I. UVOD INTRODUCTION

Centar javnih službi za zapošljavanje država jugoistočne Evrope/CPESSSEC je osnovan 31. maja 2007. godine potpisivanjem Smjernica o radu CPESSSEC-a na Drugoj konferenciji održanoj u Beogradu, u Republici Srbiji. Centar su osnovale javne službe za zapošljavanje Bosne i Hercegovine, Republike Bugarske, Republike Hrvatske, Republike Turske, Republike Sjeverne Makedonije, Crne Gore, Rumunije, Republike Srbije, Republike Slovenije i Republike Mađarske.

Osnovni ciljevi Centra su: razmjena informacija o sprovedenim projektima, povećanje mobilnosti radne snage u regionu i povećanje zaposlenosti u regionu. Jedan od načina razmjene iskustva i najbolje prakse među zemljama članicama je Statistički bilten centra, u kome su objedinjeni različiti statistički podaci, demografski i ekonomski indikatori i indikatori realizacije mjera APZ. Stručnjaci JSZ svih članica Centra odgovorni su za pripremu nacionalnih podataka, a zemlja koja predsjedava je odgovorna za pripremu, izradu i objavljivanje Statističkog biltena.

Publikacija je objavljena na jezicima u službenoj upotrebi u Bosni i Hercegovini (bosanski, hrvatski i srpski jezik) i engleskom jeziku, i dostupna je u elektronskoj verziji na veb sajtu Centra (www.cpessec.org).

The Centre of Public Employment Services of Southeast European Countries/ CPESSSEC was established on 31 May 2007 by signing the Guidelines for Operation of the Centre of Public Employment Services of Southeast European Countries at the Second Conference held in Belgrade, Republic of Serbia. Guidelines for Operation of the Centre of Public Employment Services of Southeast European Countries at the Second Conference held in Belgrade, Republic of Serbia. The Centre was established by the public employment services of Bosnia and Herzegovina, Bulgaria, Croatia, Turkey, North Macedonia, Montenegro, Romania, Serbia, Slovenia and Hungary.

Main goals of the Centre are as follows: exchange of information on implemented projects, increase in regional labour force mobility as well as increase in employment in the Region. One of the ways to exchange experiences and best practice among participating countries in certain areas is the Statistical Bulletin of the Centre, wherein demographic and economic indicators as well as ALMP indicators are presented, thus putting together various statistical data. Experts of public employment services of all member states of the Centre are responsible for preparing the national data, and the presiding country takes responsibility for preparing, designing and publishing the Statistical Bulletin.

The publication has been published in the official languages of Bosnia and Herzegovina (Bosnian, Croatian and Serbian) and English, and is available in an electronic version on the Center's website (www.cpessec.org).

V. INDIKATORI TRŽIŠTA RADA - Definicije

LABOUR MARKET INDICATORS - Definitions

Postoje dva izvora statističkih indikatora tržišta rada, indikatora zaposlenosti i indikatora nezaposlenosti. Prvi izvor je Anketa o radnoj snazi (ARS) koju uglavnom sprovode nacionalni zavodi za statistiku, čija je metodologija usklađena sa pravilima i uputstvima Međunarodne organizacije rada (MOR) i Statističkog zavoda Evropske unije (Eurostat). Na taj način je osigurana međunarodna uporedivost podataka. Drugi izvor podataka je administrativni.

Podaci se dobijaju iz statističkih istraživanja o registrovanim zaposlenim licima, koja takođe sprovode zavodi za statistiku, i iz evidencija nezaposlenih lica, koje vode javne službe za zapošljavanje.

1. Anketa o radnoj snazi (ARS)

Anketa o radnoj snazi je najobimnije istraživanje o karakteristikama tržišta rada koje se sprovodi na uzorku domaćinstava. Cilj Ankete je prikupljanje podataka o stanju i promjenama na tržištu rada, tj. o njegovoj veličini i strukturi i obilježjima aktivnog i neaktivnog stanovništva.

Anketa o radnoj snazi mjeri ekonomsku aktivnost stanovništva u kratkom razdoblju posmatranja, u trajanju od jedne nedelje.

Radno sposobno stanovništvo čine osobe starije od 15 godina i dijeli se prema ekonomskoj aktivnosti u dvije kategorije: aktivno stanovništvo (radna snaga) i neaktivno stanovništvo.

Aktivno stanovništvo (radna snaga) čine zaposlene i nezaposlene osobe.

Zaposleni su osobe koje su u referentnoj sedmici radile, bez obzira na njihov formalni status i način plaćanja za obavljeni rad. Kategoriju zaposlenih čine: zaposleni, samozaposleni i pomažući članovi domaćinstva.

There are two sources of statistical labour market indicators, employment indicators and unemployment indicators. The first source is the Labour Force Survey (LFS), which is mainly carried out by national statistics bureaus, the methodology of which is in line with rules and instructions of the International Labour Organization (ILO) and Statistics

Office of the European Commission (Eurostat). In this way it ensures international data comparability.

The second data source is an administrative one: data are obtained from statistical research on registered employed persons (which are also conducted by statistics bureaus) and from unemployment registers kept by national public employment services.

1. Labour Force Survey (LFS)

The Labour Force Survey is the most extensive research on the labour market characteristics, carried out on a sample of households. Its objective is to collect data on situation and changes in the labour market, that is, on its size, structure and features of active and inactive population.

