Rus Bio Turinabol Side Effects Rus Bio Turinabol is 17 alkylated anabolic steroid, which enables oral administration, but creates a toxic effect on the liver, comparable to Methandrostenolone. In general, side effects are rare and are most commonly associated with the excess of the course duration and high doses.

Turinabol Cycle Length. Unless instructions say differently, a user will only take oral steroids for 6 to 8-week cycles. While accessing any number of bodybuilding forum board discussion threads, it's noted that many bodybuilders stick to a 10 mg daily dosage of Turinabol for a 6-week cycle.. This level has noticeable benefits while at the same time reducing the potential for side effects.

Proper Administration and Timing of Turinabol Dosage. Turinabol exhibits a half-life of 16 hours, which is considerably long for an oral anabolic steroid when other compounds such as Dianabol are taken into consideration with its half-life of 4.5 - 6 hours. As a result, there is normally no requirement to split up Turinabol doses throughout ...

I never follow the newest trending workout or diet fads. I keep it old school. I lift heavy, I cardio, I feed, I hydrate. No tricks no gimmicks. □□□□□□
