

Air-Travel Safety Checklist

With a pandemic sweeping across the world, safety has propelled to an all time high in our lives. Of course some still say, 'if it's my time to go' however there are some simple safety precautions that you can take to keep you from exposure to the many germs, virus' and bacteria that are everywhere... especially when traveling.

Some of these may seem obvious but for complete understanding and safety, I am putting on this list:

1. Stay home when sick.
2. Wear a face mask to avoid catching or spreading germs
3. Wash your hands often
4. Avoid touching your eyes, nose and mouth with dirty hands
5. Travel with you own personal water bottle
6. Social distance where possible (avoid crowding in gate areas/baggage/TSA)
7. Travel with wipes, and wipe down areas you will be touching (seat, tray table, seatbelt, window shade, handles and knobs – doors)
8. Carry hand sanitizer and use it after touching objects
9. Wash Your Hands Often
10. Check-in for flights at home, or before arriving at the airport
11. Save your Boarding Pass on your smart device (cell phone/tablet)
12. Avoid shops outside of essential purchases – wear gloves
13. Eat before traveling
14. Use restrooms before boarding flights
15. Dress sensibly and comfortably - covered
16. Pack electronics and cords where you can access them
17. Have ear phones or ear buds for your Personal Electronic Devices (PED's)
18. Pay attention to ALL safety videos
19. Use situational awareness – watch your surroundings
20. WASH YOU HANDS OFTEN