The Labour Force Survey measures economic activity of population during a short observation period of one week.

Working-age population *comprises persons over 15 and, according to economic activity, they are divided into two categories: active population (labour force) and inactive population.*

Active population (labour force) *comprises employed and unemployed persons.*

Zaposleni mogu da budu i penzioneri, studenti i domaćice.

Nezaposleni su osobe koje zadovoljavaju tri kriterijuma:

- u referentnom razdoblju nisu obavljale nikakav posao za koji su dobili novac ili bili plaćeni u naturi,
- aktivno su tražile posao u periodu od četiri nedelje pre anketiranja,
- ponuđeni posao bi mogle početi da obavljaju u naredne dvije sedmice.

Osobe koje su našle posao koji će kasnije početi da obavljaju takođe se svrstavaju u nezaposlena lica.

Neaktivno stanovništvo čine osobe koje nisu svrstane ni u kategoriju zaposlenih ni u kategoriju nezaposlenih osoba. To su osobe koje niti imaju posao niti ga traže.

Stopa aktivnosti je procentni udio aktivnog stanovništva (radne snage) u radno sposobnom stanovništvu.

Stopa zaposlenosti je procentni udio zaposlenih u radno sposobnom stanovništvu.

Stopa nezaposlenosti je procentni udio nezaposlenih u aktivnom stanovništvu (radnoj snazi).

The employed are persons who worked in the reference week, regardless of their formal status and method of payment for the work done. The category of employed persons is comprised of: employed persons, selfemployed persons and assisting family members. A retired person, student or a housewife can also be an employed person.

The unemployed are persons who meet three criteria:

- they did not perform any kind of work in exchange for remuneration in money or in kind in the reference period;
- they searched actively for job in the last four weeks before the survey;
- they could start with the offered job within two weeks.

Persons who had found a job to start later are also included among unemployed persons.

Inactive population comprises persons who belong neither to the category of employed persons nor unemployed persons. People who neither have a job nor search for it.

Activity rate refers to the labour force as a percentage of the working age population.

Employment rate refers to the persons in employment as a percentage of working age population.

Unemployment rate refers to the unemployed persons as a percentage of the labour force.

2. Administrativni izvori podataka

Administrativni izvori podataka uključuju podatke iz registara i evidencija pravnih lica i institucija koje prikupljaju podatke o zaposlenosti i nezaposlenosti. Indikatori tržišta rada na osnovu administrativnih izvora definisani su nacionalnim zakonodavstvima zemalja i ne koriste se za poređenja na međunarodnom nivou.

2.1. Zaposlenost

Podatke o zaposlenim licima prikupljaju i obrađuju nacionalni zavodi za statistiku putem istraživanja.

Zaposlena lica su osobe koje su zasnovale radni odnos sa poslodavcem na neodređeno ili određeno vrijeme, nezavisno od dužine radnog vremena i vlasništva pravnog lica, kao i osobe koje suprijavljene na penzijsko osiguranje za individualne poljoprivrednike, zanatlije i slobodna zanimanja.

2. Administrative data sources

Administrative sources of data include data from registers of legal entities and institutions that collect data on employment and unemployment. Labour market indicators based on administrative sources are defined by national legislation of an individual country and they are not used for international comparability.

2.1. Employment

National bureaus of statistics gather and process data on employed persons through research.

Employed persons are persons who signed either a permanent or fixed-term work contract with an employer, regardless of working time and the ownership of legal entity, as well as persons registered with pension insurance for individual farmers, craftsmen and freelance professions.

VI. INTERVENCIJE NA TRŽIŠTU RADA LABOUR MARKET INTERVENTIONS

Politika zapošljavanja obuhvata aktivne i pasivne mjere, koje za konačni cilj imaju suzbijanje nezaposlenosti. Aktivne mjere podstiču potražnju za radnom snagom, odnosno podstiču zapošljavanje i povratak nezaposlenih osoba u svijet rada. Sa druge strane, pasivne mjere se zasnivaju na pružanju socijalne i materijalne pomoći nezaposlenima.

Employment policy encompasses active and passive measures, the goal of which is to combat unemployment. Active measures encourage demand for labour force, that is, they stimulate employment and re-entry of unemployed persons to the world of labour. On the other hand, passive measures refer to providing social and material assistance to the unemployed persons.

Note:

Total population according to the activity, gender and region

Considering that since 2016 a new system of evaluation is implemented, it is not possible to compare the current data with the ones from the previous years. With a view to enable the data from 2014 and 2015 to be compared with the data from the upcoming period, the new system of evaluation was implemented on the data from 2014 and 2015 (revised data).

Because of the different periodicals and data gathering procedure in the previous years, it is not possible to enable the comparison by revising the data from 2008 and 2013. Data for the previous periods can be found in the Labour Force Survey Results.

Labour Force Survey Results are published as round figures, so that the readers would know that the estimates are based on the sample and not on concrete numbers that are based on the registered data from the whole country. The rounding of the figures can lead to mismatch in the sum.

For determining the scope of the index basket and goods and services which become crucial in the forthcoming periods, one per thousand of the total expenditure is taken as basis. The goods which are more than one per thousand of the total expenditure are included in the basket, the goods which are under one per thousand are excluded from the basket. But in order to follow 12 main expenditure groups and in terms of international comparableness, there are goods included in the basket even though they are less than one per thousand.
