

Student Union  
Riga Business School

## **Long-term goals of the board**

The board of the Student Union of Riga Business School has agreed and set forward three main goals to achieve until the next elections.

These goals are described here bellow:

### **1) Strengthen the RBS community**

As mentioned in the constitution of Student Union of Riga Business School, the mission of our union is to build and nourish a community of leaders. Therefore, we will do our utmost to help in building and strengthening the RBS community by bringing together not only the BBA students, but also the MBAs and Alumni.

### **2) Become a valuable partner to RBS administration**

We firmly believe that the Student Union as the student body of the RBS needs to increase our presence in shaping the processes happening in the school. We, as the voice of the students, have our best intentions to work and help the school's administration in raising the academic standards & performance of our school. Moreover, we will do everything we can, to together build our school's reputation and raise the perception of our diploma and institution as such.

### **3) Becoming a sustainable organization**

We want to ensure that the Student Union of Riga Business School develops as a sustainable organization which truly becomes an influencer and thought leader in the Latvian business community. In order to get there, every new board needs to successfully transfer power from the previous board. We take upon us to do our best to ensure such successful transition of power by describing and analyzing the processes happening in each division and the whole union as such, so that can be later on passed on to the next board.
