The opposition against us is a betrayal of human values and our rights and freedoms of all peoples around the world! Our pride is always stable and with full force, because our interests are always much more than any of the values of our opposition.

UNSC strategy on self-determination of states, under the UN Charter

If all micro-states around the world jointly declare their own interest in the alliance and the federalization of the Imperium of Diamond's, then this will create a global act based strategy for the unification of all countries and nations throughout the world.

This is a strategy that is therefore becoming an important value for UNSC States, which in this case therefore, in the interests of rights and principles of the UN Charter creating the UNSC decisive strategy on the state of self-determination.

We are is much important strategy for whole world.

If your strength of our cooperation will be full stability and the ability to organize jointly in a stable form Federation of Diamond's Imperium, that means you increase the value of your countries at International level and in politics. This UNSC will favor your interests against other governments of countries which collectively be suppressed by their sovereign rights in the UN decision.

If your movement self sufficient power territorial democracy or owned such rights, then in this case, your position is still high ability to obtain prioritization and full rights for declaring their Independence in the name of the strategy of the UNSC as an act sponsored by the UN Charter, more than 193 countries throughout the world!

Subsequently, if the UNSC, UNGA, or any other entity is any way to create activities for the purpose of blocking our interests to develop in the name of ONE WORLD, and the unification of all mankind, then it means that the whole world that it obtains rights to come together and organize, to declare joint global poll every person in the world and thus decide on the unification of all mankind! The One World, basic nature and main plea of every man! A world without borders, without territorial conflicts, without wars, without economic distinction, without depending on another state, this is the New World and the first steps of the entire history of humanity as a truly united human world!

Today, European governments and their joint terrorist alliance together to block such rights and interests in order to The One World! Media blockade, communication blockade, isolation and decentralization, apartheid against the human person and apartheid against the country, murder and genocide, provoking conflicts of the First World War! These are the worst crimes in the world, and against all the principles of global politics!

These are crimes which, therefore, robbed everyone in the world, which prevented the theft of global knowledge about the strategy, The One World and the opportunity to exercise this right!

According to all International laws and principles, every nation uses its own state because democracy to elect their own government of country. The nation always has full rights to decide on the country's government and its function, and therefore decide on alliances and International relations, government, and membership in International organizations and by transforming our own relations and rights and principles and form of government and its own territorial scope! Rights that are currently confirmed as party and the UNGA Declaration on the Rights of nations for their self-determination and the establishment of their own state system, of the universal declaration of human rights and freedoms, claims by States for their democracy! So that means that European governments

severely damaging all the rights of every person in the world, and this is a responsibility of the European governments and the whole range of their terrorist alliance immediately to ensure the opening of this right to all States and peoples and thus give full entitlement to each person to exercise their own right to democracy and declared that together our common unification, unification of all nations around the world! The biggest step in human history, as well as the main dream of every man! Even from nature, the biggest life goal of all nations, because the unity of humankind was created everyone!

The rights that the European criminal alliance to fully stabilize, and thereby also every government countries always support!

So we do not want to rob any government of the country and harm the territorial unity. We thus support our global unification and rapid increase in forces of every state the true value of freedom for all nations as an act of genuine universal law!

Therefore, together we can ensure our common stability and thus build up a global strategy which means the development of our rights with the support of UNSC strategy on national self-determination and full guarantee of our freedoms and winning results !!

Each person around the world is born for the glorification of a united world!

Please submit a certification of the joint diplomatic relations, or your interest for our federalization, support the unity of our human world and put your right peoples to unite to send your documents to E-mail IDs.Fed.Gov@gmail.com.

If your e-mail address will not be confirmed by return communication message, then please use another option. It is best to build their own office representing the Federation of Diamond's Imperium and the launch of our joint defense of the rights of free communication and ensure full stability. There is not any entity that has rights to harm our integrity. The entity that in any way harms our integrity in accordance with International law became the subject of International terrorism and is fully legal to carry out the liquidation of a terrorist entity in any usable way.

Our obligation is to respect the UN Charter and thus also ensure the stability and Independence of all governments, even before they secured acts liquidation of terroristic subject. UNSC then decide to take the measure.

When the UNSC is unable to decide on such a law because such a requirement today declared the power of global democracy all governments, because declarations which are in this case greater prioritization than the rights of the UNSC, that this plan is entitled to build act their own decisions about intervention and liquidation terrorist organizations or even possibly their investigation.

Our first obligation is to ensure the stability and Independence of civilization for all governments. The federal government Imperium of Diamonds offers the opportunity to create our common act constituting the use of the UN Charter principles like duty free development of nations without blocking, and therefore securing and stabilizing the government. Because Imperium of Diamonds also employs strategies according to the principles published by the Act of ID's provisory office, and it is also an act Global Bank Business Cooperation. This strategy is fully able to immediately provide full security of the world economy and Independence of states subject to any opposition in the world! Therefore, our acts of defense are free to start immediately.

If the state will not support any possibility of such an act, then it means that the body does not need to use any stabilization process. Liquidation act of terrorism can begin immediately in the period when all states to refuse to apply a specific date, the act of stabilizing cooperation, whih mean that they are needn't support stability. Imperium of Diamonds gives 15 days for a decision.

Thus, the ability of our communication and stability to develop fully confirmed and secured. UNSC and UNGA own the responsibility to act and to receive full support. When the UNSC can not ensure security, UNSC therefore loses the right to a claim, so we receive the right to use weapons of mass destruction to defend our rights!

Our rights are a priority, there is anyone who can resist against our claims and rights of legal character. Terrorism is terrorism, and every terrorist organization must always be fully discarded!
