LOUIS DELAVENTURA

CEO, EB3

Louis Delaventura, (French) CEO of EB3 coin, is a leading business professional who has established himself as a financial enthusiast. With innovation and dedication at the forefront of his actions, it's no wonder he has achieved so much, in such a short period. It's never too late to be part of something great; Louis stands by this –

C'est toujours le bon moment- **It's always the right time.**

EB3 COIN

THE POWER CURRENCY OF THE FUTURE

EB3 Coin is a new digital currency with the ambition to become the next big cryptocurrency globally.

It is a fully decentralised peer-to-peer global payment network, guaranteeing complete anonymity in all transactions. EB3 Coin aims to be the leading alternative in digital spending, using X11 pos/pow algorithm and a proficient development team dedicated to its success. With a well-planned growth model, EB3 Coin is committed & determined to become the preferred currency for those who appreciate privacy, security and reliability in transactions.

To be part of this revolution, you must realise the potential of EB3 as a global stronghold in digital currency.

GLOBAL VISION

- Determination to have EB3 Coin as a fast and reliable global alternative to traditional payment methods.

- Commitment to driving and growing this cryptocurrency to a position of power and the number one choice for consumers of the future as per acceptability, value & liquidation.

EB3 ROAD MAP

2015

FOUNDATION

- Developed the theory of EB3 & requirements of Ecosystem
- Identified blockchain formation and platform

2016

DEVELOPMENT

- Developed server platform
- Identified trading exchange requirements

2017

ENHANCEMENT

- Connected multi currency wallet system
- Tested the ecosystem & enhanced security measures

DEVELOPMENT PLAN

Expand EB3 Coin on a global level.

Multiply merchant acceptance.

Enhance market value.

THE EVOLUTION OF TRADE

With changing times, comes new & improved methods of trade, along with new forms of payment.

Primitive

Hunt & Gather

Agricultural

Barter & Exchange

Commercial

Gold & Silver

Industrial

Money & Banking

20th Century

Online Banking & Plastic
Cards

21st Century

Mobile / Digital Currency &
Global Wallets

GROWING POPULARITY OF MOBILE PAYMENTS

According to **Forbes** magazine Mobile Payments will account for 80% of all transactions globally by 2020.

Why??

- Easy to use
- Convenience
- Speed
- Lower/negligible fees
- Zero errors
- Peer to peer

WHY HAS DIGITAL CURRENCY COME INTO EXISTENCE

- It is estimated that over 2.5 billion people worldwide do not have access to banks or similar financial systems.
- **Digital currency** otherwise known as **Cryptocurrency** provides anyone with a mobile and internet access, the opportunity to manage their funds and trade globally with minimal transaction charges. This means equal opportunity to invest, spend and trade irrespective of location or transaction size, from one single account.
- The limitations of traditional financial systems have become a burden in today's fast paced world, and can be avoided by moving to digital currency.

WHY HAS IT COME INTO EXISTENCE?

Issues with traditional financial systems:

- Liquidity
- Slave to debt
- Exorbitant fees
- Fraud
- Inaccessibility
- Limited control
- Interference
- Minimum transaction sizes

FINANCIAL FREEDOM

Shouldn't you be able to access your money when and where you want to?

DIGITAL / CRYPTOCURRENCY EXPLAINED

- A Cryptocurrency is a digital currency that is created through mathematical engineering (algorithm) and designed to work as a medium of exchange.
- It uses cryptography to secure the transactions and to control the creation of additional units of the currency.
- It was created for the purpose of making global transactions that are private, secure, fast, peer to peer & anonymous.
- It is not made or controlled by any central institution, thus making it immune to governmental interference and manipulation.

THE BASICS OF BLOCKCHAIN TECHNOLOGY

Cryptocurrency is so advanced from a security perspective as it is designed using Blockchain Technology

A **Blockchain** is a **digital ledger** of all transactions which is both public and incorruptible. It is not stored in any single place & therefore cannot be hacked. Through the blockchain network each transaction is verified, and a new block is created and added to the chain in chronological order.

Other Industries that hope to incorporate Blockchain technology include:

- Government Elections
- Land Title Registry
- Stock Trading
- Crowd Funding
- Supply Chain/ Manufacturing Audits
- File Storage & Sharing

PURPOSE OF DIGITAL / CRYPTOCURRENCY

This Infrastructure is Designed for:

- Investing in a new currency with unmeasurable growth potential.
- Ensuring access to liquidity at any time.
- Sending money abroad cheaply and safely.
- Managing funds outside of traditional banking systems and their exorbitant charges.
- Purchasing and paying for goods and services particularly through Ecommerce but also the basics like flights, hotels, college fees and even groceries.

TYPE OF USERS

Local or Global

Individuals

E-Commerce

**Investors &
Traders**

**Businesses of
All Sizes**

**Entrepreneurs
& Start Ups**

WHAT DOES THIS MEAN ON A GLOBAL SCALE

The world is constantly changing and for “**Survival of the Fittest... Finest... Fastest**” we must **ADAPT**.

