

GC Powdered-S

powdered activated carbon from coconut shell

GC Powdered-S is a virgin powdered activated carbon. Derived from selected grades of coconut shell, it is ideal for many liquid phase applications including the removal of organics from water streams. Manufactured at an NSF/ANSI certified facility, it is suitable for drinking water and food grade applications.

Specifications

Mesh Size:			
-100 Mesh, %:			99 (min)
-200 Mesh, %:			95 (min)
-325 Mesh, %:			90 (min)
Iodine Number, mg/g:			1100 (min)
Ash Content, %:			4 (max)
Moisture, % (as packaged):			5 (max)
Typical Density, lbs./cuft.:	30-33	g/cc:	0.48-0.53
PH:			8-10

*Standard packaging is in 25 kg. bags. Other packaging is available upon request.

Caution!

Wet activated carbon removes oxygen from air causing a severe hazard to workers inside carbon vessels. Confined space/low oxygen procedures should be put in place before any entry is made. Such procedures should comply with all applicable Local State and Federal guidelines.
