

What is Temp Mail?

Temp mail is an e-mail service that is created by randomly determining the address and extension and self-destructs after a while. By using this service, you can receive a free e-mail with a disposable email without giving the original e-mail address. Temp email is also called 10minutemail. When registering for a site, application, forum, or when we want to download a program, we are sometimes asked to confirm the code that will be sent to our e-mail address. We do not want spam and junk mail to come to the real e-mail address that we always use. 10 minute mail is a free e-mail service that allows us to get rid of such spam and stay safe.

Is Temp Mail Free?

Temp mail provided by us is completely free. To use this service, you do not have to pay any fees, subscribe to anything, provide your card information and personal information. It is one of the most important features of the 10 min mail service that it does not require a fee and protects users from harmful mails.

Where is Temporary E-mail Used?

Temporary e-mail service is one of the most needed services in daily life. A temporary e-mail service is required to view the content of a forum, to use a 7-day [temp mail](#) trial version of a program, to use an online service. Because most sites or apps that want to email you do so to send you ads, spam, or send you infected files that can damage your devices and steal your data. You do not want such mails to come to your personal and always used e-mail address.

10 Minute Mail

[10 minute mail](#) You can register to the forums using a temporary mailing address and subscribe to the newsletter lists required by the sites. You can use the 10 minute mail service when you want to ensure online privacy and register on sites that you think may violate personal data. You cannot send an e-mail to another address with the temporary e-mail address provided to you, but you can receive e-mail from all addresses. You can renew the duration of your e-mail address, which will self-destruct in 10 minutes, or save a backup and access it later.

File attachments are not allowed in the mail sent to you in the Temp mail service. Because downloading file attachments whose source is unknown may cause virus infection to your device. Some programs, such as Spotify, offer newly registered users the opportunity to use the premium version for free for some time. This period can be between 3 days and 30 days. You can use the free premium version many times by using temporary mail. Other than all these use cases and features, ephemeral email works similarly to other [Temp mail](#) regular email services like Gmail.

Can I Use Temp Mail to Sign Up for Social Media Sites?

You can also use temporary email when registering on Twitter, Instagram, Facebook, and other social media sites. However, it is better to register on social media sites with your e-mail address and phone number. Because known and reliable sites like [10 minuten mail](#) these will not send you harassing or infected emails. In some cases, these sites may need to send you e-mails, if you use disposable e-mails, you will not be able to access the same address again, so you cannot see the e-mail sent to you and you may have problems logging into your account.
