Step 6

There are special rules concerning the 3rd card dealt to the Banker. If the Player didn't draw the third card, the Banker doesn't draw it either.

The third card is drawn when:

- The Banker got 3 points and the Player doesn't have the 8 points card
- The Banker got 4 points and the Player doesn't have the 0, 1, 8 or 9 points cards
- If the Banker got 5 points and the Player doesn't have the 4-7 points cards
- The Banker got 6 points, and the Player doesn't have the 6 or 7 points cards
- If the Banker got 7 points, the third card isn't drawn

Step 7

Calculate the total points. The winning hand is the one that has the number of points closest to 9.
