# Porn hub

**Porn is a weapon. Each time porn is viewed, brain damage is incurred by a flood of synthetically generated dopamine. Studies have shown that consistent viewing of porn damages dopamine receptors and also decreases grey matter in the brain. This is a form of brain damage which leads to low testosterone, anxiety, depression, decreased self confidence, depletion of minerals and less motivation. Porn also disconnects the viewer from reality and degrades the relationship between men and women, making it easier to control the population. If something is free, you are the product.**
