My Support for Mrs. Theresa Mary May, Prime Minister of Great Britain

I Thank You for Your continued activity for the purpose of leaving Great Britain from the European Union.

Your interest is important to many nations around the world, and Your country can only be proud of the steps that lead to a better world.

European crime is indeed catastrophic and is really needed to fight these risks. Great Britain has always fought for peaceful purposes, and it is a national pride for You to maintain such British interests.

My own position of the subject is to address You for urgent withdrawal from the European Union, and I would like to offer You the possibility of Your political defense of this process, before the views of the British nation.

Many people living in the UK want to support the departure of Britain from the European Union, and each of them therefore likes You, Your political party, but also Your interests and political figures involved in these activities for British Independence.

It is also true that in Great Britain there is still a large group and the view of stopping leaving Europe, and so people become opposition to You, against Your political party, but also above all these people create a community of government opposition and their own interests can be Then very risky for the stability of the country and the United Kingdom.

Announcement of steps to leave the European Union is therefore a risk direction, but if Your policy is to base Your move on the real interests of international politics, Your country can gain much more stability but also the assurance for Your political party of much greater support from The overwhelming majority of Your Great Britany and UK, Ireland, Canada, Australia and all overseas territories.

The European governments have together done many crimes that really have to be punished. Genocide, apartheid against the state, harm to development rights, intolerance, spread of hatred, support and activity of tyranny, inability to function in the legal justice of the courts and, in the same case, corrupt practices of the police, state services and politics, criminal statistics that outdone the crimes of the Second World War, And that is why it is necessary to open such information to nations and to give them the right and the opportunity to know that this world is still safe because there are still nations and governments that together are active for security, justice and peace.

European crimes, crimes that are crushingly violate the UN Charter, the UNGA Declaration, International Humanitarian Law, and the European states create a factor of much worse criminality than the Third German Empire and the Islamic State of Iraq and Syria. Crimes of the historically highest capacity of the

world, crimes against all principles of political intelligence of legal rights, crimes against the fundamental rights of all states, but still crimes against the foundations of censorship in the media and communication for censorship support the prosperity of European criminal governments and their ability to grow terrorist groups Radicalism, and much greater forces capable of successfully launching war. Media censorship must not be supported in any way, no one can protect a terrorist subject.

If Your political party uses this information to inspire the British nation and the crown states of Elisabeth II, then You get the hardest favor from all the citizens of these countries, as well as full legal support from the Security Services of Your country and authorities.

Today, many people are protesting against You, and it is really just a loss of loss, but also the certainties of establishing the United Kingdom and other overseas territories. That is why I really recommend You to use this information for You personally, and to justify Your distance from the European Union so that Your country is still unharmed, stable and, above all, with the pure name of Your state.

So people will immediately understand that Your country has no other option, and if the United Kingdom remains in the European Union, then Your country only has the risks of bankruptcy and hard losses that are much worse than the departure from the European Union that is based on world terrorism and crime. Everyone immediately realizes that the plan for leaving the European Union is therefore the best option for Your countries and hence for their future, so people will be able to understand that Your interests in the British Independence are the best choice in Britain and another better policy plan here Is not in sufficient competition.

Like the Second World War, the British Hate against Fascist Germany, and world-sponsored celebrations, days of co-operation of the nations and their victory, these were the days that established the format of the new world policy of the United Nations, thus reaffirming that such a criminal entity Like today's Europe, it must not exist in this world today.

That is why Your political interests will gain hard support and a really strong admiration from Your British citizens, but also from all the countries of the world.

It is a great historical pride to be one of the main first opponents to embark on a new victory for all nations.

If Your policy does not want to take advantage of any of the interests of this factor, Your nation can only follow how Your policy directs to damage the power of national friendship at the international level, but also within Your own market relations and prosperity. Great Britany have a stabile power, economy and oportunities for development, but people in oposition can motivated with their own interests of European Unity, without respectability for terrorist responsibilities.

The other political parties of the British countries will therefore want to use Your country's decentralization, as well as state resistance to Your policy, and

Your policy will also be severely damaged. Opposition political parties will soon support the cessation of the British withdrawal from the European Union, and You will lose it on national support, as well as the profit from successful steps of British victory against criminals.

Your opposition political parties will therefore ensure a stable stance in the Union, thereby further supporting the strength of European crime and terrorism, as well as the tough threats to the stability of Britain.

Some of Your opposition parties will abuse these incidents to declare a referendum on the independence of Britain and the Queen's crown. Your country may be destabilized and damaged in function, but Your own policy may fall deep down to a critical level.

It is the fact that if You support the departure of Britain from Europe, then Your position will be much more stable and prosperous, even with much greater benefits for Britain.

According to international law, any state that supports the crimes of Europe and the stability of this entity must not be. This means that all British political parties have to respect the duty of interest for leaving the UK, and thus also ensure such consistency of common strategies.

Other political parties who want to declare their own territorial independence therefore also have positions where they have to respect that their interests in reaching an alliance with the European states are only steps to terrorism, and such a political party must not be legitimate. Your courts already have a legal duty today to condemn all similar political parties to the level of losing legitimacy rights, claiming media activities, as well as the right to free communication in society.

