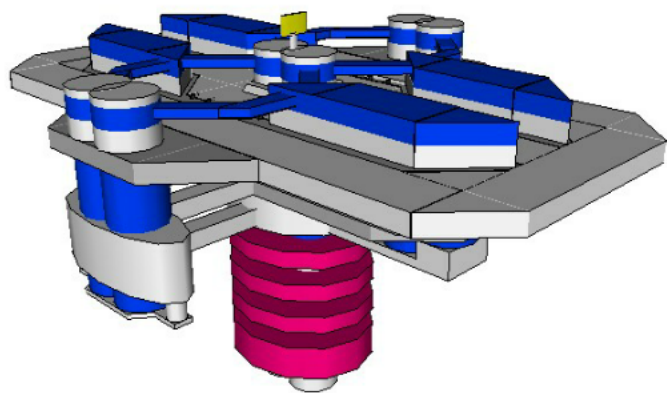

The Levitation cities of Federation

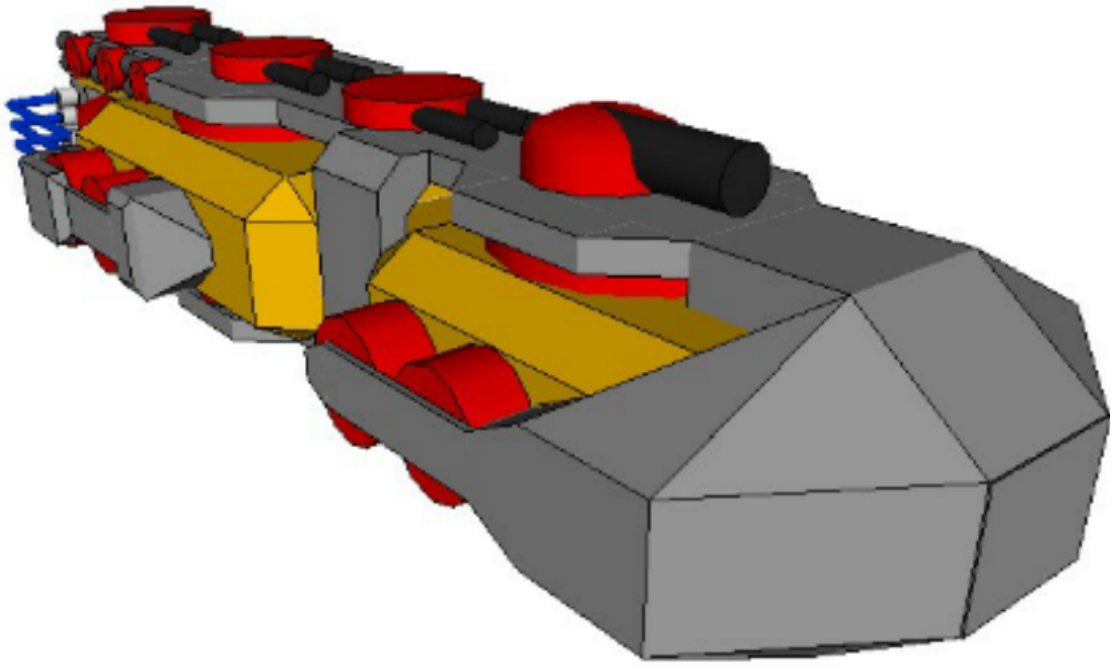

Opportunity for life of people in cities for capacity of 1,500,000,000 people.

Planetary Airspace, Orbital zone and free space, interstellar travel.

Levitation Airport

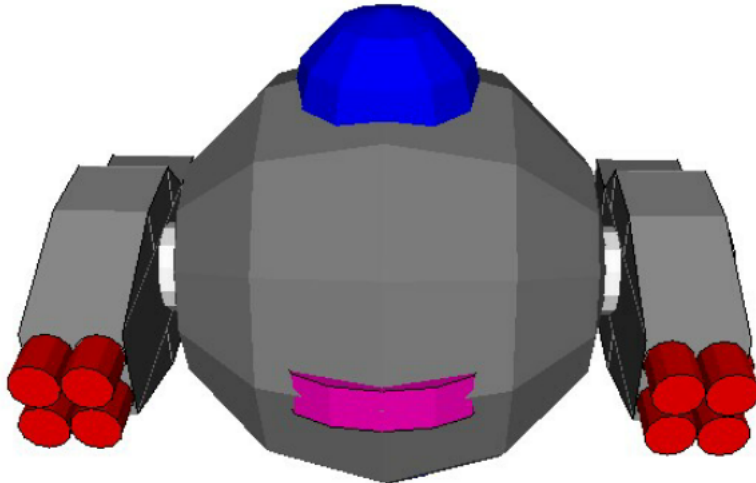

Real Technologies for travel between Galaxies