On a large scale, trust, security and privacy are ever increasing in importance, and for the first time, digital currency is being able to deliver these requirements to the highest level. By uniting big investors, small to medium companies and everyday users in a single global ecosystem, it eliminates the need for a middle man, and the exorbitant commissions that come with it. It ensures a more economic and efficient method of exchange with instant transaction confirmation. Combined with the security of blockchain technology, digital currency offers a future proofed alternative to traditional, less liquid financial systems.

VENDORS IN INDIA ACCEPTING DIGITAL CURRENCY COUPON

Acceptance is growing among vendors due to lower transaction costs, no chargebacks and greater reach for new potential consumers.

These are exciting times for the digital currency community.

THE POWER

OF THE FUTURE

EB3COIN

www.eb3coin.biz

www.eb3coin.biz

WHY CHOOSE EB3 COIN

THE POWER CURRENCY OF THE FUTURE

It has the power **NOW** to meet consumers needs for the **FUTURE**.

The **No. 1** choice for consumers looking for:

- Solid **investment return** on digital currency
- **Secure, anonymous & globally** accessible
- **Free from influence** by external economic or financial markets.
- **Minimal charges** with instant confirmation.
- Earn **superb value appreciation** on stored coins in addition to **guaranteed interest**.

WHY BUY EB3 COIN

Worldwide Operated

The decentralized coin is being exchanged globally.

BENEFITS OF EB3 COIN

SECURITY

EB3 Coin is stored & transacted digitally with encrypted codes & keys for added security measures, using SHA-512.

PRIVACY

Transactions are not observed or interfered with by a central organization.

GLOBAL

Transactions can be made globally with instant confirmation & minimal charges, unlike existing exorbitant bank charges.

FUTURE PROOFING YOUR FINANCES & CONTROL

OUR MAJOR FOCUS

- Producing a tested and reliable technology with the most advanced security measures embedded.
- Protecting user data & wallets against outsider interference.
- Shielding the whole ecosystem from human error or attack.
- Establishing community acceptance and liquidity resulting in value growth organically.

We invite like-minded individuals to be part of this movement.

SAME BLOCKCHAIN TECHNOLOGY AS BITCOIN

- Developed using the successful **blockchain system of Bitcoin**, ensuring a reliable and tested technology with the most advanced security systems, yet still offers significant flexibility in terms of functionality and specification.
- Unlike other digital currencies designed using new and untested blockchain systems, which often have short-term plans, substantial risk and the possibility of hacking.

TECHNICAL EXPERIENCE

Accessibility

- Web
- Mobile (iOS, Android, Google Play)
- Desktop (Linux, MacOS, Windows)

EB3 Coin was developed using X11 pos/pow algorithm.

The ecosystem aims to deliver

- A positive trading experience with an easy to use mobile app suitable for beginners as well as proficient users.
- A wallet system that is accessible at any place and time, using a device with internet, to help manage their liquidity and transfers more efficiently and with minimal charges.

From a Merchants Perspective

- A cheaper solution for receiving payments with instant confirmation and lower transaction fees resulting in a faster and safer payment processing.

OPPORTUNITY

The price of an EB3 coin is determined by the forces of demand and supply. When demand for EB3 coin increases, the price increases, and vice versa. Since EB3 coin is still a relatively small market in comparison to what it could grow into, the prices are bound to fluctuate.

By investing in EB3 while in its initial stage, there is unmeasurable potential for growth and return. And in addition the potential to earn interest on coins stored & coin value appreciation.

That means multi-fold returns!

WHY INVEST

Positive Response to Investment in Digital Currency.

Meet the Indians who bet on the hottest virtual currency
Kim.Arora@timesgroup.com
New Delhi: Rahul first heard of the virtual currency called bitcoin four years ago while playing multi-player online games. "There was an option to buy lives and resurrect your character so I traded my bitcoin stash," says Rahul, who goes by just his first name. One life for 500 bits (one bit is one millionth of a bitcoin) was not a bad deal at all. But as he recounts that story now sitting in a cafe in Delhi, the 32-year-old says, "I regret it. I regret it so much. I should have saved those." Had he held on, he could have been a millionaire today. The cryptocurrency's value has skyrocketed — from \$13 for one bitcoin (denoted with BTC) in January 2013 to \$1,182 (Rs 76,000) now. Rahul, a data analyst in Delhi, betted in the crypto though his family zaffarpur, Bihar by his move. "brother about it

EB3 COIN

Future Developments

- ATMs being launched in Thailand and Vietnam.
- Merchant network expansion.
- EB3 Coin is in the process of optimization and specialization, and soon to provide specialized transaction services on a global scale.

INVESTMENT POTENTIAL

Let's take Bitcoin as an example.

- The demand for this paperless currency is thriving with global transactions growing across exchanges and even Bitcoin ATMs.
- If you invested USD \$0.10 for 1 BTC in the Year 2009, your 1 BTC would be worth USD \$1,300 today.

What matters is the price you decide to get in or exit at!
