

Tora Bushido - Blackmailer

The Marmite Collective

written by an insider

First things first

A little bit of background information is needed to understand the situation.

The Marmite Collective worked together with Alex Meyer the leader of the Galactic Skyfleet Empire, during that time Alex gave ISK the Alliance made to Tora and he decked enemies of the GSE in return. They also decked corporations to force them to join the GSE.

What happened?

During a time when the Alliance Leader of the GSE was inactive due to private reasons, they got a war with sovereign infinity (which are members of marmite now), this war ended with billions of lost ships and many corps leaving the GSE. Then the Leaders of the different departments within the alliance decided to rebuild the alliance and enforcing a new structure within it. (Alex Meyer was informed of everything they did by them)

When the alliance slowly made money again, Alex came online once in a while and he always withdrew ISK from the Alliance account, These ISK were meant to repay debts the alliance leader made without telling them.

So to give him a warning they put someone else in the alliance leader position but he got that position back after he returned one night later.

A few days later it was decided that Amelie Chayse catalogizes every asset Alex hid, from the members and that he clearly bought from ISK the members made for the Alliance.

In secret he and Amelie planned to steal everything because Alex thought that the department leaders that wanted to get the alliance back on track will betray him.

Many of these assets were generated by the members and many of them were given by the players to the alliance to help.

When Amelie stole everything and Alex was informed of it at the GSE Teamspeak he played the shocked alliance leader.

At the next day he really was shocked, because Amelie double tricked him and was loyal to the members and not to him. She send a chatlog of their plans to the department leaders and these were proved right when alex foolishly sending his chatlog folder to them to, with an altered log in it but he forgot to delete the original.

After a few days when the GSE only had the Leader and his alts as members left, half of the assets were given back to him, after Tora Bushido threaten to declare war on everyone.

The Tora Bushido Complex

After Alex was given half of these assets, Tora still wasn't happy because he thought that more assets were awoxed, but that was and is not the case.

So he put one of his alts into the GSE and got the leading position from Alex who now is nothing more than Tora's pet.

Tora now gets the ISK from 400 GSE pocos and has many pocos within the MCC which were claimed together with GSE Members.

But that's not enough for him, he wardec'd every corp that was in the GSE and demands 10 billion ISK from every single corp, otherwise he will continue these wars until he gets these ISKs as killmails.

He also send this Mail to these Corps:

Guys,

Marmites invested many years of time and isks in GSE.

Even before all the mercs joined in, we were investing in GSE already for a long time.

You all (all ex gse corps and Alex) departed and took all assets.

Marmites (and actually all mercs) ended up with 0 isk out of this split.

This pisses me off enough to perma dec any (ex) GSE.

Alex talked to me before I adressed this issue to him and told me we could use the poco isks for Marmites.

This will pay off his part. And the corps that left the GSE also still owe us a lot.

I want 10B isks from them in any form possible (modules, ships, ore, isks).

Thats a very good deal. If I calculated what you really owe use, it would probably be a LOT higher.

If you ever setup a new alliance and want to make deals, fine, but that has nothing to do with the old GSE.

I made a first start with wars, but more will follow soon.

All corps friendly still to Alex can rejoin GSE, who will not have any wars with us.

Untill you paid your bill, we wont be friendly.

Tora

Ps. Forward mail to all the other GSE ceo's who left.

Especially the last part about rejoining the GSE is a bad joke, who wants to play this game in slavery?

This is the real Tora Bushido, a highsec blackmailer. Even though Alex was happy with the assets he got and he really recieved a fair amount of them, Tora still wants more.

This guy wants to become a CSM this year, if you want to vote for him, consider these occurances and his attitude towards EvE players that want to start something new after they got betrayed by him and Alex.

The GSE got big through wardecs, blackmailing, betrayal. When the deparndment leaders realised this they wanted to restart, but this is impossible now.
