

Islam is the truth. Islam is the true religion

There is no evolution Never development is a great and terrible mistake .... Prophet Muhammad told 1440 years of earth rotation. Also tell the darkness that occurs at the bottom of the ocean and also told that the mountains like the tambourine of the Prophet Muhammad told a lot and much

These are great evidence of Muhammad's prophecy

I must get the Nobel Prize to veto evolutionary theory

First :

Where did that cell originally come from?

The escape of any religion for you and the absence of the God is the idea of holding the existing Sunday

Because your logical mind wants an answer from the creation of the Creator and from the created one

So who created the lonely individual cell eternal loneliness !!!!!

Second :

Do not tell me the election and consider yourself answered to my words because I repeatedly with reason and proof I said it is false and illogical

....

The theme is that evolution convinced us that the creation of the universe is so, and it was not in power, and everything came in vain

Let us come to what you say

A cell that evolves and all these qualities develop in phases (Darwin's approach, of course)

abc

a \ b \ c attributes

To become

cba

In this way you need eight wrong one true

A man with a billion attributes

If it was vain without a maker would be qualities

The law of probability must apply to it

If a billion attributes are to be observed in this way

Of course, my speech is not systematic (the election of a natural election is calculated on the whim of what he said)

We are absurd and not systematic

One billion is a possibility

Billion \* billion random, but this characteristic which is now

A billion \* billion means the wrong possibility to be this current form

And only one is true

My brother tunnel a third to not integrate the qualities of each other to be able to live (so random format) means random random generate each other promise and so on)

I will meet you half

I will pour over 90%

Where ten percent is capable of life

Where are you random class

Someone answered me

He told me that the random target is to find a flying bird and a bird that does not fly and that is stupid and impractical as well as a kind of here began to evolve

Beautiful words of the words of the intensity of my miracles and my words

Dears

If we assume that evolution began here

Until the objects agreed on the same qualities in the stomach and hearing, brain and look and the number of eyes and oases of the brain and the similar back and ears

All these traits, after which forked out of the slums, produced other creatures with the same characteristics in a random way, for example chicken shaped legs, but the legs of the duck, but the similarity resulted new random about the old

Lovely

Where are the resulting slums until they agree on the same current system of qualities common to all

....

Or weave natural selection on the approach of evolution

Or copied the plan of the eternal cell on the scale of Darwin's theory

The legs were also separated by trousers

Where the billions of slums went, which, if absurd, was the eternal, one-stop cell

It was without a curriculum because if it were systematic, Bertm specific and a certain format there was a programmer

Do not let me forget

Separated on the natural selection approach

Bertem had theories of evolution as the two men were suited to the shape of trousers

I have sinned, forgive me, so it was so without slums

....

My love is how I secured mental-minded theories

With developments measured by the author's approach and not measured by logic

If evolution were fixed and manipulated for errors, evolution would be the basis of the universe

Who is handling the mistakes and setting the mark

Two answers to you either the eternal cell of the individual steadfast \

Or its approach was on the scale and words of his theory of evolution and natural selection

You saw that the embryo evolved from a cell

But a cell structured with a DNA-ready approach

With all this rigorous approach to evolution

Mutations and errors occur

So how without an approach or standard or RTM

”

Uh, who killed these products if I kept them so you would not

We have seen the sincerity of Darwin's evolution as a blight that the universe is an actor

We knew that the universe was an eternal cell that I believed and never believed

Greetings
