Presentation of the function of ID's Register of Business Entities in a Situation of Apartheid oppression by a terrorist group

The ID's Business Register is the central register of all business entities under the jurisdiction of ID's government.

The ID's Business Register serves to verify the legality of business entities and to represent legal documents and business contracts as well as legal claims.

Today's state of office is under the influence of apartheid terrorism and the criminal movement that seriously violates the integrity of the state's ID's government and the crimes that cause massive blockades of communication in society or blockade to enable people to safely use the entry in the business register and without terrorist threats and threats and long-term persecution by a criminal group, Therefore, it is not possible to exercise the function of the Commercial Register if foreign cooperation is not allowed for the assurance of office support.

Because of the violation of the Charter of the United Nations as a constituent articles and the economic law of the States in the view of UNGA Conventions and Agreements, this criminal procedure is corrupted, it is confirmed that the activities of the criminal group are a criminal offense which is a claim for the commencement of legal proceedings and arbitration Against criminal organizations and ensuring full punishment and securing the issuance of all debt claims.

Due to the insufficient verification of the register of business entities, this will be used as a calculation of ID's economy according to the ideology of interest for development and intelligence decisive for the skills of civilization growth with the statistics of capital market regulation capacities for enabling the function of economy without the financial burden of differences and the crisis as a form of standard strategy Government regulation. Calculation according to the result of ideology in the sum of ID's planned steps of civilization development and of the economic and commercial infrastructure of markets, which are therefore sufficient strength of legal argument with substantiated evidence determining the right to enforce the rights of the lost economy and the power of such development in the form of all the damaged years. This will then create a budget for business corporations, which will therefore be slowly stably established according to the degree of development and in such interaction by the stabilization standard.

The calculation will then be made for the purpose of assessing the number of commercial corporations to build upon ID's stabilization after the conclusion of the criminal oppression and the act of apartheid against the state.

Primary statistics:

The current status of ID's Annual GDP (according to the equation) in 2016:
845,000,000,000,000,000 times the Earth's GDP in 2015, and the multiplication of the resulting number with the number of seconds throughout the year. Annual GDP ID's country. *1

Active GDP: a theory of € 300,000,000,000,000 in DMD. *1

*(*1= The calculations are only above the basics of the weakness of the accuracy of the definition because of the lack of intelligence performance of only one person who, due to terrorist oppression, is not able to use the intelligence of all projects because projects are under blockage and without the ability to research and therefore the real power will be much larger Sum, and the present result is only an act for putting the stabilization economy in operation and demonstrating the stable reality of the level of demanded bonds)*

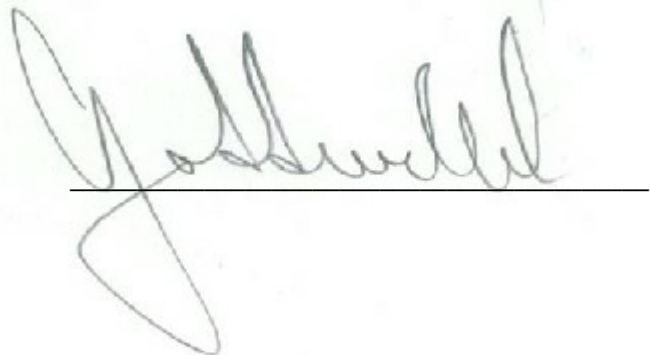

Preliminary number of business entities ID's civilization:

7 500 000 000 000 000 000 business subjects *1