If the political parties of independence continue to proceed legally, without the support of European contacts and for the sake of their territorial independence, then such political parties lose all their rights to be active today due to the state's instability at international level, for the sake of the responsibility of the crimes of foreign states, Which means that it is not possible to abuse the facts created by the crime for its own purpose and interests and to influence the policy of states.

If such crimes and the consequences of the crime were misused, then this would mean breaking the international declarations and conventions of the UNGA and the UN Charter. These are acts of the highest world crime, and Your government has the mute rights to eliminate and liquidate any such movements. The nation can not make the choice if the decision is based on the consequences of foreign criminal acts and even in the form of a monopoly interference with the integrity of Your states, because such crimes really and fundamentally affect Your country.

Your country is in a strong position, even with the potential to be much stronger than the entire criminal Europe. If Your country supports the media function of legal principles and peacekeeping obligations to prevent crime and conflict, then Canada, Australia and all British Overseas Countries will soon understand that there is a need to withdraw from relations with Europe and any

other legal possibility here Can not be applied and demanded, since it is only a step of destabilizing the peacekeeping force needed to increase security and prevent wars. However, it is necessary to keep an eye on the US threats of infiltration and abuse of both own and federal interest, because similar practices are often conducted against me as well.

Your nature of the international size of the states creates a strong dominance, and now it is certain that most states of America, Africa, and Asia will join You as well. This makes us a global network of states at the level of maturity, a global majority democracy of the governments of countries that already have a common voice to influence the policy of the world as well as UNSC resolutions.

Our Party is therefore the strength of the whole range of today's existence of international law, the world's largest military force. We are both significantly stronger and more mature than the opposition from the European Terrorist States and so it is also a certainty that the US, Russia and China will soon lose all the interests of supporting Europe because it is confirmed that European states are a truly illegal terrorist entity, Of these entities is again the significance of the greatest treason of the state as a crime for which the judgments of public executions of responsible criminals and the executions of their families and friends are issued.

The threat of military conflicts and genocide still exists here, that is real, but they are threats created solely by the illicit activities of China, Russia and the USA with the European terrorist states.

I therefore reaffirm that our generations are people living at a time when it is now easy to launch a mass destruction of the military infrastructure of terrorist states in just a few seconds with full success. It is in the same interest to use technology that will ensure the detection of all secret civilian civilizations and military bases in space, an extremely rapid time, so we can not be in any risk of losing our duty to stand in opposition to more than Europe, China, the US, Russia, But also Your UK country.

I personally, I have no fear of society, the consequences of fascism and radicalization, in my current position, it is a media freedom for peaceful interest, indeed a great reinforcement, and people can better get in touch with my person, and I can Simply build my own integrity, background freedom of activity without alien espionage and monitoring.

Supporting the cessation of fascism and criminal terrorism is a great pride, and Your policy is only gaining worldwide recognition and support in these steps.

European crimes are really in the face of a tough crime and it is really necessary to liquidate this crime. Crimes that have surpassed World War II statistics, as well as crimes that block much more significant historical values than the United Nations, so it's up to You how You want the whole future world to have an opinion on You and what name will be Yours The country in the main moments of the history of all mankind and the future activities of our world policy.

I therefore really ask You to support Your country in establishing

cooperation with UK law offices and offices and therefore also for the possibility of applying the International Advocacy Intelligence Council (IAIC) to ensure the development of a safe office of my office without risk of internal corruption And the radicalization or misuse of the steps to terrorism.

The IAIC provides security for the stabilization of my country, but also the full capacity to build on our business relationships in the Banks, as well as the common markets, also for the purpose of common security, but also for the purpose of growing other partner interests between our states. Dynamically, and our cooperation plan and develop Your own people.

In the field of markets, it is real that I am much better for Your country than cooperation with the European governments of the countries, and Your state can too very celebrate it because it is step to up.

That's why I'm definitely asking for Your support for the purpose of applying the document about the IAIC service, which will be created by ID's provisional office, and our co-operation can therefore be immediately stable, peaceful and without any risk of disinformation or problem.

The IAIC also provides communication with the media and therefore, in view of the current position when the media are illegally blocked for the sake of damage to peace development, it is really important to ensure legal development and truly fully open the media, as well as the IAIC for the possibility of stable media cooperation To maintain the guarantees of the validity of the information, and therefore to ensure stability of the international information of the states.

When IAIC is in stabile function, I can quickly expand into the global structure of countries, and in the same I can therefore stabile guarantee for full activation of the World Diamond International Alliance which give for Your country Great Britany, much powerfull oportunities for use today European territories, but with greater power which is based on Global governmental cooperation of business and trade, army and military, policy and new level of sovereugnty in time of globalism the world.

I therefore Thank You very much, for Your patience and loyalty, Your time and interest in supporting a peaceful and just step, and I therefore wish You really luck and success, but also victory against crimes.

King Gottwald Peter, ID's
