

# Best Minecraft Server Hosting

Searching for good Minecraft server hosting that might lastly just work and never drop players left and proper? You're in the right place!

On this comparability, we have a look at eight of the perfect Minecraft server hosting options on the market. We inform you all about them, record their options, and tell you what they're going to cost you (there are free options as properly).

But first:

## What to Search for in Greatest Minecraft Server Hosting

Before you buy any Minecraft internet hosting, you must understand what makes some suppliers higher than others. After all, you don't need to get disenchanted after realizing that your host can't do something that's necessary for the way you like to play the sport.

Here's what to look out for:

- Good connection parameters - excessive efficiency, with low latency/ping, and good uptime. When your connection drops, it's the most annoying thing ever. To avoid that, you want to get a server that has ample RAM and processing power. It's easy - the extra players you want to welcome at the identical time, the more highly effective the server needs to be.
- A number of gamers allowed at the identical time - Don't get any internet hosting setup that can handle lower than 10 players.
- Sport servers in the appropriate places - When signing up for Minecraft server hosting, you want to go together with the company that has servers which might be close to your geographical location - ideally in your nation. This can make the connection faster.
- Mods allowed and included -Minecraft loves mods! Your server must not only allow them however presumably also come with a few of the most well-liked mods already included.
- Simple or immediate setup - Servers will be sophisticated, and coping with them can generally require specialized data. This isn't always the case, though. Work with a internet hosting firm that makes getting started so simple as possible. Preferably, you need to simply be able to enroll and start your recreation instantly.
- Contract length - This is something that you just may not realize at first, but it surely is absolutely necessary. Some hosts will want you to pay for 4 years upfront. This isn't unhealthy if you're certainly planning to stay with the host lengthy-term. However for shorter-term tasks, look for hosts with month-to-month payments.

- DDoS safety - DDoS is the most common sort of assault on web servers. It happens when a malicious get together starts making a huge variety of connection attempts to your server in a really short period of time. If there are too many such connections, the server crashes. Why would anyone do this? Beats us. But it surely does occur, especially in gaming. A very good server will protect you in opposition to DDoS assaults.

The next internet hosting corporations all deliver on the features listed above. Let's get the listing going:

#### 1. Hostinger

- Worth: from \$6.95/month

- Free trial: No

- Players: 70

- Control panel: Multicraft

- DDoS protection: Yes

- RAM: 2 GB

- Mods allowed: Sure

- Immediate setup: Sure

Hostinger is without doubt one of the leaders within the internet hosting trade general. You can provide them a shot not solely in the event you want a Minecraft server, but in addition website hosting, e mail, cloud hosting, dedicated servers, or WordPress internet hosting.

Their Minecraft plans deliver on all of the must-have options like immediate setup, DDoS protection, and good server hardware (working Intel Xeon processors and SSD drives with 2 GB of RAM and up).

Hostinger additionally lets you install any modpack you want, and so they help customized JAR information as effectively. In the end, this allows you to play the game as you need it.

On prime of that, you can pick from 4 server locations when signing up: US, UK, the Netherlands, and Singapore.

Hostinger offers their Minecraft server hosting from \$6.Ninety five a month, but you do must

conform to a four-12 months contract and pay for the entire thing upfront. If you want to pay month-to-month, that's \$8.95.

For that value, you get every part talked about above, 2 GB of RAM, and as much as 70 players on the server. There are increased-tier plans available if you need extra power.
